Sundays:

Unknown - rumor has it we have
classes.

Free time:

Time before morning classes is taken
up sweeping, mopping, polishing, or being
giggled if not done.

About half an hour after P.T. before
lunch, once the necessary shower is out of
the way.

None other.

Seriously, though, it has its prunny
side - there's more moaning + groaning

about how they treat us. Food is plentiful, not as good quality as Santa Ana, & milk only at breakfast. (one cupfull.)

Work is very interesting, & promises to be more so once the first 3 weeks is over and we start flying. We went out yesterday afternoon & saw the ships we fly - twin engine jobs with provisions for 3 students at a time, all using different systems of navigating. But you, Betty, and Aunt Givney are about the only ones I can write & then only at odd moments.

Time for chow (lunch) now.

Love,

Ernest.
