COMPARATIVE SUMMARY TABLES

The table following shows the over-all action on chapter III of the bill, setting forth the current year appropriation, the 1951 budget estimates, the amounts allowed by the House, and the amounts recommended by the Senate committee.

The tables appearing at the end of chapter III of this report give these comparisons by subappropriations in the bill.

Summary table of 1950 appropriations, 1951 budget estimates, amounts recommended in House bill, and amounts recommended by Senate committee

GENERAL APPROPRIATION BILL,

1951

DEPARTMENT OF STATE

The total amount recommended in the bill for the Department of State is \$204,483,067, which is a reduction of \$25,594,330 in the budget estimates and is a decrease of \$95,922,329 below the appropriations for the current year. The largest single reduction under the current year appropriations is in the appropriation entitled "Contributions to international organizations." This is due to the fact that the appropriation for the current year for the International Refugee Organization is \$70,447,729 whereas the amount requested in the budget estimate for fiscal year 1951 is \$25,000,000, a reduction of over \$45,000,000. Other large decreases under the current year appropriations are \$8,000,000 in the "Buildings fund," \$14,600,000 in the "International information and educational activities," and over \$7,000,000 in the appropriation entitled "Philippine rehabilitation." Furthermore, during the current year there were appropriations in excess of \$20,000,000 for "Payment to the Government of Finland," "Swiss War Damage Claims," and "Port-au-Prince Bicentennial Exposition," which were of a nonrecurring nature.

SALARIES AND EXPENSES

The committee recommends an appropriation of \$78,300,000 for this item which finances the Department's staff in Washington and the Foreign Service staff in 75 countries and some 300 posts all over the world. The amount recommended represents a reduction of \$431,000 in the budget estimate, an increase of \$147,900 over the current year appropriation and an increase of \$1,000,000 over the amount allowed by the House. The appropriation for the current year is \$78,152,100, and the Department requested an increase of \$579,000 of which \$244,000 resulted from the Classification Act of 1949 and the balance, largely to expand the Foreign Service. The amount of \$77,300,000 recommended by the House would result in cutting into the existing Department and Foreign Service staffs. The amount recommended by the committee will enable the Department to retain all of its existing staff. In this critical period, the committee did not feel that any reduction in experienced personnel should be made which would tend to aggravate our ability to cope with the overwhelming political, economic, and social policies and problems involved in the conduct of our foreign relations. With respect to alien employees, the committee is vitally interested in the replacement of local employees by Americans where such action is indicated in the interest of security.

The committee recommends that the salary of the Deputy Under Secretary of State for Administration be increased from \$15,000 per annum to \$17,500 per annum, so long as the position is held by the present incumbent. Mr. John E. Peurifoy is the present Deputy Under Secretary for Administration. It is the opinion of the committee that Mr. Peurifoy is an outstanding public servant.

REPRESENTATION ALLOWANCES

It is recommended by the committee that an appropriation of \$900,000 be provided for representation allowances. This amount is an increase of \$225,000 over the amount allowed by the House and is \$79,200 under the budget estimate. The comparable appropriation for this item for the current year is \$650,000. The committee is convinced that additional representation funds are necessary if there is to be proper representation of United States interests abroad by men without private means. Established custom requires that appropriate presentations be made in most instances by the diplomatic and consular representatives often through formal dinners or informal luncheons or receptions. The committee was advised that last year officers expended \$216 of their personal funds for every \$600 appropriated in order to meet minimum representation demands. The committee recommends this increased appropriation because it is manifestly unfair for our Foreign Service officers to make substantial official expenditures out of personal funds, and because some of the most valuable results, both in information and advancement of American interests and policy, are provided through the judicious use of representation funds.

FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

The House approved the budget estimate for this item which is in the amount of \$2,233,000. The committee recommends that no appropriation be provided at this time. The amount of \$2,233,000 requested in the budget estimate is composed of two parts: (1) \$1,-099,000 to cover the liability for the current service of Foreign Service officers in the fiscal year 1951; and (2) an accrued, or past service, cost of \$1,134,000 which is the annual amount required to amortize the unfunded portion of the reserve liability in 35 years beginning July 1, 1950. There are several retirement and disability plans of Government employees at the present time where the appropriations are made from year to year on the basis of the amount it is estimated will be disbursed for retirement and disability purposes, whereas there are other plans where appropriations are made in advance to a fund. This particular fund has a balance in excess of \$14,000,000 and the reduction made by the committee would in no way discontinue payments. The committee was informed that the Bureau of the Budget at the present time is making a study with the view to recommending uniformity in the various Government retirement funds. Pending the receipt by Congress of the Bureau of the Budget recommendations in this matter, the committee believes additional funds should not be appropriated for this fund over and above the amounts actually required to make disbursements.

BUILDINGS FUND

The committee recommends an appropriation for this purpose of \$5,000,000, a reduction of \$7,000,000 in the estimates and a reduction of \$3,000,000 under the House bill. The committee was advised that the Foreign Service Buildings fund had an unobligated balance as of May 31, 1950, consisting of \$2,619,351 in cash and \$16,361,613 avail-

ability for use of local credits or a total of \$18,980,964. The budget estimate contemplated a carry-over on June 30, 1950, of approximately \$4,000,000 together with a new appropriation of \$12,000,000 or a \$16,000,000 program for the fiscal year 1951. The amount recommended by the committee of \$5,000,000 together with the carry-over will allow the Department a well-balanced program.

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

For this appropriation, the committee recommends an appropriation of \$9,900,000 which is a reduction of \$800,000 below the budget estimate and a reduction of \$700,000 under the House bill. This appropriation is used as an emergency fund as well as for the purpose of defraying the cost of repatriating American nationals stranded in various parts of the world. It is the opinion of the committee that the appropriation of \$9,900,000 will be entirely sufficient for these purposes.

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

The committee is deeply concerned with this appropriation. Although the budget estimate of \$55,178,297 is \$42,766,611 under the current year appropriation, this is due to the reduction in the concontribution to the International Refugee Organization which is \$25,000,000 for the next fiscal year whereas it is \$70,447,729 for the current fiscal year or a reduction of over \$45,000,000 in this one item. In almost every instance the Department has requested increases in the amounts of the contributions. The committee believes that every effort must be made by the Department to reduce the unusually high percentage of contribution which the United States is called upon to make to most of these organizations.

The committee is recommending an appropriation of \$53,753,067 which is a reduction of \$1,425,230 below the budget estimate and the amount allowed by the House. The reduction recommended by the committee is to be applied to the following organizations:

International Civil Aviation Organization	\$729,000
International Labor Organization	243, 681
Pan American Sanitary Bureau	93, 650
Pan American Union	358, 899
- description of the short the set of the distribution of the set	

Total_____ 1, 425, 230

With respect to the reduction of \$729,000 in the contribution to the International Civil Aviation Organization, the committee was advised that a proposed project in Greece would not be pursued during the next fiscal year and the Department volunteered this reduction. The reduction of \$243,681 recommended by the committee in the contribution to the International Labor Organization would result in the contribution of the United States being the same amount as for the current year, namely, \$848,058. For the Pan American Sanitary Bureau, the committee is recommending an appropriation of \$1,153,498 which is the same amount as the contribution for the current year. For the Pan American Union the committee is recommending an appropriation of \$1,247,123 which is the same amount as the United States contri-

George C. Marshall Foundation, Lexington, Virginia

bution during the current year. The reductions recommended by the committee will in no way impair the work of these organizations but will continue them at approximately the same level as during the current year.

The committee is also concerned with the large number of organizations which are not under the United Nations. It seems to the committee that if these organizations have value they ought to be included in the United Nations framework. However, this is a matter which should be considered by the Foreign Relations Committee of the Senate and it is the recommendation of the Senate Appropriations Committee that the Senate Foreign Relations Committee make a study of this subject.

MISSIONS TO INTERNATIONAL ORGANIZATIONS

The purpose of this appropriation is to provide funds to pay the expenses of the United States representatives and their staffs to certain international organizations, the bulk of which is for the United States mission to the United Nations. The budget estimate for this item is \$1,636,700 and the House reduced it to \$1,600,000. The committee recommends that the appropriation be further reduced to \$1,500,000. Although this amount is considerably less than the appropriation for the current year, it is approximately \$125,000 more than was appropriated for this purpose during the fiscal year 1949.

INTERNATIONAL CONTINGENCIES

For this appropriation the committee recommends \$2,800,000. This is a reduction of \$200,000 under the House and a reduction of \$530,000 under the budget estimate. This appropriation is used to finance the expenses of United States delegations to international conferences, provide for missions and contributions to new or temporary international organizations, and the expense of temporary missions on special assignments in the field of international affairs.

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

The budget estimate for salaries and expenses is in the amount of \$1,380,000 and the House reduced this figure to \$1,000,000. The committee concurs in the action of the House and recommends an appropriation of \$1,000,000. For construction, the House recommended an appropriation of \$5,035,000 which was a reduction of \$2,150,000 under the budget estimate. The committee is of the opinion that the amount allowed by the House is excessive inasmuch as a contract has not as yet been signed for construction of the Falcon Dam and that the Department would not be able to use an appropriation of \$5,035,000. Accordingly, the committee is recommending that this item be cut further to \$3,000,000 or a reduction of \$2,035,000 under the House. For Rio Grande emergency flood protection, the committee recommends an appropriation of \$30,000 which is the same amount allowed by the House. This is a reduction of \$20,000 in the budget estimate. The House approved language authorizing the purchase of four new automobiles for replacement only. The committee recommends that the language be amended to permit the purchase of eight new automobiles of which six would be for replacement only.

George C. Marshall Foundation, Lexington, Virginia

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

The budget estimate for this item is \$529,200 and the House allowed an appropriation of \$500,000. This appropriation finances the United States participation in four United States-Canadian commissions which carry out responsibilities in fields of mutual concern to the two countries. The committee recommends that an appropriation of \$600,000 be allowed. The increase of \$100,000 recommended by the committee is divided into two parts: (1) \$8,000 of the increase is for the International Fisheries Commission; and (2) \$92,000 of the increase is to be available only for the examination and survey of the Red River of the North and its tributaries for the purpose of determining what action should be taken to control floods and provide proper drainage in the areas through which such river and tributaries flow. The committee has been advised that this survey will be undertaken jointly by the United States and Canada.

INTERNATIONAL INFORMATION AND EDUCATIONAL ACTIVITIES

The budget estimate for this program for next fiscal year is in the amount of \$36,645,000 and the House allowed an appropriation of \$34,000,000. The total appropriation for the current fiscal year was \$47,300,000; however, this amount included nonrecurring items for the establishment of radio facilities and funds for the liquidation of prior contract authorizations to the extent of \$11,475,000 which resulted in an appropriation of approximately \$35,825,000 for the program. The committee recommends that an appropriation of \$32,700,000 be provided for this program for next fiscal year of which amount \$200,000 is to be used for the purpose of preserving friendships with the peoples of western European countries by means of radio broadcasts, said programs to be created and produced under the supervision and control of the Department by experienced private international broadcasting organizations.

PHILIPPINE REHABILITATION

The budget estimate for liquidation of contracts under the Philippine rehabilitation program is in the amount of \$13,000,000 which amount was allowed in full by the House. It is understood that the \$13,000,000 requested will be the last appropriation requested under existing legislation. It is doubtful whether the entire amount of the budget estimate will be needed during the next fiscal year. It is the judgment of the committee that an appropriation of \$10,000,000 will be sufficient to liquidate all contracts requiring payment during the year and accordingly an appropriation in the amount of \$10,000,000 is recommended by the committee.

THE INSTITUTE OF INTER-AMERICAN AFFAIRS

The committee recommends an appropriation of \$5,000,000 and contract authorization of \$7,000,000 for this program. The budget estimate is \$6,500,000 in appropriations and \$14,000,000 in contract authorization. The House allowed an appropriation of \$5,500,000 and no contract authorization. The amount of appropriation recom-

mended by the committee will permit the Institute to carry on during next fiscal year at approximately the current year level. In addition the contract authorization recommended will permit the launching of several new cooperative programs on a 3-year basis. Past experience of the Institute has repeatedly emphasized that it is difficult to carry on cooperative programs of this type on a 1-year basis, and that authority to enter into longer-term contracts is essential for full economy and efficiency of operations. The committee has also recommended that the Institute use \$767,500 of its funds for administrative expenses. The House had reduced this limitation to \$600,000.

DEPARTMENT OF JUSTICE

GENERAL ADM. STRATION

This appropriation finances the Office of the Attorney General, the Assistant to the Attorney General, the pardon attorney, the Board of Immigration Appeals, the Board of Parole, the Administrative Division, and the examination of judicial offices staff. The budget estimate is in the amount of \$2,240,000 and the House allowed an appropriation of \$2,175,000. The appropriation for the current year is \$2,092,671. The committee recommends an appropriation of \$2,125,000 which is a reduction in the House bill of \$50,000. It is not the intention of the committee that any of the personnel in these offices shall be reduced and it is expected that savings will be effected in other objects of expenditure to conform with the appropriation recommended.

GENERAL LEGAL ACTIVITIES

This appropriation finances the Office of the Solicitor General, the Office of the Assistant Solicitor General, the Tax Division, the Criminal Division, the Claims Division, the Customs Division and the Lands The budget estimate, including \$240,000 submitted to the Division. Senate in Senate Document 163, is \$7,815,000. The original estimate of \$7,575,000 was reduced by the House by \$275,000. Subsequent to the action of the House in approving an appropriation of \$7,300,000. the President transmitted to the Senate, an additional estimate in the amount of \$240,000; \$175,000 of the additional funds requested is for the employment of expert witnesses, appraisers, and commissioners by the Lands Division and \$65,000 for printing and binding. The committee recommends that an appropriation of \$7,475,000 be provided. The amount recommended consists of the \$7,300,000 approved by the House together with \$175,000 for expert witnesses, appraisers, and commissioners in the Lands Division. For many years the Department of Justice has returned to Congress for additional funds in deficiency acts to supplement appropriations to take care of contingencies that could not be anticipated and for work which could not be controlled by the Department. The estimate of \$175,000 for the Lands Division was submitted to the Senate following the adoption by the House of the antideficiency provision in the general appropria-tion bill. It may be that all of this additional \$175,000 will not be needed and the Department is instructed to exercise the utmost care in the disbursement of these funds.

ANTITRUST DIVISION

The budget estimate for this Division is \$3,988,000 and the House allowed an appropriation of \$3,850,000. The appropriation for the current year is \$3,830,171. The committee recommends an appropriation of \$3,750,000 which is a reduction of \$100,000 under the House bill. The committee looks with favor upon the operations of the Antitrust Division and feels that the recommended decrease will not impair their functions. It is not intended that the Antitrust Division should release any of its experienced personnel but on the contrary should effect economies in travel, other contractual services, supplies, equipment, and other objects of expenditure.

UNITED STATES ATTORNEYS AND MARSHALS

The budget estimate for this appropriation was \$12,797,000 and the House allowed an appropriation of \$12,600,000. Subsequent to the action of the House, the President transmitted to the Senate an additional estimate in the amount of \$347,000. The additional estimate consisted of \$72,000 for travel by United States marshals, \$110,000 for printing and binding, and \$165,000 for court reporting and fees of experts, consultants, and interpreters. The committee recommends an appropriation of \$12,847,000 which consists of the \$12,600,000 allowed by the House together with an additional amount of \$247,000. The additional estimate of \$347,000 was submitted to the Senate following the adoption in the House of the antideficiency provision in the general appropriation bill. The committee has been informed that under the antideficiency provision there will be a strict apportionment of funds and a department may not obligate in excess of the amount apportioned during any particular quarter. The character of the work in the Department is such that in many instances it is impossible to forecast accurately. For example, during the current year the Department has had, among others, such large cases as the Communist case, the Judith Coplon case, and the Hiss case, all of which were over and above the normal operations upon which the original estimates were based. In many instances United States attorneys and marshals are unable to control the volume of their work and are unable to control the volume of their expenditures such as the transportation and removal of prisoners, the service of process in private civil matters as well as Government cases, the employment of both expert and fact witnesses, and in many other cases. It is entirely possible that the additional \$247,000 approved by the committee will not be required and the Department is instructed to exercise the utmost care in the handling of this appropriation.

FEES AND EXPENSES OF WITNESSES

The original budget estimate for this appropriation was in the amount of \$1,100,000 and the House allowed an appropriation of \$1,000,000. Subsequent to the adoption in the House of the antideficiency provision in the general appropriation bill, the President transmitted to the Senate an additional estimate in the amount of

\$200,000. The committee recommends an appropriation of \$1,250,-000. This is an appropriation that is entirely uncontrollable by the Department. The Department acting in the public interest cannot postpone matters affecting the public safety and welfare and defer cases requiring the testimony of Government witnesses.

CLAIMS OF PERSONS OF JAPANESE ANCESTRY

The committee recommends an appropriation for this purpose of \$1,300,000, of which \$300,000 is for administrative expenses. The budget estimate was in the amount of \$5,304,800 and the House allowed an appropriation of \$4,000,000, of which \$250,000 would be available for administrative expenses. The committee has been advised that \$1,000,000 is approximately all that will be required during the next fiscal year for the payment of claims. The committee is anxious that these claims be processed and paid as expeditiously as possible since a great many of the claimants, considering their ages, otherwise would not receive awards in their lifetimes. It is for this reason the committee recommends that the amount available for administrative expenses be increased to \$300,000.

FEDERAL BUREAU OF INVESTIGATION

The committee recommends the full amount of the budget estimate of \$57,400,000 for the FBI. This amount will permit the employment of 324 additional special agents and 353 additional clerical employees. The committee has examined with great care all of the appropriations in this bill and has effected economies wherever possible. However the committee recognizes the vital role which the FBI plays in the welfare of our country in these critical times and feels it should have these additional employees in order to cope with the serious situation confronting the Nation today.

The House inserted language in the bill increasing the salary of Director John Edgar Hoover from \$16,000 to \$20,000 per annum. The committee is entirely in agreement with the House provision and recommends its approval by the Senate for this outstanding public servant.

IMMIGRATION AND NATURALIZATION SERVICE

The House approved an appropriation for the Immigration and Naturalization Service in the amount of \$31,400,000 which is a reduction of \$528,000 in the budget estimate. The committee recommends this same amount which is \$900,000 in excess of the current year appropriation. The amount recommended by the committee will allow the Service to continue all of its present personnel and in addition to open an office in Cuba. The committee was informed that the Department of State has issued waivers of documents for persons coming from Cuba who are Cuban nationals and who enter the United States for periods up to 29 days. Information furnished to the committee indicates that persons alleged to be Cubans are coming into the Miami office alone at the rate of approximately 15,000 per month. The committee was advised that there are estimated to be 100,000 Communists in Cuba, that there are approximately 8,000 to 9,000 Europeans from behind the iron curtain in Cuba, and that there are approximately a quarter of a million Europeans in Cuba. It was represented to the committee that the procedure which is now in practice is dangerous to the security of this country. Estimates have been made that there are approximately 50,000 Cubans illegally in the United States. The committee directs that the Immigration and Naturalization Service establish an office in Cuba where applicants for admission to the United States will be cleared by the Immigration and Naturalization Service. The Service is instructed by the committee to establish such an office and absorb the cost within the funds recommended.

FEDERAL PRISON SYSTEM

The budget estimate for salaries and expenses of the Federal prison system is \$22,230,000 and the House allowed an appropriation of \$21,730,000. The committee concurs in the recommendation of the House. The amount recommended is \$872,000 in excess of the appropriations for this purpose for the current fiscal year.

For the appropriation entitled "Buildings and facilities" the committee recommends an appropriation of \$800,000 together with contract authority in the amount of \$700,000. The budget estimate for cash is in the amount of \$1,740,000 and the budget estimate for contract authority is in the amount of \$1,200,000. The committee's recommendation is a reduction of \$100,000 below the amount allowed by the House. The estimate for this purpose includes a recommendation for \$750,000 for the replacement of the Federal jail at Anchorage, Alaska. The funds requested for replacement of this jail are not approved by the committee. The estimate also included \$365,000 in appropriations to replace the main power plant, a heating plant, and the farm heating system at the United States Penitentiary, Atlanta, Ga. At the instructions of the committee the officials of the Federal Bureau of Prisons explored the possibility of purchasing the power required at this penitentiary from the power generated at the Government's Allatoona Dam through the Georgia Power Co. The Bureau of Prisons subsequently advised the committee that power could be purchased through this source at a price closely approximating the cost of production when depreciation on generating equipment is taken into account.

It is for this reason that the reductions have been effected by the committee. The appropriation of \$800,000 and the contract authority of \$700,000 will permit the Bureau to proceed with its other construction items.

The House approved an amount of \$1,875,000 for support of United States prisoners which is a reduction of \$38,000 in the budget estimates. The committee concurs in the action of the House with respect to this appropriation.

The committee approves the budget estimate of \$715,000 for Federal Prison Industries, Inc. This is not an appropriation but an authorization to utilize \$327,000 of receipts for operation of Federal prison industries and \$388,000 of receipts for vocational expense.

69452-50-3

OFFICE OF ALIEN PROPERTY

For the Office of Alien Property, the committee recommends authorization to utilize \$4,150,000 of its receipts for administrative expenses. The House had recommended authorization to utilize \$4,240,000 of its receipts for this purpose. The budget estimate is in the amount of \$4,480,000. The amount authorized for this purpose during the current year is \$4,000,000. The committee also recommends language which would authorize the purchase of three passenger motor vehicles, for replacement only.

DEPARTMENT OF COMMERCE

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

The committee recommends an appropriation of \$1,400,000 for the Office of the Secretary. This is a reduction of \$130,000 in the budget estimate and is an increase of \$100,000 over the House bill. The appropriation for this office during the current year is \$1,299,000 but there is pending an additional appropriation of \$24,000 for pay increases. The committee recommends this small increase for the Office of the Secretary inasmuch as there has recently been transferred to the Department of Commerce such agencies as the Bureau of Public Roads and the United States Maritime Commission. The transfer of additional agencies to the Department results in additional supervision being necessary in the Office of the Secretary.

TECHNICAL AND SCIENTIFIC SERVICES

The committee recommends an appropriation of \$225,000 for the Office of Technical and Scientific Services. This is the same amount as allowed by the House and is a reduction of \$33,000 in the budget estimate.

BUREAU OF THE CENSUS

For the seventeenth decennial census, the committee recommends an appropriation of \$28,500,000 which is a reduction of \$1,000,000 below the House bill and a reduction of \$1,250,000 in the budget estimate. It is the judgment of the committee that the amount recommended will be sufficient for this purpose during the next fiscal year.

The House allowed an appropriation of \$109,000 for age and citizenship certification, \$6,000,000 for current census statistics, and \$898,000 for general administration. The committee concurs in the recommendations of the House with respect to these appropriations.

CIVIL AERONAUTICS ADMINISTRATION

SALARIES AND EXPENSES

The committee recommends an appropriation of \$99,775,000 for salaries and expenses of the CAA. This is an increase of \$2,775,000 over the amount allowed by the House and is a reduction of \$4,475,000

in the budget estimate. The appropriation for this purpose during the current year is \$94,402,105 and there is a pay act deficiency of \$600,000 pending. With the amount recommended by the committee, the CAA will be able to continue at about the same level. The committee is in agreement with the House in recognizing the importance of safety in air transportation. The committee recognizes the results derived from the promulgation and enforcement of safety regulations. However, this activity alone does not assure safety. Other activities of the CAA, including air traffic control, aids to air navigation, and airport services, together with the cooperative effort of the entire aviation industry, are required to assure the public's safety in air travel. The committee recommends a balanced aviation safety program among the several activities within this appropriation.

ESTABLISHMENT OF AIR NAVIGATION FACILITIES

The committee recommends an appropriation of \$27,500,000 and contract authorization in the amount of \$20,000,000. The budget estimate for the appropriation is in the amount of \$40,500,000 and for contract authority, \$29,461,500. The House allowed an appropriation of \$32,000,000 and contract authority in the amount of \$13,461,-500. Included in the \$32,000,000 appropriation allowed by the House is \$5,500,000 for program requirements and \$26,500,000 for liquidation of prior-year contract authorization. The \$5,500,000 allowed by the House for program requirements is approved by the committee; however, the amount recommended by the committee for liquidation of prior-year contract authorizations has been reduced to \$22,000,000 or a reduction of \$4,500,000. It is the judgment of the committee that \$22,000,000 will be sufficient to make all of the payments falling due during the next fiscal year.

TECHNICAL DEVELOPMENT AND EVALUATION

The committee recommends an appropriation of \$1,375,000 which is the same amount allowed by the House and which is a reduction of \$100,000 in the budget estimate. The amount recommended is a reduction of \$75,000 under the current-year appropriation.

WASHINGTON NATIONAL AIRPORT

For maintenance and operation of the Washington National Airport, the committee recommends an appropriation of \$1,300,000. While this amount is a reduction of \$55,000 in the budget estimate it is an increase of \$50,000 over the current-year appropriation. For construction at the airport, the committee concurs with the House that an appropriation of \$540,000 is sufficient. This amount is a reduction of \$1,050,000 in the estimate. The department request for \$1,050,000 for the construction of an overpass connecting the airport with United States Highway No. 1 and access road is denied by the committee.

FEDERAL-AID AIRPORT PROGRAM

The committee recommends an appropriation of \$37,000,000 and contract authority in the amount of \$36,700,000. The budget estimate is \$51,300,000 in appropriations and \$36,700,000 in contract authorization. The House allowed an appropriation of \$45,000,000 and contract authority in the amount of the budget estimate. With the exception of \$3,000,000 for administrative expenses, the balance of the cash appropriation requested is for the liquidation of contract authorizations. It is the judgment of the committee that the \$34,000,000 allowed for the liquidation of contract authority is sufficient for this purpose during the next fiscal year.

CONSTRUCTION OF PUBLIC AIRPORTS, ALASKA

The committee recommends the full amount of the budget estimate of \$3,200,000 for the construction of the public airports at Fairbanks and Anchorage, Alaska.

AIR NAVIGATION DEVELOPMENT

The budget estimate for this item is \$8,885,000 in appropriations and \$4,000,000 in contract authorization. The House allowed an appropriation of \$6,000,000 and contract authority in the amount of \$2,250,000. The committee concurs in the amounts allowed by the House. The committee recommends language authorizing the transfer of \$35,000 of the appropriation to the appropriation entitled "Salaries and expenses," CAA, for expenses including the maintenance and operation of aircraft.

CIVIL AERONAUTICS BOARD

The committee recommends an appropriation of \$4,000,000 for the CAB, which is an increase of \$600,000 over the House bill and a reduction of \$323,000 in the budget estimate. The comparable appropriation for the current fiscal year is \$3,670,500. Many urgent programs scheduled for action in 1951 would have to be abandoned under the amount allowed by the House. The committee feels this increase is justified in order to reduce the number of pending actions in all phases of the CAB activities. The committee further recommends language which would authorize the transfer to CAB from the Army, Navy, and Air Force of surplus aircraft, aircraft engines, parts, and accessories.

STUDY OF SEPARATION OF AIR MAIL PAY FROM SUBSIDY

The committee received considerable testimony with respect to an appropriation for a study which would result in legislation being recommended to the Congress on the subject of separate appropriations being made for air-mail pay as distinguished from air-mail subsidy. The subject of separation of air-mail pay and subsidy is a matter to be handled by the Senate Interstate and Foreign Commerce Committee. The committee is of the opinion that this subject is so involved that a study should be made and recommends that

adequate funds for this purpose be provided to the Senate Interstate and Foreign Commerce Committee.

COAST AND GEODETIC SURVEY

The committee recommends a total appropriation for this service of \$11,515,000. This figure consists of \$3,800,000 for departmental salaries and expenses, \$6,200,000 for field salaries and expenses and \$1,515,000 for pay and allowances of commissioned officers. These recommendations are identical with the amounts allowed by the House and represent a reduction of \$777,000 in the budget estimate.

BUREAU OF FOREIGN AND DOMESTIC COMMERCE

DEPARTMENTAL SALARIES AND EXPENSES

The committee recommends an appropriation for this purpose of \$5,300,000 which is an increase of \$300,000 over the House bill and a reduction of \$320,000 in the budget estimate. The comparable appropriation for the current fiscal year is \$5,045,500. The amount recommended by the committee will allow modest increases in the Office of Business Economics, the Office of Domestic Commerce and the Office of International Trade.

FIELD OFFICE SERVICE

The committee recommends an appropriation for the field office service of \$2,155,000 the budget estimate and an increase of \$105,000 over the House bill. The appropriation for the current fiscal year is in the amount of \$2,079,500. The amount recommended by the committee will permit the continuation of the existing field offices.

EXPORT CONTROL

The committee recommends an appropriation of \$2,000,000 for export control. This is the same amount that was allowed by the House and is a reduction of \$575,000 in the budget estimate. The appropriation for this purpose during the current year is \$4,550,000, of the amount allowed \$828,000 is for transfer to the Bureau of Customs, Treasury Department, for enforcement of the exportcontrol program.

PATENT OFFICE

For this appropriation the committee recommends \$11,530,000. This is an increase over the House of \$230,000 and a reduction below the budget estimate of \$230,000. During the past year, for the first time in several years, more patent applications have been disposed of than have been received. In order that this tempo will be maintained, the committee directs that no part of the reduction of \$230,000 shall be applied to cause a reduction in the number of patent examiners. The committee directs that the reduction be applied against such objects of expenditure as executive direction, staff and administrative direction and other overhead expenses. The committee feels that the real value of the Patent Office arises from the work done by the patent examiners and that this agency has an excessively high supervisory overhead.

BUREAU OF PUBLIC ROADS

The committee recommends an appropriation of \$412,100,000 for this Bureau. The amount consists of \$385,000,000 for Federal aid, postwar highway development, \$4,600,000 for elimination of grade crossings and \$22,500,000 for forest highways. The amount recommended is a reduction of \$43,800,000 in the budget estimate and a reduction of \$20,000,000 below the House bill. The reductions recommended by the committee will in no way impair the program. The larger part of the reduction, \$41,000,000, is in the item Federal aid, postwar highway development and it is made on the basis that payments to the States will not be as high as is estimated by the Bureau. The amount of \$385,000,000 which is allowed for this purpose is the same amount that is available for this purpose during the current fiscal year.

For elimination of grade crossings, the committee concurs in the recommendation of the House in an appropriation of \$4,600,000. For forest highways the unappropriated balances of authorizations as of June 30, 1950, amounts to \$44,900,000, and the committee recommendation of \$22,500,000 is slightly in excess of one-half of this amount. The budget estimate is in the amount of \$24,900,000.

The House approved language in the bill authorizing the Bureau of Public Roads to utilize not to exceed \$3,000,000 out of the administrative funds available to the Bureau for the construction of a laboratory at Langley, Va.

The committee does not concur in the recommendation of the House. It is not believed the construction of this laboratory should be undertaken at this time and accordingly the language has been deleted from the bill.

HIGHWAY NO. 6-UNFINISHED PORTION IN STATE OF UTAH

The committee called before it representative of the Roads Commission of the State of Utah and representatives of the Bureau of Public Roads in an effort to arrive at a solution to the problem of paving the balance of transcontinental Highway No. 6 which is paved throughout the United States except for a short distance in the State of Utah. The committee determined that in view of the basic formula for the allocation of funds to the States, it was not feasible to endeavor to earmark a portion of the Public Roads appropriation in this bill for that purpose. Accordingly the Senators and witnesses interested in this problem were requested to appear before the Public Works Committee of the Senate in order for the problem to be considered in connection with the current public roads authorization bill which is pending in that committee. It is the hope of the committee that a successful solution will be found to the problem.

NATIONAL BUREAU OF STANDARDS

OPERATION AND ADMINISTRATION

For this appropriation the committee recommends \$1,430,000, the budget estimate. This is an increase over the house of \$160,000. This appropriation provides funds for the general administration of the National Bureau of Standards, including not only the usual office

administration, but also the cost of operation and maintenance of buildings, grounds, and facilities. The Bureau had requested \$485,000 to start badly needed repairs to the plumbing, heating, and piping systems. The need for these repairs was emphasized by an explosion which occurred on May 2 in the refrigeration plant. The failure of this equipment has required the discontinuance of tape calibrations for the Coast and Geodetic Survey, the Inter-American Geodetic Survey, and other agencies until other suitable facilities can be provided, and has required the low-temperature laboratory to purchase liquid nitrogen commercially in order to continue in operation.

RESEARCH AND TESTING

The budget estimate for research and testing is in the amount of \$4,729,000 and the House reduced this figure to \$4,300,000. The committee concurs in the action of the House and recommends an appropriation of \$4,300,000. The committee feels that none of the reduction should be applied to the Bureau's Commodity Standards Division and directs that this important work be kept at its current level. The Commodity Standards Division performs work which is very valuable to private business. The work involves cooperative work with industry groups for the development of commercial standards for manufactured goods for voluntary adoption by business.

RADIO PROPAGATION AND STANDARDS

The committee recommends an appropriation for this purpose of \$3,000,000 which is a reduction of \$150,000 in the estimate and a reduction of \$100,000 below the House bill. The appropriation for this purpose for the current fiscal year is \$3,100,000; however, \$85,000 of this amount was not used and was transferred to other appropriations of the Bureau to take care of pay increases granted by Congress.

CONSTRUCTION OF LABORATORIES

The budget estimate for this purpose consisted of \$700,000 in appropriations and \$5,675,000 in contract authorizations for the construction of a radio laboratory building at a total estimated cost of \$4,475,000 and a guided missiles laboratory building at a total cost of \$1,900,000. The House approved the construction of the twobuildings and recommended an appropriation of \$500,000 and contract authority in the amount of \$5,675,000. The committee does not recommend the construction of the radio laboratory building at the present time and accordingly the funds and language included in the bill for this building have been deleted. With reference to the guided missiles laboratory building, the committee recommends an appropriation of \$134,000 and contract authority in the amount of \$1,766,000.

WEATHER BUREAU

The committee recommends an appropriation for the Weather Bureau of \$24,897,000 which is an increase of \$450,000 over the House bill and a reduction of \$1,203,000 in the budget estimate. The comparable appropriation for the current fiscal year is in the amount of \$24,534,000. The committee has also included language in the bill authorizing the hiring of employees without regard to the Classifica-

George C. Marshall Foundation, Lexington, Virginia

tion Act of 1949 for the conduct of meteorological investigations in the Arctic region.

GENERAL PROVISIONS

The House inserted under section 1113 a provision authorizing the Secretary of Commerce to terminate the employment of any officer or employee of the Department whenever he deems such termination necessary or advisable in the best interest of the United States.

The committee endorses the provision and wishes to point out that this provision should also apply to the Maritime Commission transferred to the Department of Commerce before the enactment of this appropriation act.

THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

The committee recommends an appropriation of \$915,000 which is the same amount allowed by the House and which amount is \$8,100 below the budget estimate. The committee was advised that provision has been made for each Justice, except one, to have two law clerks. It was not known whether this Justice desired another law clerk. The committee approves an additional law clerk for this Justice in the event he desires one and the cost can be absorbed from the estimates submitted for other objects of expenditure.

COURT OF CUSTOMS AND PATENT APPEALS

The committee recommends an appropriation of \$192,200 for this court which amount is the budget estimate and the amount allowed by the House.

CUSTOMS COURT

For the Customs Court, the committee recommends an appropriation of \$411,465, which is a reduction of \$10,085 in the budget estimate and a reduction of \$6,000 under the House bill. The amount recommended by the committee is approximately \$6,000 over the appropriation for the current year.

COURT OF CLAIMS

SALARIES AND EXPENSES

The committee recommends an appropriation of \$575,000 for salaries and expenses of the court. This amount is a reduction of \$12,000 in the budget estimate and a reduction of \$12,000 under the House bill. The amount recommended represents an increase of \$65,000 over the current year appropriation.

REPAIRS AND IMPROVEMENTS

The committee recommends an appropriation for this purpose of \$140,700 which is a reduction of \$109,500 in the budget estimate and an increase of \$130,000 over the House bill. The additional \$130,000 recommended by the committee is for reconstruction and additions

George C. Marshall Foundation, Lexington, Virginia

to the rear building of the court. The committee was advised that additional space would enable the court to have earlier hearings and disposition of cases, some of which bear interest against the Government.

OTHER COURTS AND SERVICES

The committee recommends an appropriation of \$20,941,800 for other courts and services. This is a reduction of \$494,550 in the budget estimates and a reduction of \$193,500 under the House bill. The committee effected several minor reductions which should cause no inconvenience to the courts. The appropriation for this purpose for the fiscal year 1950 is in the amount of \$19,514,400.

COMPLIANCE WITH SENATE RESOLUTION 95 AGREED TO AUGUST 27, 1949

PENDING BILL

EXISTING LAW

On page 43:

Provided further, That the compensation of the Deputy Under Secretary for Administration shall be \$17,500 per annum so long as the position is held by the present incumbent

On page 80: : Provided, That the Departments of the Army, Navy, and Air Force are authorized to transfer to the Civil Aeronautics Board without charge, subject to the approval of the Bureau of the Budget, aircraft (for replacement only), aircraft engines, parts, and accessories surplus to the needs of such Departments

On page 94:

and such employees may be appointed without regard to the Classification Act of 1949

PUBLIC LAW 359, EIGHTY-FIRST CONGRESS

SEC. 5. The rate of basic compensa-tion of * * * the Deputy Under Secretaries of State * * * shall be Secretaries of State \$15,000 per annum.

PUBLIC LAW 152, EIGHTY-FIRST CONGRESS, FIRST SESSION

SEC. 202. (e) Transfers of excess property between Federal agencies (except transfers for redistribution to other Federal agencies or for disposal as sur-plus property) shall be at the fair value thereof, as determined by, or pursuant to regulations of, the Administrator, unless such transfer is otherwise authorized by any law approved subsequent to June 21, 1944, to be without reimbursement or transfer of funds.

PUBLIC LAW 429, EIGHTY-FIRST CONGRESS, FIRST SESSION

SEC. 1105. (b) With respect to any position which, immediately prior to the date of enactment of this Act, is not subject to the Classification Act of 1923, as amended (including positions in grade 9 of the professional and scientific service or in grade 16 of the clerical, admin-istrative, and fiscal service referred to in section 13 of such Act), but to which this Act applies, this Act shall take effect on a date specified by the Com-mission, but not later than the first day of the first pay period which begins after six months following the date of enactment of this Act.

INCREASES

The increases recommended by the committee in the amounts of chapter III of the House bill are as follows:

Department of State:	
Salaries and expenses	\$1,000,000
Representation allowance, Foreign Service	225,000
American sections, International Commissions	
Total increases, Department of State	1, 325, 000
Department of Justice:	1011
Salaries and expenses, general legal activities	175,000
Salaries and expenses, United States attorneys and marshals	247,000
Fees and expenses of witnesses	250, 000
Total increases, Department of Justice	672, 000
Department of Commerce:	
Office of the Secretary, salaries and expenses	100,000
Civil Aeronautics Administration, salaries and expenses	2, 775, 000
Civil Aeronautics Board	600, 000
Bureau of Foreign and Domestic Commerce:	
Departmental salaries and expenses	300, 000
Field Office Service	105,000
Patent Office	230,000
National Bureau of Standards, operation and maintenance	160,000
Weather Bureau	450, 000
Total increases, Department of Commerce	4, 720, 000
The Judiciary:	
Court of Claims, repairs and improvements	130, 000

DECREASES

The decreases recommended by the committee in the amounts of chapter III of the House bill are as follows:

Department of State:	
Foreign Service retirement and disability fund	\$2, 233, 000
Buildings fund	3,000,000
Emergencies in the diplomatic and consular service	700,000
Contributions to international organizations	1, 425, 230
Missions to international organizations	100,000
International contingencies	200,000
International Boundary and Water Commission, United	200,000
States and Mexico, construction	2, 035, 000
International information and educational activities	1, 300, 000
	3, 000, 000
Philippine rehabilitation Institute of Inter-American Affairs	500,000
Institute of Inter-American Analis	500, 000
Total decreases, Department of State	14, 493, 230
Department of Justice:	
Salaries and expenses, general administration	50,000
Salaries and expenses, anti-trust division	100,000
Claims of persons of Japanese ancestry	2, 700, 000
Federal Prison System, buildings and facilities	100, 000
Total decreases, Department of Justice	2, 950, 000

George C. Marshall Foundation, Lexington, Virginia

DECREASES—Continued

Department of Commerce: Bureau of the Census, Seventeenth Decennial Census	\$1, 000, 000
Civil Aeronautics Administration: Establishment of air navigation facilities Federal-aid airport program Bureau of Public Roads	4, 500, 000 8, 000, 000 20, 000, 000
National Bureau of Standards: Radio propagation and standards Construction of laboratories	$\begin{array}{c} 100,000\\ 366,000 \end{array}$
Total decreases, Department of Commerce	33, 966, 000
The Judiciary: Customs Court, salaries and expenses. Court of Claims, salaries and expenses. Salaries of clerks. Salaries of criers. Miscellaneous expenses. Travel expenses. Administrative Office, salaries and expenses. COMPARATIVE TABLE SHOWING OVER-ALL ACTION ON CHAPTER IV

56

GENERAL APPROPRIATION BILL, 1951

GENERAL STATEMENT

The bill provides in chapter IV a total of \$2,760,305,360 for the regular annual 1951 appropriations of the Treasury and Post Office Departments. Of this sum the committee recommends \$552,805,360 for the Treasury Department, and \$2,207,500,000 (the House allowance) for the Post Office Department.

Percentagewise the total amount proposed is 0.2 percent over the House allowance, 1.9 percent under the 1951 estimates, and 5.7 percent in excess of the 1950 appropriations.

The committee recommends \$27,665,000 in total authorizations for expenditures of corporate funds. Of this amount, there is approved the House allowance of \$965,000 for the Export-Import Bank of Washington and \$26,700,000 for the Reconstruction Finance Corporation.

Although the bill does not carry the so-called permanent indefinite appropriations, the 1951 estimates in this category approximate \$5,645,331,615, and included in this sum is \$5,625,000,000, for payment of interest on the public debt. The 1951 estimate of \$4,177,268,818 for trust funds is likewise not reflected in the bill. For a detailed breakdown of items comprising the 1951 estimates for trust funds, as well as for permanent indefinite appropriations payable from general and special funds of the Treasury, see table at end of this chapter.

TREASURY DEPARTMENT

The committee has approved the sum of \$552,805,360 to cover 1951 operating expenses of various bureaus within the Treasury Department. This sum exceeds the House allowance by \$6,200,360, or 1.1 percent; is below the 1951 estimates by \$24,880,740, or 4.3 percent; and exceeds the total 1950 appropriations by \$44,298,860, or 8.7 percent. Of particular interest is the fact that over 85 percent of the increase over the House allowance concerns additional fund requirements of the Bureau of Engraving and Printing, to provide \$435,000 for print of urgently needed currency, \$900,000 to meet wage-board increases granted pursuant to law to unclassified employees, and \$3,964,000 to defray costs for replacing six Coast Guard aircraft. This latter amount will provide the full budget estimate of \$12,629,000 for replacing of 29 aircraft, as the House allowance of \$8,665,000 permitted the replacement of 23 aircraft.

BUREAU OF CUSTOMS

The committee has approved an increase of \$306,360, over the House allowance of \$36,500,000, or a total of \$36,806,360. The additional allowance will provide \$148,860 needed to maintain the present personnel strength, and \$157,500 to permit the filling of 45 of the 93 new positions requested in the 1951 budget. Testimony presented to the committee shows that increased imports have imposed a workload 6 percent above the 1949 levels, with an additional 10percent rise anticipated in 1951. Customs receipts also show a 10-percent increase in the period July 1, 1949, to June 28, 1950, as compared to the same period in the prior year.

George C. Marshall Foundation, Lexington, Virginia

BUREAU OF INTERNAL REVENUE

The committee has approved the House recommendation which allowed funds for 1,000 additional enforcement officers. This increase will provide since 1949 a total of 7,000 additional personnel, as about 2,000 were added in 1949, and 4,000 were added in the current fiscal year. Testimony presented to the committee shows that new agents produce in their first year of employment an average return of \$8 to \$1 expended, and those new agents with over 1 year's experience average about \$20 in additional revenue as against \$1 expended.

BUREAU OF NARCOTICS

For the Bureau of Narcotics there has been approved an increase of \$158,000 over the house allowance of \$1,750,000, or a total appropriation of \$1,908,000. The additional sum will permit the employment of eight new agents over the House allowance of four, and will restore to \$150,000 the amount urgently needed to purchase evidence. The Bureau has had only slight increases of personnel over the past several years even though narcotic problems and the workload have grown to prewar level.

SECRET SERVICE DIVISION

The committee recommends an increase of \$150,000 over the House allowance of \$2,100,000, or a total of \$2,250,000 for the Secret Service Division. The additional sum is \$50,000 below the budget estimate but will provide sufficient funds for the filling of about 19 of the 25 positions reduced by the House and for other related obligations such as for travel expenses, costs for new vehicles, radio equipment, and miscellaneous supplies and materials all urgently needed to reduce the backlog of over 19,000 cases pending investigation.

COAST GUARD

For the appropriation, "Acquisition, construction, and improvements," the committee has provided an increase of \$3,964,000 over the House allowance of \$15,000,000 or a total of \$18,964,000. The increase will permit the replacement of 6 aircraft which added to the 23 allowed by the House will provide for the replacement of 29 aircraft estimated to cost \$12,629,000. In connection with the replacement program the committee directs that all funds received from sale of old aircraft be deposited into the Treasury as miscellaneous receipts, and that future justifications submitted to the committee include a comprehensive statement of such transactions.

The committee has approved the House allowance of \$1,000,000 to inaugurate the Reserve training program. Because of the specialized duties of the Reserve and the desirability of training younger personnel who present an important potential value in times of emergency, the committee urges that careful selection be made of its membership. It realizes of course the importance of having some personnel in the Reserve who because of previous or present membership possess certain knowledge and experience vitally needed in the training program.

The justifications for the 1952 Reserve training program should contain a complete plan of operations with particular emphasis placed on port security.

POST OFFICE DEPARTMENT

The committee recommends a total appropriation of \$2,207,500,000 for 1951 operating expenses of the Post Office Department. This amount, distributed under four new appropriation titles, is \$28,193,000 under the 1951 estimates and \$105,309,500 over the 1950 appropriations, excluding from the latter about \$135,000,000 in pending deficiencies.

The committee also recommends deletion of the \$401,500,000 postal deficiency language limitation which places a ceiling on the amount that may be advanced from general funds of the Treasury, such amount representing the difference between the 1951 total appropriations recommended in the bill and the total estimated postal revenues available for expenditure. The committee realizes there is real merit to the objectives attempted by the limitation. The limitation, in its present form, is based on the continuance into 1951 of the current year's estimated postal revenues of \$1,681,000,000, provided under existing legislation, plus about \$125,000,000 additional revenue estimated to be derived from legislation pending in H. R. 2945 (a bill to increase certain postal rates), and the savings brought about through House reductions of \$28,107,000 from the 1951 regular appropriation estimates. From a practical standpoint, the deficiency limitation appears to be inoperative in that it is not possible to definitely determine in advance the total postal revenues available for appropriation in the fiscal year 1951. In other words, the postal revenues, plus the cash amount to be withdrawn from the Treasury, may not provide a sum equal to the total approved in the four operating appropriations.

Likewise, it is considered impractical to definitely determine the total expenditures for fiscal year 1951 in view of the continuing increase in volume of mail, and the costs attributed to new or pending legislation. Since committee consideration of the 1951 postal budget, the Congress has passed additional pay legislation which, it is estimated, will increase expenditures by approximately \$31,000,000. This sum will increase the postal deficiency as no provision is made to raise this amount through the medium of increased postal revenues.

However, if the postal revenues for the fiscal year ending June 30, 1951, are increased by legislation hereafter adopted, the additional revenue derived from such legislation will necessarily result in a reduction in the amount to be appropriated out of the Treasury of the United States. It is also worthy to note that a major portion of postal expenditures are items over which the Postmaster General has no control. To illustrate, approximately 74 percent of expenditures is for payment of salaries, the cost of which has increased \$750,000,000 by legislation enacted since July 1945, 22 percent involves costs for transportation of mail by rail and aircraft, the costs of which are fixed by the Interstate Commerce Commission and the Civil Aeronautics Board, respectively, and the balance, or 4 percent, relates to miscellaneous costs for rents, utilities, and other charges.

miscellaneous costs for rents, utilities, and other charges. The Postmaster General advised the committee that about \$70,000,000 would be saved in 1951 operating costs as the result of his order to curtail certain postal services effective not later than July 1, 1950. The reduction of \$28,107,000 made by the House, even if restored by this committee, would be insufficient to fully pay the costs of the curtailed service if restored, since the Bureau of the

Budget, and not the Congress, had previously reduced by \$42,000,000 the Department's original estimate of 1951 fund requirements.

The committee has disapproved the \$86,000 supplemental estimate requested in Senate Document 159, to cover salary payments for 21 additional employees in the Bureau of Facilities (formerly the Office of the Fourth Assistant) and recommended payable from the appropriation "General administration."

The changes in the amounts of the House bill recommended by the committee are as follows:

INCREASES AND LIMITATIONS

TITLE I-TREASURY DEPARTMENT

Office of Administrative Services:

Salaries The committee recommends an increase of \$47,000 over the House allowance of \$1,160,000, or a total of \$1,207,000. The additional sum restores the House reduction which would have eliminated 16 employees from the total number engaged in servic-ing four Treasury buildings. In the past 3 years this office has undergone personnel reductions amounting to \$170,450.

Miscellaneous expenses_

The committee recommends an increase of \$8,500 over the House allowance of \$300,000, or a total of \$308,500. The additional sum will permit replace-ment of worn-out equipment urgently needed to maintain the required level of operations.

Total, Office of Administrative Services____

Bureau of Accounts, salaries and expenses_____

The committee recommends an increase of \$334,000 over the House allowance of \$1,875,000, or a total of \$2,209,000. The additional sum will provide \$44,000 for continuance of the staff engaged in reporting and improving accounting methods, in collaboration with the Comp-troller General and the Director of the Bureau of the Budget, and \$290,000 requested in S. Doc. 158 to meet additional costs of the Federal Reserve banks for handling tax deposits.

Bureau of the Public Debt, distinctive paper_____

The committee recommends an increase of \$100,000 The committee recommends an increase of \$100,000 over the House allowance of \$1,745,000, or a total of \$1,845,000, The proposed allowance which includes \$145,000 transferred by House action from the appro-priation "Administering the public debt" will permit the purchase of 123,159,000 sheets, or an increase of about 8,160,000 sheets over the number allowed by the House.

Bureau of Customs, salaries and expenses	306, 360
Bureau of Narcotics	158,000
Bureau of Engraving and Printing	1, 335, 000

The committee recommends an increase of \$1,335,000 over the House allowance of \$15,500,000, or a total of \$16,835,000. The additional sum will defray the pay costs of unclassified personnel, and other costs relating to the manufacture and delivery of about 5,000,000 more sheets of United States currency to the reserve stock which is at a low level and inadequate to meet estimated currency redemptions.

TITLE I—TREASURY DEPARTMENT—Continued

Secret Service Division, salaries and expenses	\$150,000
Coast Guard—acquisition, construction and im- provements	3, 964, 000
Total increase, Treasury Department	6, 402, 860

TITLE III—GOVERNMENT CORPORATIONS

RECONSTRUCTION FINANCE CORPORATION

Administrative expense limitation:

The committee recommends that not to exceed \$26,700,000, or an increase of \$700,000 over the House allowance of \$26,000,000 of corporate funds shall be available for administrative expenses during the fiscal year 1951. The \$700,000 additional sum will provide \$300,000 for payment to Federal Reserve banks for custodial and fiscal services, and the balance, \$400,000 to restore the greater portion of the House reductions made in personal services and other obligations.

The committee also recommends that in the vehicle limitation the number be increased from 20 to 61, or an increase of 41. Testimony shows that 21 of the 41 vehicles requested will replace cars that have been driven over 100,000 miles. The 41 vehicles are needed because of the 1951 estimated increases over 1950 of 28 percent in the number of business loans and about 75 percent in the number of mortgages.

DECREASES AND LIMITATIONS

TREASURY DEPARTMENT

Recoinage of silver coins_____

The committee recommends deletion from the bill of the following provision as recent legislation contained in Public Law 509, approved May 10, 1950, makes the silver-profit fund available for costs heretofore payable from the appropriation for recoinage of silver coins:

RECOINAGE OF SILVER COINS

For reimbursement of the Treasurer of the United States for the difference between the face value of subsidiary silver coins of the United States and the amount the same will produce in new coins, \$150,000.

Bureau of Internal Revenue_____

The committee has approved the request contained in S. Doc. 175, for a decrease of \$52,500 in the 1951 budget estimate submitted in the amount of \$253,000,000 for the Bureau of Internal Revenue. The decrease is due to the termination of the administration of the tax on oleomargarine, under Public Law 459, approved March 16, 1950.

10

GENERAL APPROPRIATION BILL, 1951

1

DEPARTMENT OF LABOR

The total amount recommended in the bill for the Department of Labor is \$208,573,100, which is an increase of \$16,839,347 over the 1950 appropriation, and a decrease of \$11,441,600 under the budget estimates, and the amount recommended is unchanged from that allowed by the House.

The principal items of increase, in comparison with 1950 appropriations, are \$10,500,000 in grants to States for administration of the employment service and the unemployment compensation programs, and \$4,005,300 for the Wage and Hour Division, principally because of the extensive amendments to the Fair Labor Standards Act. The principal items of decrease, compared with the budget estimates, are \$9,500,000 for grants to States and \$1,190,600 for the Wage and Hour Division.

OFFICE OF THE SOLICITOR

The committee favorably reports an amendment—the only change recommended for the Department of Labor—to authorize a salary of \$14,000 for the Solicitor.

There were numerous requests, official and unofficial, presented for salary increments arising from the application of the Classification Act of 1949, in which 400 positions were authorized to be placed in the 3 supergrades. The committee felt that such requests should be ignored in the absence of compelling reasons for correction of a gross inequity. The position of Solicitor of the Labor Department, in the considered judgment of the committee, falls within this class.

In the conference report on the wage and hour amendments, House Report No. 1453, the conferees stated that they felt the Solicitor of Labor should receive a salary equal to that of the Administrator of the Wage and Hour Division, set at \$15,000 in the amendments, and unanimously recommended that he be given the highest grade under the Classification Act, then pending. The committee was advised that the Secretary of Labor recommended the position for the top grade, and gave it the highest priority. The recorded views of the congressional committees were ignored and the position was placed in grade GS-17. The amendment offered by the committee will provide for this position the salary provided in the Classification Act for grade GS-18.

BUREAU OF EMPLOYMENT SECURITY

Grants to States.—The committee considered budget estimates for \$171,000,000 and for a contingency reserve of \$17,000,000, a total of \$188,000,000, which was \$20,000,000 more than the 1950 appropriation. After careful consideration of a request for partial restoration of the reduction effected by the House, the committee recommends no increase and deems the House allowance to be adequate. Cognizance was taken of the fact that there was being used for administrative expenses only two-thirds of the revenue derived from the 0.3 percent Federal tax, against which no credit may be taken for payment under State laws, and which tax was assessed to "be used for payment of the expenses of administration by the Federal and State governments."

72

FEDERAL SECURITY AGENCY

The total amount recommended in the bill for the Federal Security Agency is \$1,594,005,010, which is an increase of \$211,823,678 over 1950 appropriations, a decrease of \$42,014,590 below the budget estimates, and an increase of \$2,220,420 over the House allowance. The principal items of increase, in comparison with 1950 appropriations, are \$60,000,000 for liquidation of contractural obligations in connection with the hospital construction program, and \$142,000,000 for grants to States for public assistance. The principal items of decrease, in comparison with the budget estimates, are \$25,000,000 in liquidation cash for the hospital construction program, and \$9,510,000 for general assistance to States, and \$3,457,240 for vocational educational grants, and \$2,400,000 for vocational rehabilitation grants.

Attention is directed to the fact that of the budget estimates, approximately 1.5 billion dollars is for grants, subsidies, and contributions, of which 1,347 million dollars is in the category offtimes referred to as "irreducible"—1,200 million dollars for public assistance, 100 million dollars for hospital construction liquidation, and 25 million dollars for the employees' compensation fund, and 22 million dollars for maternal and child welfare—and the remaining is for such accepted programs as vocational education, vocational rehabilitation, and public health grants.

The committee considered numerous requests for restoration of House reductions. But aside from the 11 increases and 2 decreases, it was felt that the amounts allowed by the House were adequate.

FOOD AND DRUG ADMINISTRATION

The committee received, after passage of the bill by the House, a supplemental estimate for \$900,000 for oleomargarine inspection and enforcement. The committee recommends \$600,000 for this purpose which it deems to be adequate for the inauguration of this program.

OFFICE OF EDUCATION

Consideration was given to allowing the full budget estimate for vocational education grants. The view of the committee was sympathetic—the program is considered to be one of the most constructive—but in view of the fact that the Government is operating on borrowed funds it was felt that an increased appropriation must be put aside until a more propitious time.

Salaries and expenses.—The committee recommends an increase of \$123,420 to permit the Office to maintain its staff and operations at the 1950 level.

PUBLIC HEALTH SERVICE

The committee recommends for the Public Health Service appropriations totaling \$270,779,030, which is an increase of \$70,920,679 over 1950 appropriations, a decrease of \$32,748,870 below the budget estimates, and an increase of \$1,306,000 over the amounts allowed by the House. The principal items of increase, in comparison with 1950 appropriations, are \$60,000,000 for liquidation cash for the hospital, construction program, and \$11,000,000 for the National Institutes of Health, National Cancer Institute, National Heart Institute, and mental health activities. The principal items of decrease, in comparison with the budget estimates, are \$25,000,000 for liquidation cash for the hospital-construction program and \$9,510,000 for general assistance to States.

The Public Health Service program, particularly that part of it dealing with cancer, heart disease, and mental health, is one with which the committee is in full accord, and the modest sums provided for the betterment of our health standards and to combat the ravages of diseases seem paltry in comparison with funds provided for other purposes. The committee is cognizant of the work to be done, and the benefit to be derived in connection with additional research in the fields in which the Public Health Service has launched studies. But in view of the fiscal condition confronting the country, with an impending deficit of several billion dollars for the current fiscal year, and one of an undetermined amount for fiscal 1951, the committee has accepted the amounts allowed by the House, except for the two items for which decreases are recommended and the five items for which increases are recommended.

Venereal diseases.—The committee recommends \$14,500,000, a decrease of \$400,000 under the House allowance, but \$500,000 above the budget estimate and \$1,418,961 below the 1950 appropriation. It is felt that the amount recommended will enable the program to continue as an adequate safeguard against the spread of venereal diseases, aided by the developments heretofore achieved in its detection and treatment.

Tuberculosis.—The committee recommends \$9,600,000, the budget estimate, but \$400,000 below the House allowance and \$4,005 below the 1950 appropriation. This amount is adequate in the view of the committee to continue the work with respect to early detection and treatment of this disease.

Salaries and expenses, hospital and construction service.—The committee recommends \$2,107,000, which is \$750,000 more than allowed by the House and \$974,743 more than the 1950 appropriation, but \$700,000 below the budget estimate. This increase recommended is allowed for grants for research, experiments, and demonstrations, authorized by the Hill-Burton Act amendments, Public Law 380, Eighty-first Congress, approved October 25, 1949.

National Cancer Institute.—The committee recommends \$20,686,000, an increase of \$600,000 over the House allowance, and for grants for research. The amount recommended is \$1,685,514 over the 1950 appropriation and \$600,000 above the budget estimate.

Mental health activities.—The committee recommends \$10,000,000, an increase of \$56,000 over the House allowance, \$1,401,110 over the 1950 appropriation, and \$56,000 over the budget estimate. The increase is provided for additional research grants.

National Heart Institute.—The committee recommends \$14,750,000, an increase of \$600,000 over the House allowance, \$3,938,500 over 1950 appropriations, and \$600,000 over the budget estimate. The increase recommended is for additional research grants.

Dental health activities.—The committee recommends \$2,140,000, an increase of \$100,000 over the House allowance, \$232,000 over the 1950 appropriations, and the amount of the budget estimate.

George C. Marshall Foundation, Lexington, Virginia

Construction of research facilities.—The committee recommends a language change, which will authorize the Surgeon General to convey to the Bethesda Fire Department, a corporate entity, a plot of ground and to pay one-third, but not more than \$20,000, of the cost of constructing a fire station, in return for which the Bethesda Fire Department will furnish fire protection to the National Institutes of Health. The alternative is for the Public Health Service to install a fire station in one of its auxiliary buildings, to be equipped at a cost of approximately \$50,000 and to cost at least \$35,000 a year to operate.

Construction of Arctic Health Institute.—The committee considered the budget estimate for \$975,000 appropriation and \$6,325,000 contract authority to build the Arctic Health Institute. The committee recognizes the need for this Institute and directs the Public Health Service to continue its study of the proper plans and methods to effectuate the proposed program.

Salaries and expenses, St. Elizabeths Hospital.—The committee recommends \$2,005,000, an increase of \$57,000 over the House allowance, \$185,000 over 1950 appropriations, but \$18,000 under the budget estimate. The committee recommendation would result in an over-all reduction of approximately \$100,000 in amounts available for obligation inasmuch as the reimbursements received are gaged to the amounts allowed for care of Federal patients, and patients for whose care reimbursements are made comprise approximately 82 percent of the total patient load.

SOCIAL SECURITY ADMINISTRATION

Salaries and expenses, Bureau of Federal Credit Unions.—The committee recommends \$300,000, an increase of \$100,000 over the House allowance, \$100,000 more than 1950 appropriations, and \$75,000 below the budget estimate. In addition the Bureau is authorized to use the fees to be collected from credit unions for charter, supervision, and examination services, estimated to be \$349,300. The Bureau is directed to formulate and execute plans with more dispatch than has thus far been displayed to achieve a program more nearly selfsustaining.

Salaries and expenses, Bureau of Old-Age and Survivors Insurance (trust account).—The committee recommends a language change, authorizing the Bureau to expend not more than \$404 for certain library memberships for its legal staff to enable them to utilize legal library services, necessary in the conduct of the program. Heretofore this authority has appeared in a general provision, but it was stricken in the House on a point of order. The alternative is for the Bureau to establish and maintain its own legal library, at much greater cost. Salaries and expenses, Children's Bureau.—The committee recom-

Salaries and expenses, Children's Bureau.—The committee recommends \$1,510,000, an increase of \$10,000 over the House allowance, \$44,000 over 1950 appropriations, but \$12,300 under the budget estimate. The amount recommended will permit the Bureau to continue its staff and program at the 1950 level.

OFFICE OF THE ADMINISTRATOR

Salaries, Office of the General Counsel.—The committee recommends \$535,100, \$24,000 more than the House allowance, \$80,032 more than 1950 appropriations, but \$32,000 below the budget estimate. The increase, in comparison with the House allowance, is recommended for the General Counsel's participation in the oleomargarine inspection and enforcement arising from the amendments to the Pure Food and Drug Act, and for which estimates were received by the Senate after passage of the general appropriations bill by the House.

The committee recommends the insertion in the general provisions, on page 162, of a section authorizing travel expenses and attendance at meetings. Heretofore this section has appeared in the annual appropriation bills, but was stricken on a point of order in the House. This activity is necessary and the committee has the assurance from the Agency that proper safeguards will be observed.

NATIONAL LABOR RELATIONS BOARD

The committee recommends \$8,615,000, an increase of \$65,000 over the House allowance, a like increase over the 1950 appropriations, and the amount of the budget estimate. The committee feels that the Board has done an excellent administrative job and is reluctant to allow less than the budget estimate in view of the growing cases to be administered.

Compliance with Senate Resolution 95 agreed to August 27, 1949.

PENDING BILL

EXISTING LAW

On page 129:

Provided, That the compensation of the Solicitor shall be \$14,000 per annum

SEC. 302. (a) Each position shall be placed in its appropriate class. * * Sec. 302. (b) Each class shall placed in its appropriate grade. * * (Public Law 429, 81st Congress.) be

On page 152:

Provided, That the Surgeon General is authorized to convey by quitclaim deed upon such terms and conditions as he may prescribe not to exceed twenty-five the absence of which expressed authority thousand square feet of land presently included in the site of the National Insti-tutes of Health to the Bethesda Fire Department, a body corporate of the State of Maryland, for the purpose of erecting and maintaining a fire station to provide pro-tection for the facilities of the National Institutes of Health and for the adjacent community: Provided further, That such terms and conditions may include an agreement by the Surgeon General to pay to such department on behalf of the United to such department on behalf of the United States 33½ per centum of the cost of the construction of the station but not to exceed \$20,000, to be charged to the maximum limits of costs set out in this paragraph

Note.- This provision is not amendatory but comprises new legislation in the form of authority to convey land, in the land could not be conveyed.

¹ Includes budget amendments of \$2,355,000 for "Control of emergency outbreaks of insect and plant diseases" and \$1,993,500 for "Forest Pest Control Act" requested in H. Doc.
 No. 495 and deferred by House committee to 1952 estimates.
 ² From revolving funds in Office of Secretary of the Treasury.
 ³ Authority to REA for additional \$150,000,000 as required is provided for 1950 and 1951.

SUPPLEMENTAL ESTIMATES

Supplemental estimates considered by the committee are contained in House Documents Nos. 457 and 495 and in Senate Documents Nos. 161 and 170.

RESEARCH AND MARKETING ACT OF 1946

The committee recommends a change in language in order to distribute \$5,000,000 for section 9 funds to the appropriation for "Office of Experiment Stations" in line with the action of the House in distributing \$5,000,000 for section 10 (a) and \$3,000,000 for section 10 (b) funds to the various bureaus. No change in the amounts appropriated are recommended. The effect will be that all funds for title I are distributed to the bureaus, leaving \$6,000,000 for title II in the appropriation item, to cover research on distribution and marketing.

With reference to the limitation on work relating to fish or shellfish except for the support of equitable transportation rates and for development of foreign markets, the committee is advised that the workload on transportation rates is being carried by one full-time employee. The committee suggests that consideration be given to the advisability of assigning additional personnel to this work.

AGRICULTURAL RESEARCH ADMINISTRATION

OFFICE OF ADMINISTRATOR

The committee recommends a language change to provide for travel and subsistence expenses of advisory committees in order to cover the various types of committees established by the Secretary of Agriculture, including representatives of producers, industry, Government, and science.

In this connection, the committee believes that no commodity advisory committee can properly appraise and evaluate the agricultural research within its jurisdiction unless it has a clear understanding of the entire pattern, not only of such research work, but also of the proportionate distribution of funds available for such work and the cumulative totals of previous expenditures on specific active research To function effectively, the committee feels that such projects. committees must be informed on all such research work, including costs and proportionate use of funds, regardless of whether the work is financed with regular bureau appropriations or with Research and Marketing Act or other research funds, and that each advisory committee should know approximately the amount of funds available or to be available for research within the purview of that committee, how much has been spent in the past on each specific project and the best available estimate of the cost of each specific project under way or proposed. Also, the committee is of the opinion that it is important for the Department to have the advice of such committees as to what work should be terminated, as well as what work should be undertaken.

BUREAU OF ANIMAL INDUSTRY

ANIMAL DISEASE CONTROL AND ERADICATION

The committee recommends striking the proviso authorizing \$30,000 for the acquisition of land and construction of four buildings for inspection of livestock at Canadian border ports of entry. No

change is recommended in the amount allowed by the House, but in expending the \$30,000 provided the committee feels that the Department should go as far as they can to provide the facilities needed at the Canadian border ports involved.

BUREAU OF PLANT INDUSTRY, SOILS, AND AGRICULTURAL ENGINEERING

FIELD CROPS

The committee recommends, in addition to \$35,000 for repairs and reconditioning of field station facilities, an increase of \$40,000 for research on American-Egyptian extra-long-staple cotton as well as development of new hybrid cottons of the American upland type. Evidence submitted to the committee indicates a need to intensify in particular research with Pima 32, Amsak, and other extra-long-staple cottons in order that we may be able to develop higher yielding strains of American-Egyptian varieties. The strains already developed have proven satisfactory for spinning products heretofore spun from imported cottons. Facilities and equipment for this work are already available at Sacaton, Ariz., Las Cruces, N. Mex., and Ysleta, Tex. The committee was also impressed with the desirability of intensive work in the development of new hybrid cottons adapted to production in American uplands. Recent research has produced new hybrid crosses of cotton which produce cotton fiber of an unusual quality.

AGRICULTURAL ENGINEERING

The committee recommends an increase of \$20,000 in order to strengthen the research in farm electrification. The committee is advised that, in addition to former accomplishments of recent years which have aided the farmers, it is now indicated that expanded research is desirable on insect electrocuters for corn borer, tobacco hornworm, the cotton bollworm and tomato hornworm moth, and that other insect pests are also known to be photo positive and therefore may be attracted by an electric lamp.

FOREST SERVICE

NATIONAL FOREST PROTECTION AND MANAGEMENT

The committee recommends an increase of \$2,430,500 in order to provide more adequately for the various types of management operations involved on timber, range, wildlife, water, and recreation properties. The report of the House committee earmarked specific amounts for several projects named therein. The committee is informed that compliance with such earmarking would compel the curtailment of other activities which are of equal importance. Accordingly, the committee does not favor specifically earmarking the increase allowed for the appropriation item, and prefers to leave the allocation of such increase to the best judgment of the Forest Service in the economical performance of their property management functions.

The committee recommends the addition of a new section on "Cooperative range improvements," with an appropriation of \$750,000, which covers the use to be made on the national forests of the grazing fees received. In view of this addition, the committee disapproves the earmarking of \$200,000 for reseeding, as well as the

requirement that the increase be contingent upon an offsetting increase in the grazing fees.

The committee is advised that the recreation use of the national forests has now increased to an estimated 26,000,000 visitors annually. The committee is also advised that there is critical need in many of the areas for replacement and expansion of public facilities to maintain structures and to assure safe water, proper sanitation, and fire prevention, for which funds are not available to the Forest Service. Accordingly, the committee requests the Forest Service to make appropriate provisions for selling or leasing such recreation areas to public or semipublic groups in order to assure that the areas may be rehabilitated and properly maintained from funds made available by such sale or lease, and to suggest to the appropriate legislative committee such legislation as may be necessary to effectuate this recommendation.

FOREST DEVELOPMENT ROADS AND TRAILS

The committee recommends an increase of \$1,652,000 in order to provide more adequately for the construction and betterment of forest development roads for the purpose of aiding the production of timber from the national forests. In this connection, the committee suggests that the Forest Service give consideration to the need for the improvement of the unpaved section of Tellico River Road in Cherokee National Forest.

ACQUISITION OF LANDS FOR NATIONAL FORESTS-WEEKS ACT

The committee recommends an increase of \$301,000 in order to continue the acquisition program at the 1950 level of operation. In this connection, the committee suggests that the Forest Service give consideration to the purchase of Battell Park Forest owned by Middlebury College at Middlebury, Vt.

SOIL CONSERVATION SERVICE

LAND UTILIZATION

The committee recommends an increase of \$75,175 for the strengthening of an existing barrier structure to prevent further serious erosion on the San Simon Valley land utilization project in Arizona. The committee is advised that this nonrecurring item will stop the process of head cutting which is destroying valuable grazing land and resulting in depositing a large amount of silt in the San Carlos irrigation reservoir as well. Therefore, the committee recommends the full amount of the budget estimate for this work.

The committee also recommends an increase of \$100,000 for the purpose of stepping up the program of revegetating and improving undeveloped project lands in order to remove them from the hazards of wind and water erosion. The committee is informed that there are about 175,000 acres of former cropland which it will be necessary to reseed in order to eliminate the erosion hazards, and the increase recommended will aid in accelerating the program.

PRODUCTION AND MARKETING ADMINISTRATION

CONSERVATION AND USE OF AGRICULTURAL LAND RESOURCES

The committee recommends an increase of \$500,000 in order to provide for the full amount of the payments to farmers as authorized by the program specified by the 1950 act. The committee approves

the reduction of \$2,000,000 made by the House from the estimate for administrative expenses, but is of the opinion that the conservation payments are a definite commitment and should be paid in full.

The committee also recommends striking the proviso limiting to 5 percent the allocation for any county for services of technicians of the Soil Conservation Service. The committee is advised that only about 250 counties have made any use of the provision, and in view of such limited benefit to the Soil Conservation Service the committee feels the provision is not effective and should be eliminated.

MARKET NEWS SERVICE

The committee recommends an increase of \$12,000 in order to establish a market news service on naval stores and an increase of \$125,000 in order to establish and improve market news and reporting services in the critical marketing areas as planned by the Department. The Department is also directed to give careful consideration to providing a cooperative service on livestock and feed in Arkansas.

In this connection, the committee has examined the report submitted by the Department, including their proposals for expanding and improving the market news service, and feels that the initiation of new services and improvement of existing operations should be undertaken as the need arises and as available funds will permit. The committee believes that the financing of the services should be on a cooperative basis with the States concerned, with particular emphasis placed upon obtaining a larger share of the funds from State and local contributions.

MARKET INSPECTION OF FARM PRODUCTS

The committee is advised again this year that Government laboratories are competing with private laboratories in the testing and grading of oilseeds and oilseed products, as well as in similar services. The committee again emphasizes that it views with disfavor the creation of laboratories by the Government which compete with commercial laboratories for such testing work, particularly since no charge has been made that the commercial fees are excessive or that the service is unavailable.

RURAL ELECTRIFICATION ADMINISTRATION

The question of REA loans for the construction of generating and transmission facilities to be leased by the Southwestern Power Administration was a matter of considerable controversy in both the Subcommittee on Agriculture Appropriation and in the full committee. This involves a question of policy which cannot be properly determined by the Committee on Appropriations. In view of the importance of this matter the committee respectfully suggests that the standing committee on Agriculture and Forestry review this entire subject to determine whether legislation is necessary. The committee is somewhat concerned by the large increases in the proportion of the funds made available that is devoted to loans for generating and The committee believes that no loan should transmission facilities. be made for construction of such facilities unless in areas where private power companies cannot or will not furnish adequate power at reasonable rates and within a reasonable time.

The committee has examined the method of computing fees for engineering and legal services in connection with rural electrification loans, as referred to in the House report, and finds no evidence that

the schedules used have caused the payment of excessive fees. With respect to the legal fees, the committee is advised that the schedules by which the Administration controls the maximum to be spent by the cooperative from loan funds for such purpose take into consideration the amount and nature of the various legal services expected to be required for each loan, and the fees are not determined merely on the basis of a percentage of the loan or of the cost of the project. The committee is advised that with respect to engineering fees for distribution lines and internal-combustion generating plants, the Administration's standard form of contract provides for compensation on a fixed-fee basis, rather than a percentage of the cost of construction. In the case of transmission lines and steam and hydroelectric plant loans, some engineering fees have been approved on a percentage basis, but the Administration insists that the fees in such cases are lower than the compensation paid for comparable services by private utility companies generally.

INCREASES AND LIMITATIONS

The changes recommended by the committee in the amounts of chapter VI of the House bill are as follows:

BUREAU OF AGRICULTURAL ECONOMICS:

Economic investigations_____

The increase recommended by the committee is to partially restore the reduction by the House below the 1950 level of operation, in the amount of \$30,000, and to provide the full estimate of \$90,000 for State estimates on farm production expenpitures and net farm income. In addition, the committee disapproves the earmarking of \$15,000 for economic research on farm housing and farm construction. The total provided is \$2,720,000, which is \$195,600 below the budget estimate.

\$2,720,000, which is \$195,600 below the budget estimate. The committee also recommends the deletion of the words "farm structures."

Crop and livestock estimates_____

The increase recommended by the committee is to restore the reduction by the House below the 1950 level of operation, including pay adjustment costs, in the amount of \$179,000. In addition, the committee disapproves the use of funds for work relative to current farm construction. The total amount provided is \$2,904,000, which is \$473,800 below the budget estimate.

The committee also recommends the deletion of the following:

and data on farm construction as provided by title V of the Housing Act of 1949 (Public Law 171),

Total, Bureau of Agricultural Economics_____

AGRICULTURAL RESEARCH ADMINISTRATION: Office of Administrator:

The committee recommends striking out "Advisory Committee" and inserting in lieu thereof "advisory committees," in order to provide expenses for the various types of committees established by the Secretary of Agriculture.

299,000

INCREASES AND LIMITATIONS—Continued

AGRICULTURAL RESEARCH ADMINISTRATION—Con. Research on agricultural problems of Alaska____

The increase recommended by the committee will provide a total of \$280,000, which is \$36,200 below the budget estimate.

Office of Experiment Stations:

Payments to States, Hawaii, Alaska, and Puerto Rico

The increase recommended by the committee in this item is to conform to the distribution of sec. 9 funds from the item for Research and Marketing Act of 1946 in the amount of \$5,000,000, and to restore \$10,000 to the amount for the Territory of Alaska. The total provided for the item is \$12,416,-208, the amount of the estimate plus the \$5,000,000 for sec. 9 funds.

For the purpose of distributing sec. 9 funds from the item for Research and Marketing Act of 1946, the committee further recommends that the following be added to the bill:

Sections 3 and 5, \$2,863,708, and sections 9 and 11 of said Act as added by the Act of August 14, 1946 (7 U. S. C. 427h, 427j), including administration by the Office of Experiment Stations in the United States Department of Agriculture, \$5,000,000, no part of which latter amount shall be used for beginning construction of any building costing in excess of \$15,000, except that a poultry breeding house may be constructed at Purdue University at a cost to this appropriation of not to exceed \$29,000

The committee also recommends that the words "where applicable" be inserted after the provision that the payments are to be paid quarterly in advance.

The committee further recommends that the amount stated for the Territory of Alaska be increased from \$27,500 to \$37,500, to restore the budget estimate.

Salaries and expenses_____

The increase recommended by the committee is to provide a total of \$252,500, which is \$11,150 below the budget estimate.

The committee also recommends to strike out "December" and insert in lieu thereof "September," in order to correct an error in the date of the amendatory act of 1944.

Total, Office of Experiment Stations__

BUREAU OF HUMAN NUTRITION AND HOME ECONOMICS_

The increase recommended by the committee is to restore the funds of the Bureau to the 1950 level of operation, including pay adjustment costs, for a total of \$1,763,200, which is \$454,000 below the budget estimate.

for loans in reclamation projects and to entrymen on unpatented public land

The committee further recommends that the following be added to the bill:

: Provided further, That for the purpose of making loans pursuant to the foregoing authority, the Secretary of the Treasury is authorized to use as a public-debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act are extended to include such loans to the Secretary: Provided further, That repayments to the Secretary of the Treasury on such loans shall be treated as a public-debt transaction.

EXTENSION SERVICE:

Payments to States, Hawaii, Alaska, and Puerto Rico

The increase recommended by the committee is to extend to Puerto Rico and to the Territory of Alaska the benefits of the Capper-Ketcham Act and of the Bankhead-Jones Act. The total provided for the item is \$27,103,498, which is \$753,040 below the budget estimate.

The committee also recommends that the following be deleted from the bill:

section 3 of the Act approved June 20, 1936 (7 U. S. C. 343e), extending the benefits of the Capper-Ketcham Act to the Territory of Alaska, \$10,000

and that the following be inserted in lieu thereof: the Act approved October 27, 1949 (Public Law 417), extending to the Territory of Alaska the benefits of the Capper-Ketcham Act and sections 21 and 23 of title II of the Bankhead-Jones Act, \$42,150; Puerto Rico, section 3 of the Act of March 4, 1931 (7 U. S. C. 386f), authorizing extension of the Capper-Ketcham Act to Puerto Rico, \$31,348,

The committee further recommends that the following be added to the bill:

, and the Act approved October 26, 1949 (Public Law 406), extending the benefits of section 23 of title II of the Bankhead-Jones Act to Puerto Rico, \$40,000

Salaries and expenses_____

The increase recommended by the committee is to provide for a portion of the pay adjustment costs needed to keep the program at the 1950 level of operation. The total provided for the item is \$915,000, which is \$43,200 below the budget estimate.

Total, Extension Service_____ 118, 498

104

15,000

\$103, 498

INCREASES AND LIMITATIONS—Continued

OFFICE OF THE SECRETARY

The increase recommended by the committee is to provide \$30,000 for pay act costs, including executive pay increases and to provide \$6,000 for regulatory hearings under the Office of Hearing Examiners. The total provided for the item is \$2,179,300, which is \$94,000 below the budget estimate.

OFFICE OF THE SOLICITOR

The increase recommended by the committee is to provide for the increased activities contemplated in the farm housing program and in the rural telephone program. The total provided for the item is \$2,675,000, which is \$395,000 below the budget estimate.

The committee also recommends that the following be added to the bill:

, together with such amounts from other appropriations or authorizations as are provided in the schedules in the budget for the current fiscal year for such expenses which several amounts not exceeding a total of \$207,000 shall be transferred to and made a part of this appropriation

OFFICE OF INFORMATION:

The committee recommends that the following be added to the bill:

: Provided, That when and to the extent that in the judgment of the Secretary agricultural exhibits and motion and sound pictures relating to the authorized programs of the various agencies of the Department can be more advantageously prepared, displayed, or distributed by the Office of Information, as the central agency of the Department therefor, additional funds not exceeding \$300,000 for these purposes may be transferred to and made a part of this appropriation, from the funds applicable, and shall be available for the objects specified herein

TITLE II—CORPORATIONS

COMMODITY CREDIT CORPORATION:

The committee recommends that the administrative expense limitation be increased from \$16,000,000 to \$16,350,000. The increase is intended to provide more adequately for their program work. The amount provided is \$400,000 below the budget estimate.

The committee also recommends that the amount of the authorization to the Secretary of the Treasury to discharge the indebtedness of the Commodity Credit Corporation by canceling notes be reduced from \$170,515,131 to \$66,698,457. The decrease is to conform to the budget amendment in S. Doc. No. 161 and is based on the losses allowed by the appraisal committee.

DECREASES

RESEARCH AND MARKETING ACT OF 1946

\$5,000,000

For the purpose of distributing section 9 funds to the Office of Experiment Stations, the committee recommends that the following section be stricken from the bill:

To enable the Secretary to carry into effect the pro-visions of section 9 of title I and title II of the Act of August 14, 1946, as amended (7 U. S. C. 427, 427h, 427j, 1621–1629), as follows: For payments to States, Territories, and Puerto Rico for agricultural experiment stations pursuant to section 9 of the Bankhead-Jones Act approved June 29, 1935, as

of the Bankhead-Jones Act approved June 29, 1935, as amended by the Act of August 14, 1946, \$5,000,000;

For the improvement and development, independently or through cooperation among Federal and State agencies, and others, of a sound and efficient system for the dis-tribution and marketing of agricultural products pur-suant to the "Agricultural Marketing Act of 1946" (title II of the Act of August 14, 1946, as amended), including the objects for which funds are available for titles II and III of such Act of August 14, 1946, \$6,000,000: Provided, That not less than \$650,000 of this amount shall be available for contracts in accordance with the provisions of section 205 of said Act: *Provided further*, That the Secre-tary may make available to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information, shall not exceed those which the Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine), and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: *Provided further*, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates and for development of foreign markets.

In all, \$11,000,000: Provided, That no part of this appropriation shall be used for beginning construction of any building costing in excess of \$15,000, except that a poultry breeding house may be constructed at Purdue University at a cost to this appropriation of not to exceed \$29,000.

and that the following be inserted in lieu thereof:

To enable the Secretary to improve and develop, independently or through cooperation among Federal and State agencies, and others, a sound and efficient system for the agencies, and others, a sound and efficient system for the distribution and marketing of agricultural products under the provisions of title II of the Act of August 14, 1946, as amended (7 U. S. C. 1621–1629). including the objects for which funds are available for titles II and III of such Act of August 14, 1946, \$6,000,000: Provided, That not less than \$650,000 of this amount shall be available for con-tracts in accordance with the provisions of section 205 of said Act: Provided further, That the Secretary may make avail-able to any bureau, office, or agency of the Department such amounts from this appropriation as may be necessary to carry out the functions for which it is made (but amounts made available to the Office of the Secretary, Office of the Solicitor, and Office of Information, shall not exceed those Solicitor, and Office of Information, shall not exceed those which the Bureau of the Budget, after a hearing thereon with representatives of the Department, shall determine),

George C. Marshall Foundation, Lexington, Virginia

DECREASES-Continued

RESEARCH AND MARKETING ACT OF 1946-Continued

and any such amounts shall be in addition to amounts transferred or otherwise made available to other appropriation items of the Department: Provided further, That no part of this appropriation shall be available for work relating to fish or shellfish or any product thereof, except for the support of equitable transportation rates before Federal agencies concerned with such rates and for development of foreign markets.

(NOTE.—See also additional language inserted under "Office of Experiment Stations)."

AGRICULTURAL RESEARCH ADMINISTRATION:

Working capital fund, Agricultural Research Cen-

\$300,000

The committee recommends that the following paragraph be stricken from the bill:

WORKING CAPITAL FUND, AGRICULTURAL RESEARCH CENTER

For the establishment of a working capital fund, to be available without fiscal year limitation, for expenses necessary for furnishing facilities and services by the Agricultural Research Center to Government agencies, \$300,000. Said fund shall be reimbursed from applicable appropriations or other funds to cover the charges for such facilities and services, including handling and related charges, for equipment rentals (including depreciation, maintenance, and repairs), for supplies, equipment and materials, stores of which may be maintained at the center, and for building construction, alterations, and repair, and applicable appropriations or other funds may also be charged their proportionate share of the necessary general expenses of the center not covered by the annual appropriation.

Bureau of Animal Industry:

Animal disease control and eradication.

The committee recommends that the following proviso be stricken from the bill:

, including not to exceed \$30,000 for the acquisition of land and construction of four buildings for inspection of livestock at Canadian border ports of entry:

FLOOD CONTROL

ter___

870,000

Decreases have been recommended in most of the longrange construction items contained in other chapters of the bill. Works of this nature may be postponed without any unusual detriment to the total over-all program. The total provided for this item is \$9,880,000, which is \$1,820,000 below the budget estimates. This is a highly desirable work, but the committee feels that in view of the general budgetary situation it can be deferred.

DECREASES-Continued

SOIL CONSERVATION SERVICE:

Soil conservation research.

The committee recommends that the caption "SALARIES AND EXPENSES" be deleted as a center heading. The purpose of the deletion is to prevent the limitation on alteration and construction of buildings in the general language under Soil Conservation Service from being construed as limiting the authority contained in the basic law for land utilization under which the Secretary may "protect, improve, develop, and administer any property so acquired and to construct such structures thereon as may be necessary to adapt it to its most beneficial use."

Soil conservation operations_____

The House increased the appropriation for soil conservation operations \$1,000,000 above the budget estimates for this purpose. The committee recognizes the great importance of the work of the soil conservation districts and has therefore approved a substantial increase over the budget estimates and the amount to be expended in the current fiscal year. The committee believes that the amount allowed for this purpose is adequate to make great progress in the programing and planning of soil conservation work in the several districts and urges the Soil Conservation Service to utilize its large staff of specialists in such a way as to render the maximum amount of assistance to cooperating farmers.

PRODUCTION AND MARKETING ADMINISTRATION: Marketing services:

Marketing regulatory acts_____

The decrease recommended by the committee results from the disapproval by the committee of any part of the estimated \$130,000 requested to carry out the second year of a 3-year plan for posting and supervising all eligible stockyards under the Packers and Stockyards Act, and the approval by the committee of the estimated \$30,000 for increased activity under the Grain Standards Act and the approval by the committee of \$15,000 of the estimated \$30,000 for increased seed testing under the Federal Seed Act; toward which requests the House allowed \$100,000. The total provided for the item is \$3,495,000, which is \$252,600 below the budget estimate. 55,000

\$500,000

108

George C. Marshall Foundation, Lexington, Virginia

DECREASES—Continued

TRAVEL EXPENSE LIMITATION AND REDUCTION:

The committee recommends that the following be stricken from title I of the bill:

Not to exceed \$12,000,000 of the funds appropriated in this title shall be available for travel expenses. Amounts available from appropriations contained in this title are hereby reduced by the total sum of \$645,496, such amount to be carried to the surplus fund and covered into the Treasury immediately upon approval of this chapter.

and that the following be inserted in lieu thereof:

TTNA

Sec. 411. Of the funds appropriated in this chapter for travel expenses \$791,888 shall be carried to the surplus fund and covered into the Treasury on or before August 1, 1950; but such amount shall be credited toward any other reduction in amounts available for such travel expenses resulting from decreases in appropriations made by this Act below the budget estimates.

OFFICE OF THE SECRETARY

SALARIES AND EXPENSES

The 1951 budget estimate for this appropriation is \$2,345,400. The House allowed an appropriation of \$2,315,000, or a reduction of \$30,400 below the 1951 estimate.

The committee recommends a further reduction in this appropriation of \$215,000, or a total reduction of \$245,400 under the 1951 budget estimate, providing a total 1951 appropriation of \$2,100,000. Including Pay Act increases, the 1951 base for this appropriation is \$1,994,614.

STANDARDIZATION OF GEOGRAPHIC NAMES

For this item, the 1951 budget estimate is in the amount of \$91,400. No appropriation was included in the bill by the House for this purpose.

The committee recommends an appropriation of \$14,000, which is \$400 less than was appropriated for the fiscal year 1950, and which is \$77,400 less than the 1951 budget estimate.

ENFORCEMENT OF THE CONNALLY HOT OIL ACT

The House allowed \$200,000 for this appropriation, reducing the budget estimate of \$205,000 by \$5,000.

For the fiscal year 1950, the amount of this appropriation was \$175,000, and including Pay Act increases, the base for the fiscal year 1951 is \$179,178. The committee recommends an appropriation of \$180,000 for the fiscal year 1951, which is a reduction of \$20,000 under the House figure and a reduction of \$25,000 under the budget estimate.

SOUTHEASTERN POWER MARKETING AREA

OPERATION AND MAINTENANCE

The committee recommends \$100,000 for this appropriation in lieu of the budget estimate of \$175,000 and the House allowance of \$150,-000. Including Pay Act increases, the 1951 base for this appropriation is \$72,016. The appropriation of \$100,000 recommended by the committee, therefore, will provide additional funds of approximately \$28,000 in the fiscal year 1951.

SOUTHWESTERN POWER ADMINISTRATION

OPERATION AND MAINTENANCE

Including Pay Act increases, the 1951 base for the operation and maintenance appropriation of the Southwestern Power Administration is \$532,400. The 1951 budget estimate is in the amount of \$785,000, of which amount the House approved \$760,000, or \$25,000 less than the budget estimate.

The committee recommends a further reduction of \$100,000 in the operation and maintenance appropriation to provide a total appropriation of \$660,000, which is \$125,000 less than the 1951 budget estimate. As compared to the 1951 base for this appropriation, \$532,400, the amount of \$660,000 proposed by the committee for the fiscal year 1951 represents an increase of \$127,600.

CONSTRUCTION

The 1951 budget estimate for construction is \$10,350,000, together with an estimate of \$6,000,000 contract authority. The House allowed the full amount of the budget estimate both in cash and contract authority.

The committee recommends a reduction of \$1,730,000 in the cash appropriation to provide an appropriation of \$8,620,000 in lieu of the budget estimate and House figure of \$10,350,000.

In the contract authorization, the committee recommends a reduction of \$4,270,000 to provide contract authority in the amount of \$1,730,000 in lieu of the budget estimate and House figure of \$6,000,000.

The reduction of \$1,730,000 in the cash appropriation recommended by the committee, together with the proposed reduction of \$4,270,000 in contract authority, makes a total proposed reduction of \$6,000,000 in the 1951 construction program of the Southwestern Power Administration.

BASIS OF COMMITTEE'S RECOMMENDATION

The action taken by the committee is based upon assurances received that the Secretary of the Interior and the private power companies in Oklahoma have agreed upon a means of integrating the hydroelectric power produced at Government dams with steam power produced by the private utilities in a manner which will provide for servicing public bodies with Government power as contemplated by section 5 of the 1944 Flood Control Act and which will serve as a pattern for similar contracts with public utilities in the southwest power area.

TABLE SHOWING ITEMS INCLUDED IN 1951 BUDGET ESTIMATE FOR CONSTRUCTION AND ITEMS RECOMMENDED BY COMMITTEE TO BE DELETED

As indicated, the committee recommends a reduction of \$1,730,000 in the cash appropriation for construction and \$4,270,000 in the contract authorization, or a total of \$6,000,000.

The items included in the 1951 budget estimate, including \$10,350,-000 in cash and \$6,000,000 in contract authorization, or a total of \$16,350,000, and the reductions recommended by the committee, totaling \$6,000,000 in cash and contract authority, are set forth in the following table:

CONSTRUCTION, SOUTHWESTERN POWER ADMINISTRATION-continued

Use of Southwestern Power Administration Continuing Fund

The subcommittee on Interior Department appropriations conducted joint hearings with the subcommittee on agricultural appropriations, which handles the appropriation for the Rural Electrification Administration, on the use of the continuing fund of the Southwestern Power Administration for the purpose of aiding in the construction and operation of facilities for producing and transmitting power for the use of public bodies and cooperatives. This program involves the expenditure of loans of considerable amounts by the REA to a combination of local cooperatives and the lease of the facilities by the Southwestern Power Administration. The continuing fund is being used for this purpose to an extent not contemplated at the time SPA was created. The committee feels that the utmost care should be exercised by those administering this fund to avoid its use in any instance where it is not absolutely necessary to enable public bodies and cooperatives to secure sufficient power to supply customers. It is not the intent of the committee that the continuing fund be used directly or indirectly in the construction or operation of powerproducing facilities and transmission lines to compete with private enterprise in areas where adequate power is available or will be made available within a reasonable time at reasonable rates to the cooperatives and public bodies.

George C. Marshall Foundation, Lexington, Virginia

BONNEVILLE POWER ADMINISTRATION

CONSTRUCTION

The 1951 budget estimate for "Construction" is in the amount of \$42,000,000, of which \$17,000,000 is for liquidation of prior year contract authority. The House allowed an appropriation of \$41,500,000. The committee recommends that this amount be reduced by \$2,000,-000 to provide a total appropriation of \$39,500,000, which amount is \$2,500,000 under the 1951 budget estimate.

In addition to the estimate for a cash appropriation, the 1951 estimates propose for construction in progress, new construction, and general plant, additional contract authority in the amount of \$21,-750,000. The House allowed the full amount of the estimate. The committee recommends that the proposed contract authority be reduced to \$20,000,000, which is a reduction of \$1,750,000 under the 1951 estimate and the House allowance.

OPERATION AND MAINTENANCE

For operation and maintenance of the Bonneville Power transmission system, the 1951 estimates proposed an appropriation of \$5,250,-000, of which amount the House approved \$5,000,000. The committee recommends that this amount be reduced to \$4,500,000, which is \$500,000 less than the House allowance and \$750,000 less than the 1951 estimate.

FLEXIBILITY IN ALLOCATING APPROPRIATIONS WITHIN THE POLICY INTENT OF CONGRESS

Because of the business character of the Administration's activities, flexibility in allocating appropriations within the policy intent of Congress is necessary so that maximum economy can be achieved. It is recognized that the power conditions and requirements in the 2,000,000 kilowatt Federal system are constantly changing, and that facilities and operations must be adapted to actual current conditions as determined by comprehensive and continuing engineering analyses after appropriations are made. Therefore, in line with the policy stated in the conference committee report for last year's appropriation, the appropriations available for construction and operation of the power facilities of the Bonneville Power Administration should be administered within the appropriation language and policy intent of the Congress, on the basis of changing power conditions and requirements as they occur in the area.

It is understood that this authority for administrative adjustment in the use of funds will not permit undertaking construction of new major facilities not previously approved by the Congress. It will permit, within the limits of funds appropriated upon approval by the Bureau of the Budget, expansion of existing major facilities, construction of new minor facilities and expansion of existing minor facilities, all only as required by urgent conditions which could not have been foreseen in time for normal presentation to the Congress.

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

The 1951 budget estimate for this appropriation is \$8,650,000. The House allowed \$6,756,800, and the Department requested restorations totaling \$1,833,950.

The committee recommends a total increase of \$371,010 to provide an appropriation of \$7,127,810, which is \$1,522,190 less than the 1951 budget estimate.

The increase of \$371,010 recommended by the committee is broken down as follows:

(1) Grazing Administration:

1-1	(a) Range reseeding	\$100,000
	The budget estimate for this purpose is \$200,000.	\$100,000
	The House eliminated the item, and the committee recommends that half of the estimate be allowed.	
	The committee does not approve and does not recom- mend that this amount be used on a matching basis.	
(2)	Forest management:	
	(a) Oregon and California grant lands	75,000
	This amount is included for use in the control of	
	noxious weeds on O. and C. lands.	
(3)	Cadastral surveys	100,000
	For this activity, the budget estimate is \$1,024,410. The	
	House allowed \$743,000, and the committee recommends that	
	this amount be increased by \$100,000. In proposing an in-	
	crease of \$100,000 for cadastral surveys, the committee recom-	
	mends that the department give particular consideration in	
	the use of this additional amount to the pressing work to be	
	done in Alaska.	
(4)	~	96,010
(-)	This increase recommended by the committee will provide	00,010
	a total of \$1,000,000 for general administration of the Bureau	
	of Land Management as compared to the budget estimate of	
	\$1,069,700, and the House allowance of \$903,990.	
	\$1,000,100, and the frouse anowance of \$500,550.	

Total increase recommended______ 371, 010

The House action on the other activities included within the appropriation "Management of lands and resources" has been approved by the committee.

Under the appropriation "Management of lands and resources," and in connection with the increase of \$75,000 recommended by the committee for the control of noxious weeds on the Revested Oregon and Coos Bay Wagon Road grant lands, the committee recommends that the following language be added to the bill:

: Provided further, That of the appropriations herein made in connection with the Reversed Oregon and California Railroad and Reconveyed Coos Bay Wagon Road grant lands, expenditures may be made for weed control on such lands, including those under cooperative weed control agreements with the State and Counties

CONSTRUCTION

The 1951 budget estimate for construction is \$1,000,000, together with \$300,000 contract authority.

The House allowed a cash appropriation of \$600,000, of which \$200,000 was for liquidation of prior contract authorization for construction of access roads on O. and C. grant lands, \$300,000 was new funds for construction of O. and C. access roads, and \$100,000 was for certain construction work in Alaska. No additional contract authority was approved by the House.

The committee recommends an increase of \$200,000 in the cash appropriation for the construction of access roads on O. and C. grant lands to provide total new funds of \$500,000 for this purpose. Timber sales from O. and C. lands in the fiscal year 1951 are estimated at \$4,500,000. A continuation of the access road program on a larger scale than that proposed by the House is needed in order to open up additional timber areas. The committee concurs with the House in not allowing any additional contract authority for the fiscal year 1951.

The committee likewise concurs with the House in the item of \$100,000 for construction work in Alaska.

The total of \$800,000 recommended by the committee is \$200,000 under the budget estimate. All of the contract authority estimate of \$300,000 was disapproved.

Administrative Provisions

The committee recommends that the following language be deleted from the bill:

: Provided, That of appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands shall be reimbursed from the 25 per centum referred to in section c, title II, of the Act approved August 28, 1937, of the special fund designated the "Oregon and California Land Grant Fund" and section 4 of the Act approved May 24, 1939, of the special fund designated the "Coos Bay Wagon Road Grant Fund": Provided further, That no part of such appropriations shall be available for expenditure in connection with such lands in excess of such reimbursements during the current fiscal year

and that the following language be inserted in lieu thereof:

: Provided, That of appropriations herein made for the Bureau of Land Management, expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands for payment of current expenses in connection with the management of such lands of a type paid from the separate appropriation heretofore made in connection with such lands shall be reimbursed from the 25 per centum referred to in section c, title II, of the Act approved August 28, 1937, of the special fund designated the "Oregon and California Land Grant Fund" and section 4 of the Act approved May 24, 1939, of the special fund designated the "Coos Bay Wagon Road Grant Fund": Provided further, That no part of such appropriations for such current expenses shall be available in excess of such reimbursements for the current fiscal year

RANGE IMPROVEMENTS

The committee recommends that the following provision be amended as indicated:

RANGE IMPROVEMENTS

For construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934, as amended (43 U. S. C. 315), sums equal to the aggregate of all moneys received (not to exceed \$350,000) as range improvement fees under section 3 of said Act and of 25 per centum of all moneys received under section 15 of said Act during the current and prior fiscal years but not yet appropriated, to remain available until expended.

The language contained in the 1951 budget estimates proposed to place this appropriation on a permanent, indefinite basis. Although the House committee concurred in the language as recommended in the budget estimates, the language was changed on the floor of the House to place this appropriation on an annual, indefinite basis. The committee has approved the language as adopted on the House floor except that the committee recommends a limitation of \$350,000 on the amount that would be made available under this provision. The limitation of \$350,000 represents the estimated receipts as range improvement fees to be received in the fiscal year 1951.

Similar limitations are recommended by the committee on other annual, indefinite appropriations included in the bill by the House under the Bureau of Land Management.

PAYMENTS TO STATES (PROCEEDS OF SALES)

The committee recommends that the following provision in the bill be amended as indicated:

PAYMENTS TO STATES (PROCEEDS OF SALES)

For payment to the several States of 5 per centum of the net proceeds of sales of public lands and materials lying within their limits, for the purpose of education or of making public roads and improvements, sums equal to the aggregate of receipts (not to exceed \$20,000) covered into the Treasury in accordance with section 4 of the Act of June 26, 1934 (31 U. S. C. 725c), during the current and prior fiscal years but not yet appropriated.

PAYMENT TO OKLAHOMA

The committee recommends that the following provision be amended as indicated:

PAYMENT TO OKLAHOMA

For payment to the State of Oklahoma in lieu of all State and local taxes upon tribal funds accruing under the provisions of the joint resolution of June 12, 1926 (44 Stat. 740), to be expended by the State in the same manner as if received under section 35 of the Act approved February 25, 1920 (30 U. S. C. 191), sums equal to $37\frac{1}{2}$ per centum of the royalties received (not to exceed \$4,000) during the current and prior fiscal years (but not yet appropriated) from the south half of Red River in Oklahoma under the provisions of said joint resolution of June 12, 1926.

LEASING OF GRAZING LANDS

The committee recommends that the following provision be amended as indicated:

LEASING OF GRAZING LANDS

For leasing State, county, or privately owned lands in accordance with the provisions of the Act of June 23, 1938 (43 U. S. C. 315m-1), sums equal to the aggregate of receipts (*not to exceed \$6,000*) covered into the Treasury in accordance with the Act of June 23, 1938 (43 U. S. C. 315m-4), during the current and prior fiscal years but not yet appropriated.

PAYMENTS TO STATES (GRAZING FEES)

The committee recommends that the following provision be amended as indicated:

PAYMENTS TO STATES (GRAZING FEES)

Sums not in excess of 33¹/₃ per centum of all grazing fees received (not to exceed \$300) during the current and prior fiscal years (but not yet appropriated) from each grazing district on Indian lands ceded to the United States for disposition under the public-land laws, to be paid to the State in which said lands are situated, in accordance with the provisions of section 11 of the Act of June 28, 1934, as amended (43 U. S. C. 315j).

BUREAU OF INDIAN AFFAIRS

For the Bureau of Indian Affairs, the 1951 budget estimates total \$85,996,375. The House approved appropriations in the amount of \$76,793,000, or \$9,203,375 less than the estimates.

The committee recommends total appropriations for the Indian Bureau of \$80,746,055, which amount is \$3,953,055 in excess of the House allowance, but which is \$5,250,320 less than the 1951 estimates.

CALIFORNIA INDIANS

The House eliminated \$2,619,542 of funds in the 1951 budget estimates for Indians in California. Considerable testimony was presented to the Senate committee on behalf of the Indians in California, as well as officials of the State of California, demonstrating that there is no justifiable basis for eliminating Indians in California from the benefits of the various programs, including health and education, carried on by the Indian Bureau under authority of various laws enacted by the Congress for Indians irrespective of the State in which they reside. The committee, therefore, has restored to the bill funds for use by the Indian Bureau in California. In most instances, the committee has not recommended the full 1951 budget estimate under a given Indian Bureau appropriation, or activities within a given appropriation, but reductions in the California Indian items included in the various activities under these appropriations are to be made in no greater percentage than the percentage the total of budgeted items in a given activity is under the 1951 budget esti-mates for such activity. This rule is to apply to the various activities under the several Indian Bureau appropriations with the exception of the activity "Buildings and utilities, education facilities" under the appropriation "Construction," in which instance, the committee is recommending a specific reduction below the 1951 estimate for the California construction item provided for under this activity.

HEALTH, EDUCATION, AND WELFARE SERVICES

The 1951 budget estimate for the appropriation "Health, education, and welfare services" is \$40,483,975. The House allowed \$37,929,000. Of the House reduction of \$2,554,975, \$1,286,883 represented elimination under this appropriation of funds for health, education, and welfare of Indians in the State of California.

In recommending an increase of \$2,323,328, the committee has not approved restoration of the item of \$745,000 for the Navajo-Hopi placement program in connection with the expanded construction program.

Likewise, the committee has not approved restoration of the item of \$20,756 for the National Indian Institute.

STATE EDUCATION CONTRACTS

Of the \$2,323,328 increase recommended, \$326,000 is to provide an additional amount for State education contracts. The 1951 budget estimate for this purpose is \$2,063,578, and the committee recommends an additional \$326,000, to provide a total of \$2,389,578.

The committee commends the position taken by the Indian Bureau that Indian children, by virtue of their citizenship in a State and residence in a State and district, are entitled to the same free public education as rendered to any other citizen children, without any legal obligation resting on the Federal Government to pay tuition for this service. However, the committee also recognizes that the presence

of large blocks of nontaxable Indian property within a local district, or unusually large numbers of Indian children, may create a situation which local funds are inadequate to meet. The committee therefore endorses the present policy of the Indian Bureau of recommending Federal financial assistance to these districts, based on evidence that the district is taxing itself to the maximum, and is still in need of supplementary funds in order to maintain an adequate school. In the absence of adequate evidence of need from some of the cooperating States at this time, the committee finds it impossible to earmark funds for particular States. However, it recognizes that a supplementary appropriation is necessary beyond that contained in the bill as passed by the House. The committee therefore recommends an increase in the total amount to be appropriated for aid to publicschool districts of \$326,000, to be allocated among the several States by the Indian Bureau in accordance with the criterion of need outlined above.

PUBLIC ASSISTANCE PAYMENTS TO INDIANS, OTHER THAN NAVAJOS AND HOPIS, IN ARIZONA AND NEW MEXICO

Of the \$2,323,328 increase recommended, \$400,000 is to provide for public assistance payments to Indians, other than Navajos and Hopis, in the States of Arizona and New Mexico. This is the same amount as was appropriated for the fiscal year 1950. Funds for continuing these payments were not included in the 1951 budget estimates because of legislation pending in Congress on this matter. Inasmuch as this legislation has not yet been acted upon by Congress, it is necessary to continue in this appropriation bill provision for public assistance payments to other than Navajo and Hopi Indians in these two States. Legislation has been enacted into law making provision for a social security program for the Navajo and Hopi Indians, and this appropriation, therefore, contains no funds for public assistance payments to the Navajo and Hopi Indians in the States of Arizona and New Mexico. Until legislation is enacted into law providing a social security program for other than Navajo and Hopi Indians in the States of Arizona and New Mexico, there is no other provision than in the Interior Department appropriation bill for Indians in these groups in need of public assistance.

DISTRIBUTION OF REMAINING INCREASE

The remaining increase recommended by the committee, \$1,597,328, is to be applied, with the exceptions noted, to items contained in the 1951 budget estimates, including budgeted items for California Indians under this appropriation. Reductions in the California Indian items under this appropriation are to be made in no greater percentage than the percentage the total of budget items in a given activity is under the 1951 budget estimates for such activity.

MEDICAL RESEARCH OF BENEFIT TO INDIANS

Under the heading "Health, education, and welfare services", the committee recommends that the following language be added to the bill:

research among mixed Indians and non-Indian groups including cooperation in medical research of benefit to Indians:

RESOURCES MANAGEMENT

The budget estimate for this appropriation is \$11,975,000. The House allowed \$10,542,000, or a reduction of \$1,433,000 under the budget estimates. Included in this reduction by the House was \$302,862 for California Indians. The committee recommends that \$272,576 be restored for California Indians, which restores funds under this appropriation for California Indians but applies approximately the same percentage of reduction as the House had applied to other budgeted items financed out of this appropriation. The increase of \$272,576 proposed by the committee will provide a total appropriation of \$10,814,576, which is \$1,160,424 under the 1951 budget estimate.

In connection with the appropriation for "Resources management," the committee wishes to call attention to the weed-control problem on Indian reservations. The committee requests the Indian Bureau and the Interior Department to consult with other agencies having jurisdiction over public lands and to make a report to Congress with reference to the weed-control problems on these lands. The committee also recommends that the Indian Bureau use not to exceed \$300,000 during the fiscal year 1951 of funds available under the appropriation "Resources management" for weed-control work on Indian reservations. Where possible, the committee recommends that this work be carried on in cooperation with other agencies.

CONSTRUCTION

The 1951 budget estimate for construction is \$26,602,400. The House allowed \$22,422,000. The committee recommends a net increase of \$1,213,151 to provide a total appropriation of \$23,635,151, which amount is \$2,967,249 under the 1951 budget estimate.

The committee recommends that the contract authorization of \$2,500,000 allowed by the House be increased by \$2,500,000 to provide a total contract authority of \$5,000,000, which amount is \$3,000,000 under the 1951 budget estimate of \$8,000,000. Under the contract authorization for buildings and utilities, the House made a reduction of \$5,275,000 in the long-range Navajo-Hopi rehabilitation program. The committee recommends that \$2,500,000 of this reduction be restored under "Buildings and utilities."

The net increase of \$1,213,151 in the cash appropriation recommended by the committee is broken down as follows:

(1)	Hoopa, Calif., school facilities, excluding item of \$20,000 for gym- nasium and item of \$18,900 for bus garage, which the com- mittee feels can best be postponed at this time	\$761,	100
(2)			980
(3)	Roads and trails, including restoration of funds for California on same pro rata basis as the roads and trails construction item is	i arr	
(1)	under the 1951 budget estimate Restoration of construction funds for Indian irrigation systems in	500,	000
(±)	California on same basis as House had reduced Indian irrigation construction item under the 1951 budget estimate	85,	571
	Total increases	1, 350,	651
(5)	Less decrease for land acquisition	137,	500
	Net increase recommended	1, 213,	151

ROADS AND TRAILS

SPRAGUE RIVER ROAD, KLAMATH RESERVATION

In connection with the increase of \$500,000 recommended for roads and trails, construction, the committee directs that \$75,000, as proposed in the 1951 budget estimates, be allocated to the Sprague River Road, Klamath Reservation, to be matched by a like amount by the State of Oregon. Likewise, the committee directs that \$30,000 be allocated as the Federal contribution toward completing the resurfacing and reshaping of the Nixon-Gerlach Road on the Pyramid Lake Indian Reservation, a part of the road between Reno and Gerlach.

IRRIGATION SYSTEMS

With reference to construction under the activity "Irrigation systems," the 1951 budget estimate is \$5,238,000, and the House allowed \$4,005,659. As noted above the committee recommends an increase of \$85,571 in this item to restore funds for irrigation systems in California. The increase proposed by the committee for construction irrigation systems, will provide a total appropriation for this purpose of \$4,091,230, or \$1,146,770 under the budget estimate. The committee directs that this reduction below the 1951 budget estimate be applied proportionately to all projects included in the estimate. The committee does not concur with the statement in the House report allocating the full budget estimate to the Wapato project, Washington, but directs that this project, likewise, take a proportionate reduction under the estimate.

LAND ACQUISITION

The committee recommends that the following provisos be added to the bill:

: Provided, That no part of the sum herein appropriated shall be used for the acquisition of land within the States of Arizona, California, Colorado, New Mexico, South Dakota, Utah, and Wyoming outside of the boundaries of existing Indian reservations: Provided further, That no part of this appropriation shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, and Washington either inside or outside the boundaries of existing reservations

The foregoing provisions were in the law for the fiscal year 1950 but were not included in the 1951 budget estimates. It is the recommendation of the committee, however, that this language be included in the 1951 Interior Department Appropriation Act.

GENERAL ADMINISTRATION

The 1951 budget estimate is \$4,535,000. The House allowed \$3,500,000, and the committee recommends an increase of \$144,000 to provide a total appropriation of \$3,644,000. The amount recommended by the committee is \$891,000 under the budget estimate.

Of the increase recommended, \$65,000 is earmarked for departmental office, and \$79,000 is a restoration of funds eliminated by the House for administration of the Bureau's program in the State of California. The House eliminated a total of \$100,000 under this

appropriation due to the elimination of funds for California Indians in other Indian Bureau appropriations. The restoration recommended by the committee of funds for administration of the Bureau's program in California applies the same reduction as the House applied to other budgeted items under this appropriation.

Administrative Provisions

PURCHASE OF PASSENGER MOTOR VEHICLES

The committee recommends that the following language in the bill be amended as indicated:

purchase (not to exceed two hundred and twenty-seven two hundred and fifty, of which two hundred and twenty shall be for replacement only) and hire of passenger motor vehicles, which may be used for the transportation of Indians:

The budget estimate proposed authority for the purchase of 327 passenger motor vehicles. The House granted authority for the purchase of 227, and the committee recommends that this number be increased by 23 to provide a total of 250.

TRIBAL FUNDS

The 1951 estimate for funds to be made available from tribal funds is \$2,393,965. The House increased this amount to \$2,430,965 upon request of certain Indian tribes. The committee recommends that this amount be increased by an additional \$7,000 to provide for an agricultural extension agent requested by the Umatilla Indians.

The committee recommends that the following language be deleted from the bill:

: *Provided*, That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary. Any tribal funds advanced under this authority shall be reported to the Congress in the annual Budget for the next succeeding fiscal year

The committee does not believe that this authority should be delegated for the advancing of additional funds from Indian tribal accounts. It seems that in the regular Interior Department appropriation bill and the various deficiency appropriation bills that ample opportunity is accorded for requests to be presented to Congress for appropriations from tribal funds.

LIMITATION ON LAND ACQUISITION

The committee recommends that the following proviso be added to the bill:

: Provided further, That no part of this appropriation shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, and Washington either inside or outside the boundaries of existing Indian reservations

Similar limitations have been carried in prior Interior Department appropriation acts, and although this language is not contained in the 1951 budget estimates, the committee recommends its inclusion in the 1951 bill.

BUREAU OF RECLAMATION

The House considered total budget estimates for the Reclamation Bureau of \$353,873,500 and allowed appropriations totaling \$325,-108,000, or \$28,765,500 less than the 1951 budget estimates.

Subsequent to passage of the bill by the House, two supplemental estimates were received by the Senate, totaling \$5,445,000, increasing the 1951 budget estimates to \$359,318,500.

Of the total regular and supplemental estimates, \$359,318,500, the committee has approved appropriations totaling \$324,104,000, which amount is \$1,004,000 under the House allowance of \$325,108,000, and \$35,214,500 under the 1951 budget estimates. The total of \$324,-104,000 recommended by the committee is \$32,650,510 less than appropriations to the Reclamation Bureau for the fiscal year 1950, exclusive of Pay Act increases and deficiencies.

The committee directs the Bureau of Reclamation to continue its improvement of programing by realistic estimating in support of appropriations before the Congress. The budget presentation should be strengthened by estimates that fully reflect cost trends and other variable factors, such as competition among contractors, to the greatest extent practicable so that the Congress will at all times have the benefit of the Bureau's knowledge of construction work in Western States. Programing of construction work must be founded on historical costs shown by the accounts; and estimates of future work should be founded on careful estimates of actual quantities priced to reveal current cost trends.

NEW APPROPRIATION STRUCTURE

Under the new appropriation structure presented for the Interior Department, it is provided that all funds for construction of reclamation projects be appropriated in a single appropriation item. Heretofore Congress has specified in the Appropriation Act the amount of funds to be available for each project. In approving the new appropriation structure, the committee is relying upon the assurance which the Secretary has given that funds will be allocated in accordance with the intent of Congress in granting the appropriations. It is recognized, however, that some flexibility will be necessary in order to achieve the advantages intended to flow from the revised appropriation structure in meeting variable and changed operating conditions. In order that unforeseen needs may be met, the committee is agreeable to the Secretary making minor adjustments required by changed operating conditions. It is understood that this authority for administrative adjustment in the use of funds will not permit undertaking construction of new major facilities not previously approved by Congress, the allocation of funds for purposes contrary to the expressed intent of Congress, or the transfer of funds from one project to accelerate the work of another project at a rate not contemplated in the program as submitted to Congress.

COOPERATION WITH WESTERN STATE COLLEGES AND DEPARTMENT OF AGRICULTURE

The committee has noted that continued progress is being made on the program of cooperation of the Reclamation Bureau with western land-grant colleges and the Department of Agriculture, agencies concerned with the agricultural phases of the reclamation program, in accordance with the instructions on page 20 of Report No. 661 on the Interior Department appropriation bill, 1950. The Bureau is expected to take the leadership in advancing these cooperative endeavors in order to avoid duplication of personnel and expense and to bring to bear on the planning, construction, operation, and development of reclamation projects the best skills in the colleges and the Government service.

GENERAL INVESTIGATIONS

For general investigations, the 1951 budget estimate is \$7,800,000. The House allowed an appropriation of \$5,150,000.

The committee has allowed \$6,500,000, which amount is \$1,350,000 over the House figure, but which is \$1,300,000 less than the 1951 budget estimate. Of the \$6,500,000 recommended by the committee, \$1,021,000 is to be used for advance planning of authorized projects. Of the \$6,500,000, \$5,791,000 is to be derived from the reclamation fund and \$500,000 from the Colorado River development fund.

The reduction proposed by the committee under the 1951 estimate has been proportionately applied to the various activities under this appropriation. The amounts recommended by the committee for the several activities under this appropriation are as follows:

 (1) Engineering and economic investigations. (2) Alaskan investigations. (3) Advance planning. (4) Investigation of existing projects. 	$\$5, 048, 000 \\ 209, 000 \\ 1, 021, 000 \\ 222, 000$
- Total appropriation	6, 500, 000

Within the amount of funds recommended for advance planning the committee has included the Middle Rio Grande project, New Mexico, as proposed in the 1951 budget estimates rather than including it under the activity "Engineering and economic investigations" as proposed by the House. The several projects included under the activity "Advanced planning" would be reduced in proportion to the amount funds for this activity have been reduced by the committee under the 1951 estimate.

Request was made of the committee for an appropriation under "General investigations" for studies of water conservation and development plans in Hawaii, as well as for language to be included in the bill enabling this work to go forward. The committee has not approved these requests. However, out of funds available to the Department, the committee recommends that a report be made to Congress by the Department by next year, setting forth the Department's recommendations as to the nature of the program it would be practicable and economical for the Reclamation Bureau to carry out in Hawaii.

CONSTRUCTION AND REHABILITATION

For construction and rehabilitation the House allowed \$297,467,000, or \$23,054,500 less than the total budget estimates of \$320,521,500 considered by the House.

Including \$5,445,000 in supplemental estimates, the committee considered for construction and rehabilitation total budget estimates of \$325,966,500 and has approved a total of \$294,713,000, which amount is \$2,754,000 less than the total approved by the House and \$31,253,500 less than the 1951 estimates for construction.

COMPARATIVE TABLE ON PROJECTS

The following table sets forth the 1951 budget estimate for each project, the amount allowed by the House for each project, and the amount in each instance approved by the Senate committee:

Includes total of \$5,445,000 in supplemental estimates sent to the Senate after bill had passed House.

⁴ Does not include any action by House on \$5,445,000 in supplemental estimates sent to Senate after bill had passed House.

⁵ Includes supplemental estimate of \$2,445,000 in S. Doc. 154. ⁶ Plus contract authorization of \$3,000,000, and includes \$3,000,000 cash estimate contained in S. Doc. 154.

⁷ Plus contract authorization of \$3,000,000, and includes total of \$5,445,000 in supplemental estimates sent to Senate after bill passed House.

CENTRAL VALLEY PROJECT, CALIFORNIA

The 1951 budget estimate for the Central Valley project in California is \$49,513,000. The House allowed an appropriation of \$45,-063,000. In view of the delays encountered in certain features of this project as well as the better bids received in recent months, the estimated carry-over of unobligated funds into the fiscal year 1951 is approximately \$12,528,276, which is larger than was anticipated earlier in the year. The committee, therefore, has approved the House reduction of \$4,450,000 and recommends a further reduction of \$2,000,000, which will provide an appropriation of \$43,063,000. With the estimated carry-over of approximately \$12,528,276 this will

143

provide a fund availability of about \$55,591,276 in the fiscal year 1951 for this project.

The committee does not concur with the House in eliminating an item of \$750,000 for work on the Folsom power plant and the afterbay power plant and power-plant switchyards. Within the over-all amount of funds approved by the committee for the Central Valley project, the committee directs that the amount of \$750,000 included in the 1951 estimate be allocated to initiating this work. The estimated requirements for the Folsom power facilities as set forth in the 1951 program are as follows:

Power-plant tunnel:	
Major contracts	\$200,000
Land rights	10,000
Engineering and general expense (design)	490,000
Switchyard	10,000
Nimbus alterbay power plant:	
Engineering and general expense (design)	35,000
Switchyard	5,000
Total	750,000

The committee has not restored to the bill the following items eliminated by the House from the 1951 budget estimate:

(1)	Delta steam plant and switchyard	\$2, 000, 000
(2)	Elverta switchyard	500,000
(3)	Keswick-Tracy via Elverta 115-kilovolt line	300, 000
	Folsom-Elverta via Roseville 115-kilovolt line	500,000
(5)	Tracy-Patterson 69-kilovolt lineSubstations:	
(0)	Roseville	150,000
	Patterson	50,000
	Vernalis	50, 000

COLORADO-BIG THOMPSON PROJECT, COLORADO

For this project the House allowed \$20,772,000, or \$928,000 less than the 1951 budget estimate of \$21,700,000. In making this reduction the House eliminated the following items:

(2)	Estes-Leyner-Plains 115-kilovolt line and substation Leyner substation Brighton-Hoyt-Brush portion of Flatiron-Leyner-Brighton-Brush	\$160, 000 264, 000
	115-kilovolt line and substation	504, 000
	Total House reduction	928, 000

The committee concurs with the House in the elimination of items (1) and (2) above. However, the committee does not concur with the House in its elimination of the Brighton-Hoyt-Brush portion of the Flatiron-Leyner-Brighton-Brush 115-kilovolt line and substation but has approved inclusion of this line in the 1951 program.

The committee recommends an increase of \$228,000 in the Colorado-Big Thompson appropriation to provide a total of \$21,000,000. With the estimated carry-over into the fiscal year 1951 of unobligated funds of approximately \$1,000,000 the total fund availability for this project will be about \$22,000,000. Within this over-all amount, the Bureau will have sufficient funds to allocate \$504,000 to the Brighton-Hoyt-Brush portion of the Flatiron-Leyner-Brighton-Brush 115-kilovolt line and substation.

FORT PECK PROJECT, MONTANA

The 1951 budget estimate for this project is \$1,743,000, including \$1,400,000 as an additional amount for the construction of the Havre-Shelby transmission line and substations.

The committee has not approved the request for an additional appropriation of \$1,400,000 for the Havre-Shelby transmission line and substations, and, in addition, the committee recommends that all of the unobligated balance of the \$1,300,000 appropriated in the fiscal year 1950 for these facilities not required by the Reclamation Bureau to terminate at once its work on these facilities and meet existing obligations be rescinded.

The funds appropriated in the fiscal year 1950 were appropriated with the understanding that the funds would not be used by the Bureau if a wheeling agreement could be entered into with the Montana Power Co. whereby the REA's in the area involved could be supplied with power at the Reclamation Bureau rate. Such a wheeling agreement was not entered into and testimony at the Senate hearing this year was to the effect that the Reclamation Bureau felt it should build these facilities even though a wheeling agreement should be entered into with the Montana Power Co. On April 12, 1950, the Montana Public Service Commission approved a 5½ mills per kilowatt-hour rate for all REA's on the Montana Power Co. system, which rate is identical with the rate offered REA's by the Reclamation Bureau. Inasmuch as any savings to REA's in Montana resulting from the construction of the Havre-Shelby transmission line and substations by the Reclamation Bureau have been met by the new REA rate of the Montana Power Co. approved by the Montana Public Service Commission, the committee does not believe the Reclamation Bureau should continue its work on these facilities, which was only recently begun. The committee, accordingly, has deleted from the bill the \$1,400,000 additional requested by the Reclamation Bureau for these facilities and recommends inclusion in the bill of the following paragraph:

Such amount of the \$1,300,000 appropriated in the Interior Department Appropriation Act, 1950, under the heading "Bureau of Reclamation", "General Fund, Construction", "Fort Peck project, Montana", for the Havre-Shelby transmission line and substations as may be determined by the Secretary of the Interior not to be required for termination of work on these facilities and the meeting of obligations heretofore incurred against said appropriation for such facilities shall be carried to the surplus fund and covered into the Treasury.

PROVO RIVER PROJECT, UTAH

The regular 1951 budget estimate for this project is \$2,151,000, which the House allowed, but which the committee recommends be reduced by \$200,000. The committee has approved a supplemental budget estimate contained in Senate Document No. 186 in the amount of \$2,445,000 for work in connection with two major features of this project, namely, the Duchesne Tunnel and the terminal reservoir of the Salt Lake Aqueduct Division. The total appropriation recommended by the committee for the Provo River project, including the supplemental estimate of \$2,445,000, is in the amount of \$4,396,000.

69452-50-10

BOULDER CANYON PROJECT, ARIZONA-NEVADA

The budget estimate for the completion of the gymnasium and shop facilities for the Boulder City Junior-Senior High School is \$350,000. Although the committee recommends a reduction of \$500,000, in the 1951 appropriation for the Boulder Canyon project, Arizona-Nevada, to provide a total appropriation of \$6,100,000 in lieu of the House figure and budget estimate of \$6,600,000, the committee directs that no part of this reduction shall apply to the \$350,000 allocated in the 1951 budget estimates for completion of the Boulder City school facilities.

YAKIMA PROJECT, KENNEWICK DIVISION, WASHINGTON

The committee concurs with the determination of the House Appropriations Committee on page 172 of its Report No. 1797 to the effect that the Kennewick Division of the Yakima project "is not a new project but is a part of the Yakima project."

COLUMBIA BASIN PROJECT, WASHINGTON

SCHOOL FACILITIES AT COULEE DAM, WASH., AND GRAND COULEE, WASH.

Within the total appropriation recommended by the committee for this project, \$49,500,000, which amount is \$4,000,000 less than the 1951 estimate and the House allowance, the committee has approved the amounts of \$25,000 for grade-school facilities and \$325,000 for high-school facilities at Coulee Dam, Wash., and recommends that proportionate amounts, based on the relative enrollment of the dependents of reclamation and contractor employees, be expended on school facilities at Grand Coulee, Wash., in accordance with Public Law 835, Eightieth Congress.

COLORADO RIVER FRONT WORK AND LEVEE SYSTEM, ARIZONA-CALIFORNIA

The committee recommends an appropriation of \$950,000 for this work in lieu of the budget estimate and House allowance of \$1,000,000. The appropriation is made with the understanding that an economical plan for continuance of service through the Yuma Valley Levee Railroad shall be worked out by the Reclamation Bureau, the International Boundary and Water Commission, and the Southern Pacific Railroad for the protection of and service to the Yuma project.

MISSOURI RIVER BASIN PROJECT

For the Missouri River Basin project, the regular 1951 budget estimate, including \$1,770,000 for liquidation of prior contract authority, is \$102,057,300. The House approved an appropriation of \$91,918,300, or \$10,139,000 less than the regular budget estimate.

After passage of the bill by the House, the Senate received a supplemental estimate in the amount of \$3,000,000 for the construction of transmission lines and substations in the State of South Dakota, thus increasing the total 1951 budget estimate to \$105,057,300. The committee has approved the \$3,000,000 supplemental estimate for the construction of transmission lines and substations in South Dakota, together with contract authority in the amount of \$3,000,000 for this purpose, and has approved the House allowance of \$91,918,300 with the following noted changes:

(1)	Amount allowed by House	\$91, 918, 300
(2)	Less deletion of amount allowed by House for Canyon Ferry Great Falls transmission line and substations	- 365, 000
105		91, 553, 300
(3)	Plus net increase for Jamestown unit, Missouri-Souris division, in transferring this project to phase A from phase B	+645,000
(4)	Total of regular estimate recommended Plus supplemental estimate recommended by committee	$92, 198, 300 \\ +3, 000, 000$
	Total appropriation recommended by Senate committee for Missouri River Basin	95, 198, 300

COMPARATIVE TABLE ON MISSOURI RIVER BASIN PROJECTS

With the exceptions noted above, the committee has approved the amounts allowed by the House as allocated by the Reclamation Bureau for the several phases and projects included within the Missouri River Basin. The following table sets forth the amount allowed by the House as allocated by the Reclamation Bureau for each project as well as the amount recommended by the Senate committee:

MISSOURI RIVER BASIN

MISSOURI RIVER BASIN-continued

¹ Includes \$105,000 in estimate and allowed by House under phase B. ² Includes \$3,000,000 for South Dakota REA transmission facilities contained in supplemental estimate, S. Doc. 154, sent to Senate after bill passed House. ³ Includes supplemental estimate of \$3,000,000, and in addition \$3,000,000

contract authority.

⁴ Transferred to phase A and total of \$750,000 recommended.

⁵ Includes \$3,000,000 supplemental estimate in S. Doc. 154; in addition \$3,000,000 contract authorization.

JAMESTOWN UNIT, MISSOURI-SOURIS DIVISION, MONTANA-SOUTH DAKOTA

The 1951 Budget estimate for this project under phase B (planning) is \$105,000. In view of the recent devastating floods in this area, the committee recommends that construction work on the Jamestown project be started at the earliest possible date. The committee, therefore, has approved the transfer of this project from phase B to phase A (construction) and recommends that the appropriation be increased from the House allowance of \$105,000 to a total of \$750,000.

TRANSMISSION DIVISION

The House eliminated funds for the following transmission lines and substations:

(1) Canyon-Ferry-Three Forks-Anaconda 115-kilovolt line and sub- stations	\$150,000
(2) Forsyth-Yellowtail section of the Miles City-Yellowtail 115-kilovolt lines and substations	125, 000
Total	275, 000

The committee concurs with the House in omitting the foregoing transmission lines and substations from the bill.

In addition, the committee recommends that \$365,000 included in the 1951 budget estimate and allowed by the House for the Canyon Ferry-Great Falls 115-kilovolt transmission line and substations be deleted. The committee expects the Reclamation Bureau and the Montana Power Co. to negotiate, giving appropriate weight to the

distances involved, a wheeling agreement for the disposal of Canyon Ferry power. If the facts show next year that the company has not acted in good faith, the committee will be willing to recommend appropriations for the construction of these facilities. The Montana Power Co. has given assurances that it will build the Canyon Ferry-East Helena section of the Canyon Ferry-Great Falls line and will include the right to use this line in the agreement being negotiated with the Reclamation Bureau for the use of the company's two existing 100,000-volt lines between Great Falls and East Helena.

SUPPLEMENTAL ESTIMATE FOR TRANSMISSION LINES AND SUBSTATIONS IN SOUTH DAKOTA

An increase of \$6,000,000 is recommended for transmission lines and related substations in the State of South Dakota; \$3,000,000 in cash for the fiscal year 1951 and \$3,000,000 in contract authority for use in the same fiscal year.

The budget estimate of \$3,000,000 was included in House Document No. 154, Eighty-first Congress, second session, communication from the President, dated April 12, to provide for the advanced construction of transmission lines in South Dakota for a partial loop as follows:

Sioux Falls to Brookings to Watertown, and Fort Randall to Armour and Sioux Falls, with substations at principal load centers at Brookings, Watertown, and Armour.

It was pointed out to the committee that a number of REA cooperatives in South Dakota are in urgent need of additional electric power which can only be made available at required points by the construction of a transmission loop east of the Missouri River, a line from Fort Randall to Winner, S. Dak., and a segment of the Oahe-Rapid City line between Midland and Rapid City, S. Dak. The East River loop and the Fort Randall-Winner line may be energized from additional capacity which will be made available at Sioux Falls either by the construction of a steam plant by the cooperatives, or obtaining surplus capacity from the Northern States Power Co. or the Northwestern Public Service Co. The Fort Randall-Winner line may also be energized from the Nebraska power system. The additional source of power for the Rapid City-Midland section of the Rapid City-Oahe line will be the system of the Black Hills Power & Light Co.

This advanced construction involves 556 miles of line for the East River loop, 80 miles from Fort Randall to Winner, and 109 miles from Rapid City to Midland. These proposed lines will fit readily into the ultimate development of the Bureau of Reclamation's plan to dispose of power to be generated on the Missouri River Basin project. Earlier construction will permit interim relief to cooperatives badly in need of power until project generation will be available from Fort Randall Dam in fiscal year 1954.

In view of the urgent situation, the committee has recommended that the Bureau initiate construction of all phases of the advanced construction program consisting of the entire East River loop, the Fort Randall-Winner line, and the Rapid City-Midland section in fiscal year 1951.

The language recommended by the committee proposing contract authority in the amount of \$3,000,000 is as follows:

, and in addition thereto the Commissioner of Reclamation is hereby authorized to incur obligations and enter into contracts for additional work, materials, and equipment in an amount not exceeding \$3,000,000 for power transmission lines and substations in the fiscal year 1951

The committee recommends that the following language inserted in the bill on the House floor be deleted:

: *Provided*, That \$1,000,000 of the funds provided in this paragraph for the construction of transmission lines in South Dakota shall be available only for connecting the load centers of Armour with Watertown via Sioux Falls, and of Midland with Rapid City, and of Winner with Randall Dam

The committee recommends that the following language be added to the bill:

: Provided further, That \$3,000,000 of the funds provided in this paragraph plus \$3,000,000 contract authority shall be available for construction of transmission lines and substations in South Dakota, to include a transmission loop from Fort Randall through the load centers of Armour, Huron, Aberdeen, Andover, Watertown, Brookings, Sioux Falls and Gavins Point to Fort Randall, and lines from Fort Randall to Winner and from Rapid City to Midland.

SHOSHONE EXTENSION UNIT AND HANOVER UNIT, BIG HORN DIVISION, WYO.

These two units are now in phase B (planning). Request was made of the committee to transfer these units in fiscal year 1951 to phase A for construction. The committee has not approved this request but recommends to the Bureau of Reclamation that in preparing its estimates for the fiscal year 1952 the Bureau submit its recommendations for transfer of these two units of the Big Horn division to phase A.

KEYHOLE DAM, WYO.

The 1951 estimate for this project appears under phase A in the amount of \$3,179,000, which has been allowed by the committee. However, representations have been made to the committee that the water supply on the Belle Fourche River is such that under the Wyoming-South Dakota compact of February 18, 1943, it may be difficult to fill this proposed reservoir. Under the terms of the compact between the two States, there is no limitation upon the number of small reservoirs which may be built in Wyoming. It is the opinion of the committee that a comprehensive study of the future water supply should be made before construction is undertaken.

LA PRELE DAM, WYO.

In the 1950 Interior Department Appropriation Act, the Congress included language which corrected the inadvertent omission of the La Prele unit of the Missouri River Basin project from Senate Document 191, Seventy-eighth Congress, approved by the Congress in the Flood Control Act of 1944. In order to remove any question about the intention of the Congress to approve this unit as an integral part of the Missouri Basin development, the committee recommends inclusion of the the same language in the Interior Department appropriation bill for the fiscal year 1951 so that investigations may be concluded and the unit, which is badly in need of rehabilitation, brought into construction as rapidly as possible.

The language in the 1950 act, which the committee recommends be included in the pending bill, reads as follows:

and emergency reconstruction of the La Prele unit, Wyoming

OPERATION AND MAINTENANCE

The House allowed for operation and maintenance an appropriation of \$15,491,000, of which \$12,001,400 is to be derived from the reclamation fund and \$1,808,000 is to be derived from the Colorado River Dam fund. The House has also included in the bill a provision making advances by water users available for operation and maintenance purposes. The committee recommends no change in this appropriation. With the exception of \$746,300 included in this appropriation for soil and moisture work on lands under the jurisdiction of the Reclamation Bureau and \$894,000 for operation of the Colorado River front work and levee system, both of which items have been consolidated in this appropriation for the fiscal year 1951, funds appropriated under this heading are reimbursable, being collected from the water users and the sale of power.

GENERAL ADMINISTRATIVE EXPENSES

For general administrative expenses of the Bureau of Reclamation, the House allowed \$7,000,000 of the 1951 budget estimate in the amount of \$7,800,000. The committee recommends that this amount be increased by \$400,000 to provide an appropriation of \$7,400,000.

Heretofore general administrative expenses of the Bureau, including the departmental and Denver offices, and the regional offices, have been financed both out of an appropriation for such expenses and the charging of certain of these expenses to project appropriations. The 1951 budget estimates consolidate the funds for these administrative expenses under the heading "General administrative expenses."

The committee instructs the Commissioner of Reclamation to continue his examination of the Bureau's payrolls and personnel requirements with a view to reducing the overhead and other personnel expenditures so as to bring the personnel costs and employment of the Bureau closely in line with the program requirements. The organizational set-up of the Bureau of Reclamation should also be examined with a view to regional and other field consolidations where the program fails to justify maintenance of existing offices in order to reduce personnel and other expenditures. The committee expects a report at the next session of Congress as to what has been accomplished along this line.

The committee recommends that the following language, placing a limitation of not exceeding \$150,000 on funds to be available for salaries and expenses in connection with information work, which has been included in the Interior Department Appropriation Act for several years, be included in the bill:

: Provided further, That not exceeding \$150,000 of funds available for expenditure under this appropriation shall be used for salaries and expenses in connection with information work

Administrative Provisions

CONSULTANT SERVICES AND RATES FOR INDIVIDUALS

The committee recommends that the following provision be stricken from the bill:

not to exceed \$75,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), including such services at rates for individuals not to exceed \$100 per day, when authorized by the Secretary

and that the following be inserted in lieu thereof:

services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates for individuals not in excess of \$100 per diem (not exceeding \$100,000 for individuals)

The language recommended by the committee provides for the employment of temporary or intermittent services of experts or consultants or organizations thereof as authorized by section 15 of the act of August 2, 1946, and in the case of individuals fixes a maximum rate of not to exceed \$100 per diem, placing a limitation of \$100,000 on the amount that can be used for the employment of individuals under section 15 of the act of August 2, 1946.

PERSONNEL FOR NEGOTIATION AND ADMINISTRATION OF INTERSTATE COMPACTS

The committee recommends that the following language be added to the bill:

payment, except as otherwise provided for, of compensation and expense of persons on the rolls of the Bureau of Reclamation appointed as authorized by law to represent the United States in the negotiation and administration of interstate compacts; and, without reimbursement or return under the reclamation laws;

The provision recommended by the committee is necessary in order to clarify the authority of the Reclamation Bureau to pay the salaries and expenses of representatives of the Government on interstate compact commissions appointed as prescribed by law in the same manner as in the case of the Geological Survey with respect to the Arkansas River compact.

PAYMENTS TO SCHOOL DISTRICTS

The committee recommends that the following provision in the bill be amended as indicated:

payments to school districts as authorized by law (43 U. S. C. 385a and 618 (a) (e)), including payments on account of dependents of employees in field offices in project areas engaged in construction and related activities

The amendment proposed by the committee was contained in the Second Deficiency Appropriation Act of 1949 and also in the Interior Department Appropriation Act of 1950. The purpose of the proposed language is to clarify the intent of Congress in connection with the act of June 29, 1948 (Public Law 835), authorizing assistance to school districts for the education of dependents of persons employed on the actual construction of Federal reclamation projects. The committee, therefore, recommends that this provision be carried forward in the 1950 Interior Department Appropriation Act.

NONREIMBURSEMENT OF CERTAIN EXPENSES

The committee recommends that the following provision in the bill be amended as indicated:

performance of the functions specified under the head "Operation and Maintenance Administration", Bureau of Reclamation, in the Interior Department Appropriation Act, 1945, to be reimbursable to the extent therein provided;

The language proposed by the committee has been included in the Interior Department Appropriation Act since 1945. Expenses incident to the general administration of reclamation projects and to the sale of acquired lands, or interest therein, and public lands under

reclamation withdrawal, where permitted under the Federal reclamation law, are incurred primarily in furtherance of the general responsibility for Federal property and, therefore, are not properly assessable against water users as annual operation and maintenance costs. It is proper, therefore, that such activities, although relatively minor in nature, should continue to be reimbursable only to the extent provided in the Interior Department Appropriation Act of 1945.

STUDIES OF RECREATIONAL AREAS

The committee recommends that the following provision be deleted from the bill:

; and studies of recreational uses of reservoir areas, as authorized by law

and that the following provision, which was contained in the 1950 Interior Department Appropriation Act, be inserted in lieu thereof:

: Provided, That funds appropriated for the Bureau of Reclamation shall be available for expenditure through the facilities of the National Park Service in amounts of not to exceed \$25,000 for any one reservoir area for studies of recreational areas and planning for their utilization, and funds so expended shall not be reimbursable or returnable under the reclamation law

The foregoing limitation recommended by the committee is identical with the provision on studies of recreational areas in the 1950 Interior Department Appropriation Act. The provision is recommended again by the committee to remove any doubt as to the authority to plan for the recreational use of Federal reservoirs as well as to place a limitation on the amounts that may be expended for such studies and planning.

LIMITATION ON FUNDS FOR GENERAL ADMINISTRATIVE EXPENSES AND GENERAL INVESTIGATIONS

The committee recommends that the following proviso in the House bill be deleted:

: *Provided*, That no part of any appropriation made herein shall be available pursuant to the Act of April 19, 1945 (43 U. S. C. 377), for expenses other than those incurred on behalf of specific reclamation projects except \$7,000,000 under the head "General administrative expenses" and \$375,000 (\$175,000 for reconnaissance and \$200,000 for general engineering and research) under the head "General investigations"

and that the following be inserted in lieu thereof:

: Provided further, That, except as otherwise provided by the Act of April 19, 1945 (43 U. S. C. 377), or by any other law, no part of any appropriation made herein shall be available pursuant to the said Act of April 19, 1945, for expenses other than those incurred on behalf of specific reclamation projects except expenses under the head "General administrative expenses" and under the head "General investigations"

The committee recommends deletion of the limitation in the form proposed by the House inasmuch as the committee was advised that it would reduce to an impracticable minimum reconnaissance surveys, which are used largely to screen proposed investigations and thus to eliminate the necessity for many more detailed project investigations. Further, it was pointed out that the House provision would virtually eliminate basin-wide investigations carried on by the Reclamation Bureau. Question was also raised that the l'anguage might be construed as making expenditures of appropriations derived from the Colorado River Development Fund reimbursable.

TRANSFER OF EPHRATA AIR FORCE BASE

The committee recommends that the following paragraph be added to the bill:

TRANSFER OF EPHRATA AIR FORCE BASE

For the purpose of assisting in the construction, operation, and maintenance, and settlement programs on the Columbia Basin project in the State of Washington, the Armed Services, General Services Administration, or other Federal agency having ownership or custody thereof or interest therein, is authorized and directed to transfer to the Bureau of Reclamation, without reimbursement or transfer of funds, all of their right, tille, and interest to certain buildings, facilities, and equipment at the Ephrala Air Force Base, Ephrata, Wash., including the following buildings in accordance with block and building numbers: Block 800, building numbered 68; block 1900, buildings numbered 10, 11, 12, 13, 14, 16, 17; block 2000, four buildings numbered 75, two buildings numbered 56; block 3000, buildings numbered 66, 131, 58; block 2900, buildings numbered 56; block 3000, seven buildings numbered 66; block 3300, eleven buildings numbered 28; block 3400, seven buildings numbered 28; block 3500, buildings numbered 28; block 3400, seven buildings numbered 28; block 3500, buildings numbered 43, 46; block 5600, buildings numbered 34, 35, 36, 38, two buildings numbered 37; block 3700, buildings numbered 34, two buildings numbered 37; block 3800, buildings numbered 35, 38, 39, 42, two buildings numbered 37; block 4300, buildings numbered 19, 20, 21, 22; block 4400, buildings numbered 37; block 4300, buildings numbered 53, 40, 102, 101, 103, 105, 107, 111, two buildings numbered 32, five buildings numbered 116, one water tank numbered 115, one well, one flag pole numbered 118, two agrabage racks numbered 155, wo garbage racks numbered 158, one wash rack numbered 63, two grease racks numbered 62, and sever system, water lines, electric-power lines, railroad spur and siding, road improvements, and all other facilities and equipment incident to the foregoing property, and including land and rights-of-way formerly under Reclamation withdrawal to other federally owned land on which said buildings are situate, which have heretofor

The foregoing language authorizes and directs the transfer to the Reclamation Bureau, without reimbursement or transfer of funds, of certain property, buildings, facilities, and equipment at the Ephrata Air Force Base, Ephrata, Wash., which have been declared surplus. These facilities have been occupied by the Reclamation Bureau in connection with the Columbia Basin project since the air base at Ephrata was deactivated, and the record shows that the transfer to the Reclamation Bureau is agreeable to the Air Force. The buildings and other facilities are needed by the Bureau in connection with the Columbia Basin project, the irrigation headquarters of which are located at Ephrata. Precedent for the transfer to the Reclamation Bureau of buildings and facilities located on Reclamation withdrawn land, which have been declared surplus to the needs of the Armed Forces or other war agencies, has been established in previous appropriation acts. The recommendation for transfer of the Ephrata Air Force Base is in accord with this precedent.

GEOLOGICAL SURVEY

SURVEYS, INVESTIGATIONS, AND RESEARCH

Including a supplemental budget estimate of \$275,000 received by the Senate after the bill passed the House, the total 1951 estimate for surveys, investigations, and research of the Geological Survey is \$20,275,000.

Based on the regular 1951 estimate of \$20,000,000, the House allowed an appropriation of \$19,129,000, or \$871,000 less than the estimate. The committee recommends approval of the House action on the regular budget estimate.

With respect to the supplemental budget estimate of \$275,000 contained in Senate Document 157, the committee has approved \$253,000 of the amount requested. This increase is to provide funds for water resources investigations in connection with the upper Colorado, the Arkansas, and the Pecos River compacts, which were approved by Public Laws 37, 82, and 91, Eighty-first Congress.

The increase of \$253,000 recommended by the committee will provide a total appropriation of \$19,382,000, which amount is \$893,000 less than the 1951 budget estimate.

The distribution by activities of the \$19,382,000 appropriation is as follows:

(2)	Topographic surveys and mapping Geologic and mineral resource surveys and mapping	\$7, 800, 000 4, 445, 000
(3)	Water resources investigations, including \$253,000 of \$275,000 supplemental budget estimate	5, 453, 000
	Soil and moisture conservation	41,000
(6)	Classification of landsSupervision of mining and oil and gas leases	328,000 850,000
(7)	General administration	465, 000
	Total appropriation	19 382 000

BUREAU OF MINES

CONSERVATION AND DEVELOPMENT OF MINERAL RESOURCES

The 1951 budget estimate for this appropriation is in the amount of \$18,202,400. The House allowed an appropriation of \$17,758,000. The committee recommends approval of the House allowance, which is \$444,400 under the 1951 budget estimate.

The breakdown of the \$17,758,000 appropriation is as follows:

(1)	Fuels:	
	(a) Coal	\$2, 030, 207
	(b) Petroleum and natural gas	1, 117, 827
	(c) Synthetic liquid fuels	
	(d) Helium	95, 050
(2)	Minerals and metals:	
	(a) Ferrous metals and alloys	1, 903, 770
	(b) Nonferrous metals	2, 687, 158
	(c) Nonmetallic minerals	
	(d) Mineral research unclassified	376, 479
(3)	Control of fires in inactive coal deposits	488, 926
	Total appropriation	17, 758, 000

COAL

SAMPLING AND INSPECTION OF FUEL FOR GOVERNMENT AGENCIES

Out of the recommended appropriation of \$2,030,207 for "Coal," the committee directs that an increase of \$30,000 over the amount appropriated for the fiscal year 1950 be allocated to the sampling and inspection of fuel for Government agencies. The Federal purchase of coal totals approximately \$60,000,000 annually. Without additional funds in the fiscal year 1951, it will not be possible for the Bureau to

reduce the present backlog of over 500 unsampled mines, leaving Federal purchasing agencies without adequate data on which to base awards for Government purchases of coal.

For the fiscal year 1950, \$36,375 was available for sampling and inspection of fuel for Government agencies. Under the committee's direction that \$30,000 additional be used during the fiscal year 1951, a total of \$66,375 will be available for this work.

HEALTH AND SAFETY

The House allowed \$3,805,000 for this appropriation, and the committee recommends no change in this figure, which is \$95,000 less than the 1951 budget estimate.

The distribution of the \$3,805,000 appropriation by activities is as follows:

 Investigation of accidents and r Mine inspections and investigat Explosives and explosions testing 	ions	$\begin{array}{c} \$790, \\ 2, 539, \\ 474, \end{array}$	208
Total appropriation		2 905	000

Total appropriation _____ 3, 805, 000

CONSTRUCTION

In the appropriation for "Construction," the committee recommends a reduction of \$104,500 in the House figure. Of the budget estimate of \$1,797,600, the House allowed an appropriation of \$1,372,600, or \$425,000 less than the estimate. The committee recommends an appropriation of \$1,268,100, which is \$104,500 under the amount approved by the House and which is \$529,500 under the 1951 Budget estimate.

The breakdown of the \$1,268,100 appropriation proposed by the committee is as follows:

Synthetic liquid fuels Cash for liquidation of prior-year contract authorization	\$718, 550,		
Total appropriation	1, 268,	100	

GENERAL ADMINISTRATIVE EXPENSES

For "General administrative expenses" of the Bureau of Mines, the 1951 budget estimate is \$1,308,700. The committee recommends approval of the House allowance, \$1,300,000, which is \$8,700 less than the estimate. Including Pay Act increases, the 1951 base for this appropriation is \$1,308,700, the amount of the budget estimate. Thus, the amount approved by the committee is less than the actual base but the reduction can be absorbed during the fiscal year 1951.

Administrative Provisions

The committee recommends that the bill be amended as indicated:

purchase (not to exceed one hundred and forty-five one hundred and fifty, of which one hundred and forty-five shall be for replacement only) and hire of passenger motor vehicles;

The budget estimates proposed authority for the purchase of 155 passenger motor vehicles, of which 145 were to be for replacement only, and of which 10 were to be new automobiles. The House elim-

158

(1)(2)

inated the request for 10 new automobiles, and the committee recommends that provision be made for 5.

The 10 new automobiles were requested in connection with the full operation of the Lignite Research Laboratory, the Anthracite Research Laboratory, the program pertaining to coal-mining methods and reduction of losses, and the project for fuel-economy service for Government agencies. Under the committee's recommendation, five of these new automobiles may be obtained.

TRANSFER OF PROPERTY WITHIN THE BOUNDARIES OF THE FORT SNELL-ING GOVERNMENT RESERVATION IN HENNEPIN COUNTY, MINN.

The committee recommends that the following paragraph contained in the 1951 budget estimates be added to the bill:

The Veterans' Administration is authorized to transfer to the Department of the Interior, for the use of the Bureau of Mines, without compensation therefor, full jurisdiction, possession, and control of a parcel of forty-three acres, more or less, within the boundaries of the Fort Snelling Government Reservation in Hennepin County, Minnesota.

The committee was advised that the Veterans' Administration has agreed to transfer to the Department of the Interior, for use of the Bureau of Mines, without compensation therefor, full jurisdiction, possession, and control of approximately 43 acres within the boundaries of the Fort Snelling Government Reservation in Hennepin County, Minn. It was pointed out that the property is well situated for use by the Bureau of Mines for the establishment of a permanent storage depot for cores and samples of strategic mineral deposits that have been accumulated in the course of our strategic-minerals program, which is authorized by the Stock Piling Act of 1946. Due to the constant shifting of emphasis in the strategic minerals, the Bureau of Mines advises that it is necessary to keep such cores and samples available for restudy from time to time.

NATIONAL PARK SERVICE

MANAGEMENT AND PROTECTION

The committee recommends no change in the amount of the House allowance for this appropriation, \$7,688,700, which is \$166,300 less than the 1951 budget estimate of \$7,855,000.

By activities the \$7,688,700 appropriation is distributed as follows:

 Management of park and other areas	
Total appropriation	7, 688, 700

OCMULGEE NATIONAL MONUMENT, GA.

Out of the funds available to the National Park Service during the fiscal year 1951 under the appropriation "Management and protection," the committee directs that not to exceed \$9,000 be used for the employment of an archeologist at the Ocmulgee National Monument, Ga., including expenses in connection with the work of such archeologist.

159

MAINTENANCE AND REHABILITATION OF PHYSICAL FACILITIES

The 1951 budget estimate for this appropriation is \$7,470,000. The House allowed an appropriation of \$7,250,000. The committee recommends that this amount be increased by \$198,100 to provide a total appropriation of \$7,448,100, which amount is \$21,900 under the estimate.

Of the \$198,100 increase proposed by the committee, \$94,000 is for roads and trails and \$104,100 is for buildings and utilities.

The distribution of the \$7,448,100 appropriation by activities is as follows:

 (1) Roads and trails (2) Buildings and utilities 	\$3, 898, 000 3, 550, 100
Total appropriation	7, 448, 100

CONSTRUCTION

The House allowed \$20,542,000 for this appropriation, which amount is \$2,225,000 under the 1951 budget estimate of \$22,767,000. The committee recommends an increase of \$275,000 in this appropriation and decreases totaling \$1,150,000 to provide a total appropriation of \$19,667,000, which is \$875,000 less than the House allowance and which is \$3,100,000 less than the 1951 budget estimate.

The increase of \$275,000 approved by the committee is for acquisition of privately owned lands within the authorized boundaries of established national park areas.

Of the decrease of \$1,150,000 proposed by the committee, \$150,000 is for buildings and utilities, and \$1,000,000 is in the amount requested for liquidation of the prior contract authority of \$3,935,000 in connection with the Independence National Historical Park, Pa. The reduction recommended by the committee will leave contract liquidation funds in the amount of \$2,935,000, which the committee feels will be ample to meet 1951 requirements under this prior contract authorization.

The distribution of the \$19,667,000 appropriation recommended by the committee is as follows:

Construction and land acquisition:

N

 (1) Parkways	3,800,000 3,640,000
Subtotal	11, 732, 000
New cash for liquidation of prior-year contract authorization: (1) Parkways (2) Roads and trails (3) Acquisition of lands and water rights	3.250.000
Subtotal	7, 935, 000
Total appropriation for construction	19, 667, 000

Out of the funds approved by the committee in this appropriation for "Roads and trails," it is the direction of the committee that \$33,400 be allocated for the paving of 4.9 miles of road extending from the California State line to Scotty's Castle in Death Valley. This is a

comparatively small item and can be absorbed in the total funds approved by the committee for "Roads and trails."

INDEPENDENCE NATIONAL HISTORICAL PARK, PA.

The committee was advised that subsequent to submission of the 1951 budget estimates, an agreement was negotiated between the Interior Department and the city of Philadelphia, pursuant to section 2 of the act of June 26, 1948 (Public Law 795, 80th Cong.), under which the National Park Service will administer the Independence Hall group of historic structures, consisting of the Independence Hall, Congress Hall, Old City Hall, and associated historic objects. The city is desirous of turning the property over to the Federal Government at the earliest practicable date, and it is proposed that the National Park Service assume the obligation beginning January 1, 1951. To provide for operation and maintenance of this property by the National Park Service for the last half of the fiscal year 1951, beginning January 1, 1951, the committee recommends that the following provision be added to the bill:

: Provided further, That not to exceed \$150,000 of the funds available for the Independence National Historical Park, Pennsylvania, shall be available after January 1, 1951, for the management, protection, maintenance, and rehabilitation of Independence Hall, grounds, and structures in that Park

MUSEUM FOR THEODORE ROOSEVELT NATIONAL MEMORIAL PARK

The committee recommends that the following language be inserted in the bill, providing contract authority in the amount of \$100,000 for the construction of a public information building in the Theodore Roosevelt National Memorial Park, N. Dak.:

, and, in addition, the Secretary is authorized to incur obligations and enter into contracts, not exceeding a total of \$100,000 for the construction of a public information building in the Theodore Roosevelt National Memorial Park, North Dakota

In addition to general public use, this building will be used to house some of the effects of former President Theodore Roosevelt. The committee was advised that some of the Theodore Roosevelt associations and organizations are desirous of donating some of these effects when a suitable building to house them is constructed.

GENERAL ADMINISTRATIVE EXPENSES

For general administrative expenses of the National Park Service, the 1951 budget estimate is \$1,314,500. The committee recommends that the House allowance of \$1,264,500 be increased by \$50,000 to provide the amount of the estimate. The increase recommended is for departmental services and expenses and will provide a total of \$741,703 for this purpose, which is approximately 2 percent of the total 1951 appropriation recommended for the National Park Service. In view of the workload of the National Park Service since the war, the committee feels that this increase in departmental services and expenses is justified. The remainder of the appropriation recommended, \$572,797, is for regional office expenses.

69452-50-11

FISH AND WILDLIFE SERVICE

MANAGEMENT OF RESOURCES

The committee recommends a reduction of \$75,000 in this appropriation under the amount allowed by the House. In lieu of the House figure of \$7,157,000, which is the amount of the 1951 budget estimate, the committee recommends an appropriation of \$7,082,000.

The reduction of \$75,000 proposed by the committee is in the activity for mammal and bird reservations. For this work, the committee is recommending an appropriation of \$1,722,402 in lieu of the House figure and estimate of \$1,797,402.

The distribution by activities of the \$7,082,000 appropriation recommended by the committee is as follows:

(1)	Administration of fish and game laws	\$1, 582, 2	77
(2)	Propagation and distribution of food fishes	1, 996, 1	77
(3)	Mammal and bird reservations	1, 722, 4	02
	Pribilof Islands reservations and resources		06
(5)	River basin studies	214, 0	60
(6)	Control of predatory animals and injurious rodents	986, 5	27
(7)	Soil and moisture conservation	107, 1,	51
	m	7 000 0	00

Total appropriation 7, 082, 000

The committee recommends that the following provision be added to the bill:

and not to exceed \$30,000 for payment, in the discretion of the Secretary, for information or evidence concerning violations of laws administered by the Fish and Wildlife Service;

Language similar to the foregoing provision was included in the 1950 Interior Department Appropriation Act but was inadvertently omitted from the text of the 1951 budget language. The purpose of the committee amendment, therefore, is to continue the authority the Fish and Wildlife Service had under the 1950 act for making expenditures for information or evidence obtained by investigations concerning violations of laws administered by the Service for the protection of fish and wildlife.

INVESTIGATION OF RESOURCES

For the appropriation "Investigation of Resources," the 1951 budget estimate is \$3,900,000, which amount was approved by the House. The committee recommends an increase of \$225,000 in this appropriation to provide a total of \$4,125,000.

The distribution by activities of the \$4,125,000 appropriation recommended by the committee is as follows:

(2)	Exploration,	fish and fisheries development and utilization of fishery resources birds and mammals	1,	952, 665, 506,	185	
	Total	appropriation	4,	125,	000	

EXPLORATION, DEVELOPMENT, AND UTILIZATION OF FISHERY RESOURCES

The increase of \$225,000 recommended is in the activity "Exploration, development, and utilization of fishery resources" and is for the following two purposes:

	Freezing fish at sea experiments Exploratory fishing survey of bluefin tuna resources in the North	\$150, 000
(2)	Atlantic	75, 000
	Total increase recommended	225, 000

RESEARCH ON FISH AND FISHERIES

SARDINE (PILCHARD) RESEARCH

For the fiscal year 1950, \$87,000 was made available for sardine (pilchard) research. The 1951 budget estimate under the activity "Research on fish and fisheries" includes \$129,000 for this purpose.

Figures placed before the committee show that the tonnage of fish landed for commercial purposes between 1941 and 1946 ranged between 2,000,000 and 2,288,000 tons, having a value in 1946 of \$310,-000,000. From a high of 392,000 tons of sardines landed in the Monterey and San Francisco areas in 1941, the tonnage landed dropped to 19,000 tons in 1947, 55,000 tons in 1948, and 149,000 tons in 1949. The total tonnage of sardines landed in California dropped from a high of 631,000 tons in 1941 to 128,000 tons in 1947, 176,000 tons in 1948, and 300,000 tons in 1949.

The drop in the tonnage of sardines landed in the California area is out of proportion to the total commercial landings of fish, and the committee believes that greater emphasis should be placed on research and investigations directed toward increasing the commercial landings of sardines and stimulating this important part of the fishing industry in the United States. The committee directs that the Fish and Wildlife Service readjust its 1951 program under the appropriation "Investigation of resources" to such extent as may be necessary to allocate additional funds to sardine research in the Pacific area.

CONSTRUCTION

For this appropriation, the House allowed \$2,401,000, or \$25,000 in excess of the 1951 budget estimate of \$2,376,000. The committee recommends that this appropriation be increased by \$22,450 to provide a total appropriation of \$2,423,450.

The increase of \$22,450 proposed by the committee is to provide \$12,450 for water supply for the Easter pageant area located on the Wichita Mountain Wildlife Refuge in Oklahoma and \$10,000 for sanitation facilities at this area. It was represented to the committee that over 100,000 people attend the annual Passion Play during the Easter season at the so-called Holy City on the Wichita Mountain Wildlife Refuge. A total of \$42,450 was requested for improvements in this area. The committee has approved the two items noted above totaling \$22,450.

The distribution of the \$2,423,450 appropriation by activities is as follows:

 (1) Fish facilities
 \$1, 977, 500

 (2) Wildlife facilities
 445, 950

Total appropriation_____ 2, 423, 450

GENERAL ADMINISTRATIVE EXPENSES

For "General administrative expenses" of the Fish and Wildlife Service, the 1951 budget estimate is \$917,500, which amount was allowed by the House and which is recommended by the committee. In The 1951 base for this appropriation is \$902,933. Of the net increase of \$14,567 proposed in the 1951 estimates, \$8,000 is required for within-grade salary advancements.

MIGRATORY BIRD CONSERVATION FUND

The committee recommends that the following paragraph in the bill be deleted:

For carrying into effect section 4 of the Act of March 16, 1934, as amended (16 U. S. C. 718-718h), an amount equal to the sum received during the current fiscal year from the proceeds from the sale of stamps, to be warranted monthly and to remain available until expended.

and that the following language be inserted in lieu thereof:

For carrying into effect section 4 of the Act of March 16, 1934, as amended (16 U. S. C. 718–718h), amounts equal to the sums received during the current year and each fiscal year thereafter from the proceeds from the sale of stamps, to be warranted monthly and to remain available until expended.

The language recommended by the committee is contained in the 1951 budget estimates and makes available in an indefinite amount all moneys received from the sale of Federal hunting stamps pursuant to the Migratory Waterfowl Hunting Stamp Act of March 16, 1934, as amended (16 U. S. C. 718–718h). These funds are used for wildlife conservation, being expended on the basis of 90 percent for acquiring, restoring, and administering waterfowl habitats as inviolate refuges, and 10 percent for the enforcement of the various acts for the protection of migratory birds and expenses of the Post Office Department for engraving, issuing, and accounting for the stamps.

TERRITORIES AND ISLAND POSSESSIONS

Administration of Territories and Possessions

The budget estimate for this appropriation is \$4,052,600. The House allowed an appropriation of \$3,329,500. The committee recommends that the item for general administration be increased by \$62,680 to provide a total appropriation of \$3,392,180, which is \$660,420 under the 1951 estimate.

The committee has approved the following reductions made by the House in this appropriation: Virgin Islands, Governor's office, \$40,000 Guam, Governor's office, \$23,190, and grants, \$597,230.

CONSTRUCTION OF ROADS, ALASKA

For "Construction of roads, Alaska," the 1951 estimate is \$20,-400,000, including \$8,000,000 for liquidation of prior contract authority, and \$8,000,000 additional contract authority. The House approved these amounts.

The committee has approved the \$8,000,000 requested for liquidation of prior contract authorizations and the 1951 estimate of \$8,000,000 new contract authority.

However, in the items for preparation of plans, construction in progress, reconstruction, and new construction, the committee recommends a reduction of \$1,516,788 under the budget estimate and the House figure. The reduction of \$1,516,788 proposed by the committee in these items will provide a total appropriation for them of \$10,-883,212 in lieu of the budget estimate and House figure of \$12,400,000.

OPERATION AND MAINTENANCE OF ROADS, ALASKA

The committee recommends approval of the House action in reducing this appropriation by \$200,000 to provide \$2,600,000 in lieu of the budget estimate of \$2,800,000.

CLAIMS, ALASKA ROAD COMMISSION

The committee recommends that the following new paragraph be added to the bill:

CLAIMS, ALASKA ROAD COMMISSION

For payment of claims certified by the Comptroller General of the United States to be due for overtime compensation earned in 1945 and prior fiscal years under the provisions of section 23 of the Act of March 28, 1934 (48 Stat. 522), \$12,893, to remain available until June 30, 1952: Provided, That no part of the amount received by any claimant in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with any such claim, and the same shall be unlawful, any contract to the contrary notwithstanding, and any person violating this provision shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding \$1,000.

The 1951 budget estimate for this appropriation is in the amount of \$525,000. The committee has approved \$12,893 of this request, which is the amount required to pay claims already approved by the General Accounting Office.

CONSTRUCTION, ALASKA RAILROAD

The 1951 budget estimate is in the amount of \$31,000,000, of which \$17,000,000 is for liquidation of prior-year contract authority. The House approved the full amount of the estimate.

The committee recommends a reduction of \$2,300,000 in this appropriation, believing that the full amount for the completion of the Alaska Railroad rehabilitation program will not be required in the fiscal year 1951.

The total appropriation recommended by the committee is \$28,700,000 in lieu of the House figure of \$31,000,000.

COMPLIANCE WITH SENATE RESOLUTION 95 AGREED TO AUGUST

27, 1949

EXISTING LAW

PENDING BILL

On page 268:

C . 1

a

MIGRATORY BIRD CONSERVATION FUND

For carrying into effect section 4 of the act of March 16, 1934, as amended (16 U. S. C. 718–718h), amounts equal to the sums received during the current year and each fiscal year thereafter from the proceeds from the sale of stamps, to be warranted monthly and to remain available until expended.

SEC. 4. (a) Effective July 1, 1935, all receipts of the character theretofore credited to the appropriation accounts appearing on the books of the Government and listed in subsection (b) of this section shall be deposited into the Treasury as miscellaneous receipts, and amounts equal thereto are authorized to be appropriated annually from the general fund of the Treasury for the same purposes for which such receipts are now appropriated. Appropriations to which expenditures under such accounts have been chargeable theretofore are hereby repealed, effective on such date: *Provided*, That if the total of receipts for any one fiscal year for any of the foregoing purposes under this authority is greater than the amounts appropriated for such purpose, such excess is authorized to be appropriated for the following fiscal year.

(b) *

(Continuation of Sec. 4 (b), above) subsection (29): After June 30, 1936, migratory bird conservation fund * * *

INCREASES

The changes in the amounts of the House bill recommended by the committee are as follows:

Office of the Secretary:	
Standardization of geographic names	\$14,000

¹ Funds available from war claims fund, including administrative expenses as indicated. ² Includes supplemental estimates as follows: Civil Service Commission, salaries and expenses reduced from \$17,076,000 to \$16,560,000 in H. Doc. 461; National Capital Housing Authority reduced from \$39,600 to 0 in S. Doc. 169; Housing and Home Finance Agency, Office of the Administrator, increased from \$6,000,000 to \$6,590,000 in S. Doc. 181; Displaced Persons Commission increased from \$1,200,000 to \$10,000,000 in S. Doc. 193.

SUPPLEMENTAL ESTIMATES

Supplemental estimates considered by the committee are contained in House Document No. 461 and in Senate Documents Nos. 169, 181, and 193, changing the regular estimates for 1951 as follows: Increases:

Displaced Persons Commission Housing and Home Finance Agency, college loan program	\$8, 800, 000 590, 000
Total Less reductions:	9, 390, 000
Civil Service Commission \$516,000 National Capital Housing Authority 39,600	555, 600
Net increase	8, 834, 400

BUREAU OF THE BUDGET

The committee recommends a restoration of \$26,000. The reduction of \$100,000 from the budget estimate, made by an amendment on the floor of the House, was intended as a denial of the request for two additional regional offices, one to cover the Southeast and one to cover the Northeast. The committee agrees with the denial of the additional regional offices at this time, but is informed that the amount requested for the purpose is \$74,000 and that any further reduction would curtail the necessary operations of the Bureau.

In this connection, the evidence before the committee indicates that the Bureau in preparing the estimates for 1951 had cut the requests from the agencies by over 3.3 billion dollars, even after the President had set a target above which each agency was directed to make no request for funds. The committee believes that such efforts to economize should be fully supported in the national interest.

ATOMIC ENERGY COMMISSION

The committee recommends the deletion of the provision limiting the maximum amount which may be paid as a fee for community management services and for the operation of transportation systems. The committee believes that such provision would seriously interfere with the Commission's operations under the terms of existing contracts.

However, the committee is of the opinion that the present undemocratic method of running the towns of Oak Ridge, Richland, and Los Alamos should be discontinued as soon as practicable, giving due consideration to the security safeguards that may be involved and to the successful functioning of the Commission's program. The committee agrees with the Joint Committee on Atomic Energy that a definite timetable should be established for disengaging these towns from such community management and transportation contracts. Accordingly the committee, believing that it is essential to remove any basis for suit against the Commission, suggests to the Commission that as soon as practicable but not later than 60 days after the enact-

ment of this bill the required notice be given of 6 months for cancellation of contracts for community management and transportation services, and in the meantime that they begin negotiations for substituting for the present system of corporate community management a new system of community management based upon traditional principles of local community self-government.

CIVIL SERVICE COMMISSION

CIVIL-SERVICE RETIREMENT AND DISABILITY FUND

The House has allowed an appropriation of \$305,000,000 for the civil-service retirement and disability fund, instead of \$333,344,000 estimated by actuarial computation as the required contribution to the fund. In agreeing to the reduction of \$28,344,000 in view of the need to economize at this time, the committee calls attention to the fact that the appropriation of the reduced amount does not decrease the obligation of the Government, does not impair the solvency of the fund, and does not reduce in any way the payments to be made from the fund in 1951.

GENERAL SERVICES ADMINISTRATION

STRATEGIC AND CRITICAL MATERIALS

The committee recommends the deletion of the proviso limiting the amount that may be expended for the purposes of the Stockpiling Act of 1946 through purchase contracts negotiated with operators within the United States, its Territories and possessions. This provision was stricken because it places a limitation upon the legislative authority granted in the 1946 act, and it also contravenes the so-called buy American policy as stated in 1933. The policy of Congress in enacting the Stockpiling Act was to encourage the development of strategic and critical materials in the United States in order that in time of crisis we should not be dependent upon foreign sources of supply. The General Services Administration has authority of law to make advance payments on domestic contracts, and it is the belief of this committee, in view of the stated policy of the Congress, that the limitation imposed by this language should not exist, but that the General Services Administration should be free to acquire strategic and critical materials within the United States. A limitation of this character might easily rise to plague the national defense program during fiscal year 1951.

INTERSTATE COMMERCE COMMISSION

The committee recommends the restoration of the full budget estimate for the three appropriation items for the Interstate Commerce Commission. The committee believes that the important functions of this Commission should not be handicapped by lack of funds.

The committee is informed of the serious situation arising from car shortages and believes that the supervisory function performed by the Bureau of Service is of the utmost importance. It is the hope of the committee that, within the funds allowed, all possible supervision shall be carried out.

The committee is also informed that the workload in locomotive inspection has been increased and probably will continue to increase in consequence of the replacement of retired steam locomotives, largely of the older type, by Diesel-electric locomotives which require more time and meticulous effort than the inspection of a modern steam locomotive.

PHILIPPINE WAR DAMAGE COMMISSION

The committee recommends an addition to the proviso prohibiting payments to any person found guilty of collaborating with the enemy or of disloyalty, to allow the Commission to make findings in the absence of a finding by a civil or military court. The evidence before the committee shows that when the Philippine Government issued an amnesty proclamation there were approximately 23 claims involving charges of collaboration which had not been adjudicated by a civil or military court established by the Philippine Government to hear such cases. This amendment is designed to enable the Philippine War Damage Commission to hold hearings on such remaining claims, but is not intended to authorize the Commission to reopen any adjudicated cases.

UNITED STATES MARITIME COMMISSION

Reorganization Plan No. 21 of 1950, effective May 24, 1950, created the Federal Maritime Board and the Maritime Administration under the Department of Commerce and transferred to those agencies all functions of the United States Maritime Commission. In view of this reorganization and the resulting change in administrative setup, the committee agrees with the House reduction in the appropriation for salaries and expenses below the estimates in the belief that the reorganization plan will effect substantial economies in these expenditures. In the time available to the committee it was impossible to form any estimate of what the savings will be, but it is the hope of the committee that they will be substantial, and that under the new set-up it will be possible to eliminate the causes of the criticism which has been made in the past with respect to the operations of the United States Maritime Commission. It is not the intention of the committee to handicap the working of the new organization, however, and if experience demonstrates that the amount provided is not sufficient for proper operation, then the House and Senate Committees on Appropriations should be notified of the situation.

VETERANS' ADMINISTRATION

The committee has recommended the restoration of the full amount of the budget estimate for administration, medical, hospital, and domiciliary services. Persuasive evidence was submitted to the committee that increased appropriations will be essential to enable the Veterans' Administration to staff and operate the new hospitals which, having been constructed in accordance with the direction of the Congress, are now ready for opening. The demands for hospital service and out-patient care are not diminishing, and it is to be anticipated that an additional estimate will be received before the end of the session from the Bureau of the Budget.

In this connection, the committee believes the dental service available to the veterans is of prime importance and that the Administration should maintain such service at a high level.

INCREASES AND LIMITATIONS

The changes recommended by the committee in the amounts of chapter VIII of the House bill are as follows:

EXECUTIVE OFFICE OF THE PRESIDENT:

Bureau of the Budget_____

The increase recommended by the committee is to restore the reduction by the House below the 1950 level of operation. The total amount provided is \$3,412,000, which is \$74,000 below the budget estimate.

Philippine Alien Property Administration:

The committee recommends an increase of \$55,500 in the limitation for administrative expenses, to provide the full budget estimate of \$215,500.

CIVIL SERVICE COMMISSION:

Salaries and expenses_____

The increase recommended by the committee is a partial restoration of the House reduction and is intended to provide funds for improving the quality of the examining and placement work as well as to permit the auditing of positions in the classification review required under the Classification Act of 1949. The total amount provided is \$15,761,913, which is \$798,087 below the budget estimate as revised. The original budget estimate contained \$516,000, which was reduced by budget amendment based on the decrease in the estimated number of placements.

The committee also recommends that the amount of the limitation on funds for performing the duties imposed by the Hatch Act of 1940 be increased from \$50,000 to \$80,000.

Commission on Renovation of the Executive Mansion

The increase recommended by the committee is to provide more adequately for the supervisory work required by the Commission, including the frequent meetings found necessary by the architectural and engineering authorities involved in order to carry out the purposes of the act. The total amount provided is \$50,000 plus the reappropriation of \$30,000, or \$80,000, which is \$20,000 below the budget estimate.

DISPLACED PERSONS COMMISSION _____

The increase recommended by the committee is to provide for the increased expenditures required by Public Law 555, which authorized the admission to the United States of an additional 195,744 persons. The House had provided \$455,100 for liquidating expenses of the previous program. In providing a total of \$9,000,000, instead of the \$10,000,000 in the supplemental estimate, the committee invites the Commission to practice rigorous economy in carrying out the purposes of the new act.

The committee also recommends that the following be inserted in lieu of the section contained in the bill: Displaced Persons Commission: For expenses neces-

Displaced Persons Commission: For expenses necessary to carry out the provisions of the Displaced Persons Act of 1948, as amended by the Act of June 16, 1950 (Public Law 555), including personal services and rents in the District of Columbia; travel expenses without regard to the Standardized Government Travel Regulations, as

amended, and the rates of per diem allowances under the Subsistence Expense Act of 1926, as amended; purchase (not to exceed three), and hire of passenger motor vehicles; printing and binding, including printing and binding outside the continental limits of the United States without regard to section 11 of the Act of March 1, 1919 (44 U.S. C. 111); expenses incident to the primary and secondary education of American children who are dependents of Government personnel paid from this appropriation and stationed overseas; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); payment of tort claims pursuant to law (28 U. S. C. 2672); health service program as authorized by law (5 U. S. C. 150); employment of aliens; and payment of rent in foreign countries in advance; \$9,000,000: Provided. That allocations may be made from this appropriation by the Com-mission upon approval by the Bureau of the Budget to any department, agency, corporation, or independent es-tablishment of the Government for direct expenditure for the purposes of this appropriation, and any such expenditures may be made under the specific authority herein contained or under the authority governing the activities of the department, agency, corporation, or independent establishment to which amounts are allocated: Provided further, That the Commission may enter into agreements with international, governmental, and private agencies and may make payment in advance or by reimbursement for expenses incurred by such agencies in rendering assistance to the Commission in carrying out the purposes of this Act.

FEDERAL POWER COMMISSION:

Salaries and expenses...

The increase recommended by the committee is a partial restoration of the House reduction in order to provide for the increased activities due to the increase in natural gas work and the particular need for addi-tional legal services. The total amount provided is \$4,013,300, which is \$82,400 below the estimate. The committee also recommends that the amount of the limitation on funda for travel he increased from

of the limitation on funds for travel be increased from \$247,500 to \$256,500.

FEDERAL TRADE COMMISSION_____

The increase recommended by the committee is a partial restoration of the House reduction in order to provide funds for the preparation of an index of economic concen-tration and for legal investigation work. The total amount provided is \$3,916,695, which is \$308,305 below the estimate.

The committee also recommends that the following be stricken from the bill: to the Bureau of Trade Practice Conferences

The purpose of the recommendation is to conform to the intent of the House in earmarking funds for trade practice agreement work, and the change is required by a recent reorganization of the units of the Commission.

\$75,000

50,000

INCREASES AND LIMITATIONS-Continued

GENERAL SERVICES ADMINISTRATION:

Operating expenses _____

The General Services Administration in its present form was created by Public Law 152, otherwise known as the Federal Property and Administrative Services Act of 1949. Its purpose is, by improved managerial supervision of the agencies clothed with the responsibilities of procurement, construction, property utilization and records management, to effect economies and efficiency throughout the executive establishment. It was necessary, therefore, in the view of the committee to increase the allowance made by the House for operating expenses. The appropriation provided for this purpose is \$82,725,000, which is still \$2,000,000 below the budget estimate.

HOUSING AND HOME FINANCE AGENCY: Office of the Administrator

The increase recommended by the committee is to provide partial restoration of the House reduction in the amount of \$400,000, out of which the Alaska housing program is allowed the full estimate of \$74,000 and the balance is to be applied to the co-ordination and supervision work. The committee agrees with the House in the reductions made for slum clearance and for housing research. The total provided for the regular estimate is \$4,600,000, which

is \$1,400,000 below the estimate. In addition, an increase of \$300,000 is recommended by the committee, instead of the estimate of \$590,000, to provide for the beginning of the college loan program under the Housing Act of 1950, ap-proved April 20, 1950. The supplemental estimate is contained in S. Doc. No. 181. The committee further recommends that the fol-

lowing proviso be added to the bill:

: Provided further, That necessary expenses of in-spections of projects financed through loans to edu-cational institutions authorized by title IV of the Housing Act of 1950 shall be compensated by such institutions by the payment of fixed fees which in the aggregate in relation to the development costs of such projects will cover the costs of rendering such services, and expenses for such purpose shall be considered nonadministrative, and for the purpose of providing such inspections, the Administrator may utilize any agency and such agency may accept reimbursement or payment for such services from such institutions or the Administrator, and shall credit such amounts to the appropriations

or funds against which such charges have been made. The committee also recommends that the following section be added to the bill, to conform to the provision in the 1950 bill in order to prevent operating difficulties in the Government corporations involved:

SEC. 110. None of the sections under the head "Independent offices, General provisions" in this title shall apply to the Housing and Home Finance Agency, the Inland Waterways Corporation, or the Tennessee Valley Authority.

\$6, 225, 000

700,000

INCREASES AND LIMITATIONS—Continued

HOUSING AND HOME FINANCE AGENCY—Continued Public Housing Administration: Annual contributions

The committee is advised that the amount of \$7,500,000 allowed by the House would be inadequate for the old program and will leave nothing for the new program. The increase recommended is intended to correct that situation. The original estimate of \$28,000,000 was later revised to \$18,000,000, and the total provided by the increase is \$9,250,000. This reduced amount is provided with the understanding that, should the new program as it develops require additional funds, the agency may be expected to make adequate and proper showing of such requirements to the appropriations committees of the 82d Cong.

Administrative expenses_____

The increase recommended by the committee as a partial restoration is to provide more adequately for carrying out the new duties and responsibilities of the low-rent public housing program under the Housing Act of 1949. The total amount provided is \$11,500,000, which is below the estimate by \$1,500,000 and is below the amount allowed by the House committee by \$200,000.

NATIONAL ADVISORY COMMITTEE FOR AERONAUTICS: Salaries and expenses

The increase recommended by the committee as a partial restoration of the House reduction is to provide for restoring the research activity to the 1950 level of operation and in addition, within the funds allowed, to provide for new personnel required for design and engineering work under the Unitary Wind Tunnel Plan Act, for the staffing of new research facilities, and for a modest expansion of the research work at Wallops Island and Muroc stations. The total amount provided is \$44,225,630, which is \$1,874,370 below the estimate. The committee also recommends that the following

The committee also recommends that the following proviso be stricken from the bill: : Provided further, That no part of this appro-

: Provided further, That no part of this appropriation shall be available for the operation of a field office outside the continental or territorial limits of the United States

Construction and equipment.

The committee recommends that the amount of contract authorization be increased from \$10,000,000 to \$12,500,000.

NATIONAL CAPITAL HOUSING AUTHORITY

The increase recommended by the committee is to restore to the full amount of the budget estimate the funds provided by direct appropriation for the maintenance and operation of properties. A budget amendment was submitted in S. Doc. No. 169, reducing the estimate to zero in view of the authorization in section 507 of the Housing Act of 1950. The committee does not agree with such use of receipts from leases, sales or other sources, and accordingly provides the full estimate of \$39,600.

The committee also recommends that the following proviso be added to the bill:

: Provided further, That so long as funds are available from appropriations for the foregoing purposes, the provisions of section 507 of the Housing Act of 1950 (Public Law 475, Eighty-first Congress) shall not be effective

PHILIPPINE WAR DAMAGE COMMISSION.

The committee recommends that the following be added to the proviso prohibiting payments to any person found guilty of collaborating with the enemy or of disloyalty:

or, in the absence of such finding by such court, the Commission after hearing finds upon evidence that such person was guilty of such collaboration or act of disloyalty

SECURITIES AND EXCHANGE COMMISSION

The increase recommended by the committee is to provide for partial restoration of the reduction made by the House. The total amount provided is \$6,330,000, which is \$95,000 below the estimate.

SMITHSONIAN INSTITUTION:

Salaries and expenses.

\$163, 510

20,000

The increase recommended by the committee is to restore the full amount of the budget estimate of \$2,-770,000. The committee believes that the work of the Bureau of American Ethnology and of the Astrophysical Observatory are too important to be handicapped by lack of funds.

Paleontological investigations_____

The increase recommended by the committee is to provide for the investigations required by the act of August 15, 1949, to the extent the committee is advised such grants will be required in 1951. The amount provided is \$45,000 below the estimate, and the House allowed no funds for the work.

The committee also recommends that the following section be added to the bill:

Paleontological investigations: For payments to non-Federal agencies for cooperative paleontological investigations in accordance with the Act of August 15, 1949 (Public Law 228), to remain available until expended, \$20,000.

National Gallery of Art_____

The increase recommended by the committee is to restore the full amount of the budget estimate of \$1,200,000. The committee believes the Government is obligated to fully maintain, exhibit, and protect the works of art donated under the various deeds of trust involved.

Total increase, Smithsonian Institution ____

TARIFF COMMISSION

The increase recommended by the committee is to partially restore the reduction made by the House. The total amount provided is \$1,340,700, which is \$47,500 below the estimate.

TAX COURT OF THE UNITED STATES_____

The increase recommended by the committee is to restore the full amount of the budget estimate of \$826,900.

UNITED STATES MARITIME COMMISSION: Ship construction:

The committee recommends, in order to avoid any possible ambiguity of the provision inserted in the law last year, that the following proviso be stricken from the bill:

: Provided, That no part of this appropriation or contract authorization shall be used to start any new ship construction for which an estimate was not included in the budget for the current fiscal year, nor to start any new ship construction the currently estimated cost of which exceeds by 10 per centum the estimated cost included therefor in such budget unless the Director of the Bureau of the Budget specifically approves the start of such ship construction and the Director shall submit forthwith a detailed 42,000

and that the following be inserted in lieu thereof:

: Provided, That no part of this appropriation or contract authorization shall be used (1) to start any new ship construction for which an estimate was not included in the budget for the current fiscal year or (2) to start any new ship construction the cur-rently estimated cost of which exceeds by 10 per centum the estimated cost included therefor in such budget unless, in either case, the Director of the Bureau of the Budget specifically approves the start of such ship construction and the Director shall submit forthwith a detailed explanation thereof to the Committees on Appropriations of the Senate and of the House of Representatives; and, as used herein, the term "budget" includes the detailed justification supporting the budget estimales

The committee also recommends that the following proviso be added to the bill:

: Provided further, That not to exceed \$64,875,000 of the funds and contract authority made available for new ship construction, including reconditioning and betterment, in the Independent Offices Appropriation Act, 1950, shall continue to be available until December 31, 1950

Operating-differential subsidies_____

\$3, 658, 000

The increase recommended by the committee is to provide funds for the estimated amount of sub-sidy applicable to 11 vessels included in the 1951 budget that were not in the 1950 budget. The total amount provided is \$30,108,000 in direct appropria-tion plus reappropriations amounting to \$55,209,157, or a total of funds available of \$85,317,157, which is \$8,062,843 below the estimate. The committee also recommends that the following

proviso be stricken from the bill:

: *Provided further*, That no part of the foregoing appropriation shall be available for obligation, nor any obligation made, for the payment of an operating-differential subsidy for any number of ships in excess of the number of ships which are entitled to receive an operating-differential subsidy pursuant to provisions of any contract, authorization, commitment, or obligation by the Commission in existence on January 1, 1950, including within said limitation as to number any ships being constructed or contracted for on said date under a construction-differential subsidy contract and including also any ships the operation of which may be authorized by the Commission under any contracts which may result from any formal applications filed with the Commission prior to January 1, 1950.

INCREASES AND LIMITATIONS-Continued

UNITED STATES MARITIME COMMISSION—Continued Maritime training_

\$587,860

The increase recommended by the committee is to provide for the restoration of the full budget estimate and in addition to provide for the pay of \$65 per month to the 794 Federal cadets and for the expense allowances for upgrading and specialist trainees at Sheepshead Bay and Alameda estimated at 2,640. The committee has disapproved the estimate for Pay Act increases in the amount of \$418,000 under the Career Compensation Act of 1949. The total amount provided is \$3,930,520, which is \$330,520 over the estimate and is \$2,655,480 under the appropriation for 1950.

The committee also recommends that the section on Maritime Training be stricken from the bill and that the following be inserted in lieu thereof:

following be inserted in lieu thereof: Maritime training: For training personnel for the manning of the merchant marine (including operation of training stations at Kings Point, New York; Sheepshead Bay, New York; Alameda, Cali-fornia, and the United States Maritime Service In-stitute), including not to exceed \$2,477,000 for administrative personal services (exclusive of pay of cadet midshipmen and other trainees) in the District of Columbia and elsewhere; purchase of three passenger motor vehicles, for replacement only; printing and binding; health service pro-gram as authorized by law (5 U. S. C. 150); not to exceed \$2,500 for contingencies for the Superin-tendent, United States Merchant Marine Academy, to be expended in his discretion; not to exceed to be expended in his discretion; not to exceed \$77,000 for transfer to applicable appropriations of the Public Health Service for services rendered the Commission; \$3,930,520, including the pay of cadet midshipmen and other trainees.

State marine schools_____

The increase recommended by the committee is to provide for the full amount of the budget estimate, without the reappropriation of \$25,000 inserted by the House, and in addition to provide for the pay of \$65 per month and subsistence of \$275 per annum for the 710 State cadets. The total amount provided is \$1,102,050, which is \$392,050 over the estimate. The committee also recommends that the section on State marine schools be stricken from the bill and that the following he inserted is lies the real.

that the following be inserted in lieu thereof:

State marine schools: To reimburse the State of California, \$50,000; the State of Maine, \$50,000; the State of Massachusetts, \$50,000; and the State of New York, \$50,000; for expenses incurred in the maintenance and support of marine schools in such States as provided in the Act authorizing the establishment of marine schools, and so forth, approved March 4, 1911, as amended (34 U. S. C. 1121– 1123); \$153,000 for the maintenance and repair of vessels loaned by the United States to the said States for use in connection with such State marine schools, and \$749,050 for the pay of 710 cadet mid-shipmen at \$65 per month and \$275 per annum for the subsistence of each cadet midshipman; \$1,102,-050.

434,050

INCREASES AND LIMITATIONS-Continued

UNITED STATES MARITIME COMMISSION—Continued Vessel operating functions.

> The committee recommends that the words "Independent Offices Appropriation Act, 1950" be stricken from the bill and that the words "Third Deficiency Appropriation Act, 1949" be inserted in lieu thereof, in order to properly identify the unobligated balance of funds earmarked in the section.

Total increase, U. S. Maritime Commission

VETERANS' ADMINISTRATION:

Administration, medical, hospital and domiciliary services_____

The increase recommended by the committee is to restore the full amount of the budget estimate. The total amount provided is \$887,621,000, which, together with the unobligated balance in the bill, provides the full estimate of \$887,800,000.

Hospital and domiciliary facilities.

The committee recommends that the figure "4" be stricken out and that the figure "6.7" be inserted in lieu thereof in the proviso limiting the percentage of funds available from the Administration for plans and supervision of projects.

The committee also recommends that the figure "7" be stricken out and that the figure "10" be inserted in lieu thereof in the portion of the proviso limiting the percentage of funds available for plans and supervision of projects when agencies or persons outside the Administration are employed.

WAR CLAIMS COMMISSION:

Administrative expenses.

The committee recommends that the amount of expenses to be derived from the war claims fund be increased from \$600,000 to \$700,000.

DECREASES—Continued

GENERAL SERVICES ADMINISTRATION—Continued Strategic and critical materials—Continued

The committee also recommends that the amount of contract authorization be increased from \$100,000,-000 to \$125,000,000.

The committee further recommends that the following proviso be stricken from the bill:

of which not to exceed \$25,000,000 may be expended in accordance with the purposes of said Act of July 23, 1946, through purchase contracts negotiated with operators within the United States, its Territories and possessions, and in making advance payments on such contracts to the extent determined to be necessary to the performance thereof, and

Alaska Public Works.

trol

The committee recommends that the following be added to the bill:

; and, in addition, the General Services Administration is authorized to enter into contracts in an amount not to exceed \$4,000,000 for the purposes of this appropriation

The contract authorization so provided is the same amount as provided for 1950, and is \$9,000,000 below the estimate for contract authorization.

The committee also recommends that the following proviso be stricken from the bill: : Provided, That no part of this appropriation

: *Provided*, That no part of this appropriation shall be available for expenditure on any project until a certificate has been received from the Secretary of Defense that the installation of such facility will be of value in connection with national defense

Advance planning of non-Federal public works__

The decrease recommended by the committee is to provide for a slowing up of the program in view of the present need to economize. The total amount provided is \$20,000,000, which is \$12,000,000 more than the cash appropriated for 1950.

The committee also recommends that the amount of contract authorization be reduced from \$32,000,000 to \$27,000,000.

Grants for plan preparation, water pollution con-

The decrease recommended by the committee is to provide for the reduced amount of grants which the committee is advised applicants will likely qualify for in 1951. The total amount provided is \$750,000, which is \$550,000 more than was provided in 1950.

Administrative expenses, water pollution control

The decrease recommended by the committee is to deny the request for new personnel. The total amount provided is \$52,285, the amount of the 1950 appropriation plus Pay Act increases. 150,000

7,715

\$8,000,000

DECREASES—Continued

GENERAL SERVICES ADMINISTRATION—Continued Virgin Islands public works_____

\$300,000

The decrease recommended by the committee is to provide for a slowing up of the program in view of the present need to economize. The total amount provided is \$1,000,000, which is \$320,000 more than the cash appropriation for 1950. In addition, contract authorization is provided in the amount of \$1,467,000, as estimated.

Purchase of typewriting machines.

The committee recommends that the following be stricken from ch. VIII of the bill and be inserted as section 1114 under "General Provisions" of the bill:

During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the sixmonth period immediately preceding such quarter.

The committee also recommends that the following be stricken from the bill, as no longer required:

No part of any money appropriated by this or any other Act for any agency of the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations) shall be used during the current fiscal year for the purchase within the continental limits of the United States of any typewriting machines (except typewriting machines for veterans under public laws administered by the Veterans' Administration) unless the Administrator of General Services certifies that he is unable to furnish such agency with suitable typewriting machines out of stock on hand. The Administrator of General Services is authorized and directed at such times as he may determine to be necessary to survey and determine the numbers and kinds of typewriting machines located in the continental limits of the United States which are at any time surplus to the requirements of any agency in the executive branch of the Government (which shall include all departments, independent establishments, and wholly owned Government corporations). Upon such determination, the Administrator of General Services is authorized to direct, upon such notice and in such manner as he may prescribe, the head of any such agency to surrender to the General Services Administration any and all typewriting machines surplus to its

GENERAL SERVICES ADMINISTRATION—Continued Purchase of typewriting machines—Con.

requirements, the costs of packing, shipping, and handling thereof to be charged to the general supply fund. Each such agency shall furnish the Administrator of General Services such information regarding typewriting machines, wherever located, as he may from time to time request. The General Services Administration is authorized and directed to receive, hold, sell, exchange, or supply to any branch of the Government, including the District of Columbia, typewriting machines surrendered to it hereunder. The Administrator of General Services is authorized to charge each agency to which typewriting machines are supplied hereunder amounts equal to the fair value thereof, as determined by him, and such amounts shall be credited to the general supply fund.

Total decrease, General Services Administration

GENERAL APPROPRIATION BILL, 195

-

QUARTERMASTER CORPS

CEMETERIAL EXPENSES

The 1951 budget estimate for this appropriation is \$6,564,000, or \$2,064,000 in excess of the appropriation for the current fiscal year. The House recommended an appropriation of \$5,500,000 for the fiscal year 1951, or \$1,064,000 under the budget estimate.

The committee recommends an appropriation of \$5,000,000 for the fiscal year 1951, which is \$500,000 in excess of the 1950 fiscal year appropriation but \$1,564,000 less than the 1951 budget estimate and \$500,000 less than the amount recommended by the House.

In recommending a reduction of \$1,564,000 under the 1951 budget estimate, the committee has made the following specific reductions:

Procurement of headstones.—For the fiscal year 1950, \$1,595,000 was appropriated for this purpose. The 1951 budget estimates proposed an increase of \$143,056 for this purpose to provide a total of \$1,738,056 for the procurement of headstones. This estimate for 1951 was based on a total estimated requirement for 94,749 headstones. The committee recommends a reduction of \$38,514 in the amount for the procurement of headstones, leaving a total of \$1,699,-542 for this purpose, or funds to provide for approximately 92,649 headstones. The \$1,699,542 recommended for the procurement of headstones for the fiscal year 1951, although \$38,514 less than the budget estimate, is \$104,542 more than is available in the current fiscal year for this purpose.

Construction of national cemeteries, including acquisition of land.— The 1951 budget estimate for these purposes is \$2,709,000, including \$875,000 for three World War II memorials (\$700,000, Hawaii; \$100,000, Puerto Rico; and \$75,000, Alaska), and including \$1,273,205 for acquisition of land in six national cemeteries.

The committee has not included in the bill the \$875,000 contained in the 1951 estimates for the World War II memorials in Hawaii, Puerto Rico, and Alaska. However, the committee has not acted unfavorably on the proposal for these memorials but feels that the proper agencies of the executive branch should give more careful consideration to the plans for these memorials as well as to their location, and the committee likewise wishes to have additional opportunity to study further the plans and location of these memorials.

With respect to the budget estimate of \$1,273,205 for land acquisition in connection with six national cemeteries, the committee recommends an appropriation of \$622,719 for this purpose. No funds were appropriated in fiscal year 1950 for land acquisition in connection with national cemeteries. The committee feels that the per acre cost of some of the land proposed to be purchased in 1951 is excessive. The \$622,719 recommended for the fiscal year 1951 will provide funds for the acquisition of land in those cases considered to be most urgent. The amount recommended by the committee for land acquisition is \$650,486 less than the budget estimate of \$1,273,205.

The committee concurs in the following statement appearing on pages 245 and 246 of the House report:

The Quartermaster Corps is directed to use none of the funds appropriated for cemeterial expenses for the purchase of additional acreage at Golden Gate National Cemetery, California, until the controversy surrounding the acreage proposed to be acquired is settled to the satisfaction of the city of San Bruno, the Department of the Navy, and the Quartermaster Corps.

George C. Marshall Foundation, Lexington, Virginia

ENTOMBMENT OF AN UNKNOWN AMERICAN SERVICEMAN OF WORLD WAR II

Public Law 429, Seventy-ninth Congress, provides for the selection, return, and burial of the Unknown Serviceman of World War II in the Memorial Amphitheater, Arlington National Cemetery, near or beside the remains of the Unknown Soldier, World War I.

The 1951 budget estimates propose an appropriation of \$1,000,000 pursuant to Public Law 429, of which \$500,000 is estimated for construction of the tomb and \$500,000 is estimated for entombment expenses, including \$405,554 for travel of cadets of various branches of the service to Washington, D. C., State officials, and dignitaries.

The House recommended an appropriation of \$350,000, stating in its report that a—

review of the components of the estimate seems to indicate that a suitable tomb might be erected for \$350,000 and that no more than \$150,000 should be expended for travel and necessary ceremonial expenses. It further appears to the committee that the National Defense Establishment is in position to render greater assistance in the realization of this war memorial than was indicated to the committee.

The committee is most sympathetic toward the construction of a suitable memorial to an unknown American serviceman of World War II and the conducting of suitable ceremonies for the dedication of such a memorial. However, the committee feels that the tomb to be erected should fit in properly with the already existing tomb of the Unknown Soldier of World War I and that the ceremonies should be of a more modest nature than those planned. The committee, accordingly, without prejudice to this item has deleted from the bill the \$350,000 allowed by the House. In recommending the temporary postponement of the erection of this tomb, the committee wishes to point out that the plans for the proposed memorial should be restudied and that a joint committee of the two Appropriation Committees ought to be appointed to work out with the proper officials of the executive branch the plans for this memorial and the related ceremonies.

SIGNAL CORPS

ALASKA COMMUNICATION SYSTEM

OPERATION AND MAINTENANCE

For this appropriation, the committee recommends \$3,000,000, which is the same as the fiscal year 1950 appropriation, but which is \$100,000 less than the 1951 budget estimate of \$3,100,000. The House also approved an appropriation of \$3,000,000 for the fiscal year 1951.

CONSTRUCTION

The 1951 budget estimate for the appropriation "Construction, Alaska communication system" is in the amount of \$3,000,000.

The House allowed an appropriation of \$1,000,000 for "the more urgent structures necessary to the operation of the system" and did not approve any amount for the construction of family dwellings.

The \$3,000,000 estimate was requested for construction at the following stations in Alaska: Northway, Cathedral Bluffs, Big Delta, Anchorage, Fairbanks, Skagway, Naknek, and Haines. The con-

struction proposed includes toll buildings, repeater buildings, warehouses, garages for the storage of automobiles, trucks, and other equipment, powerhouses, a commercial center building, receiver buildings, 14 duplex units to house 28 families, and the necessary utilities.

The committee recommends an appropriation of \$2,877,920, which is \$1,877,920 above the amount allowed by the House, and which is \$122,080 less than the 1951 budget estimate.

The committee also recommends that the following proviso in the House bill be amended as indicated:

: Provided, That this appropriation shall not be available for construction of family quarters at (1) a cost per family unit in excess of 28,000 an average cost in excess of 24,000 for construction, including, but not limited to kitchen range, refrigerator, telephone, architectural and engineering services, and all contingencies; nor at (2) a cost per family unit in excess of 5,000 for site development and outside utilities, including architectural and engineering services therefor and all contingencies

This action has been taken by the committee in accordance with information developed after the House committee had acted on the bill. Recent bids opened on 50 eight-family row houses at Fort Richardson, Alaska, show a material reduction in the per unit cost of construction. Based on the low bids received on the Fort Richardson construction, the Department of Defense, taking into account the smaller number of family units to be constructed at Anchorage, Fairbanks, Cathedral Bluffs, Big Delta, Northway, Skagway, and Naknek, and the varying distances of these places from labor and materials, has projected the estimated cost of the proposed duplex family units at these locations. The study made by the Department of Defense shows that the estimated base per unit cost at Anchorage is \$19,700, and that the average cost for the 28 units is estimated at approximately \$24,000. Included in the \$3,000,000 estimate for "Construction" is \$784,000 for the construction of these 28 family units. Based on the recent experience obtained from the bids on the housing at Richardson, the Department of Defense has reduced from \$784,000 to \$661,920, or a reduction of \$122,080, the amount requested for these 14 duplex houses or 28 family units. The committee has accordingly made this reduction below the budget estimate in approving a total amount of \$2,877,920 for "Construction" for the fiscal year 1951.

The committee had hearings on this appropriation, but inasmuch as the final information based on the Fort Richardson bids was not available until after the hearings had been concluded, the following Analysis of Pricing for ACS Housing for Fiscal year 1951, and letter from W. J. McNeil, Assistant Secretary of Defense, are made a part of this report:

ANALYSIS OF PRICING FOR ACS HOUSING FOR FISCAL YEAR 1951

Bids were recently opened for 50 eight-family row houses (400 units) to be constructed at Fort Richardson, Alaska, with military public works funds. Detailed information and evaluation of these bids will be included in later correspondence. Based on the unevaluated apparent low bids, the total cost per family unit, including Government-furnished materials and cost of engineering, design, inspection, supervision, and administration, will be \$15,000 per unit. Because of the small number of units involved at each location for ACS housing,

Because of the small number of units involved at each location for ACS housing, a duplex house plan of a new design, in which the standards have been reduced to the same level applied to the Fort Richardson housing, is contemplated. Certain factors must be applied to the Fort Richardson price to achieve a realistic figure for ACS housing, irrespective of location.

For	ACS duplexes add— 5 percent for individual heating 10 percent for size of program (1 to 8 units instead of 400) 10 percent for more costly design (duplex 1-story instead of 8-family 2-story)	\$750 1, 500 1, 500
	Total Contingencies 5 percent	18, 750 938
	Per unit cost at Anchorage	19, 688
	Round figure	(19, 700)

Based on previous experience in the construction of ACS housing at remote locations, certain construction factors which will reflect increased costs of trans-portation and labor must be applied to each site. These factors and the resulting cost are tabulated below:

Station	Factor	Unit cost	Number of units	Budget amount
Anchorage (base) Fairbanks Big Delta Cathedral Bluff Northway Skagway Naknek	$1.0 \\ 1.2 \\ 1.4 \\ 1.6 \\ 1.6 \\ 1.0 \\ 1.2$	\$19, 700 23, 640 27, 580 31, 520 31, 520 19, 700 23, 640	8 8 2 2 2 2 2 4	\$157,600 189,120 55,160 63,040 63,040 39,400 94,560
Total			28	661, 920 (23, 640)

ASSISTANT SECRETARY OF DEFENSE, Washington 25, D. C., May 9, 1950.

HON. KENNETH MCKELLAR,

United States Senate, Washington, D. C.

MY DEAR SENATOR MCKELLAR: Reference is made to Mr. Garlock's letter of April 26, 1950, on the subject of family quarters to be constructed at Fort Richard-

son, Alaska. Bids were taken on 50 sets of 8 quarters (400 units). Five different designs were included as alternates and the contractors were invited to submit bids on comparable types of housing of their own design. A total of 18 bids were received,

After evaluation of the bids, the design was selected which best meets the re-quirements of the Army. The selected design will provide a family unit having a net floor area of 976 square feet at a unit price of \$14,772. This price includes Government-furnished equipment and materials, design, engineering, administration, and supervision costs.

The price of housing under this contract reflects a marked decrease in unit prices in Alaska when compared with Alaskan housing costs of previous years. The bidding demonstrates that there has been an increase in interest in the Alaska construction program on the part of the contractors.

We are continuing our efforts toward the development of a systematic construction program to meet strategic requirements in Alaska in an economical and efficient manner.

With kind regards, I am, Sincerely yours,

W. J. MCNEIL, Assistant Secretary of Defense.

In connection with housing needs in Alaska, the committee wishes that the Department of Defense give every consideration to utilization of provisions of the so-called Wherry housing bill (Public Law 211, 81st Cong., 1st sess., as amended by Public Law 498, 81st Cong., 2d sess.) and to the use of Lustron-type housing.

CORPS OF ENGINEERS

BUDGET ESTIMATES AND HOUSE ACTION

The 1951 budget estimates considered by the House for the Corps of Engineers totaled \$798,482,000, and the House approved appropriations totaling \$599,145,000, or 25 percent under the 1951 estimates.

The House eliminated some projects included in the 1951 budget estimates, specified that amounts allowed for certain other projects should be used for completion of the projects even though the cost of some of the projects have increased, and reduced other projects in varying percentages, eliminating all planning funds, and arriving at an over-all reduction of 25 percent for the Corps of Engineers.

SENATE HEARINGS AND COMMITTEE ACTION

The committee started hearings January 31, on the 1951 budget estimates for the Corps of Engineers, and lengthy hearings were held. The committee heard the Chief of Engineers and his assistants as well as numerous outside witnesses. After the bill had been reported to the House, the committee held supplemental hearings on the Corps of Engineers items, having the Chief of Engineers before the committee again.

The committee does not concur with the action taken by the House with respect to the individual projects, but based upon hearings held by the committee and consideration in six executive meetings subsequent to the hearings, the committee is recommending amounts for the various projects and items, which in most instances are in different amounts than those proposed by the House. The total appropriation recommended by the Senate committee for the Corps of Engineers is \$731,546,000, which is \$66,936,000, or 8.3 percent less, than the 1951 budget estimates. The amount recommended by the committee for the Corps of Engineers is \$132,401,000 above the amount of \$599,-145,000 allowed by the House.

The tables appearing on pages 232–264 of this report set forth the recommendations of the committee with respect to each project and item under the Corps of Engineers.

SUMMARY TABLE, CORPS OF ENGINEERS

The following table is a summary table of the action taken by the committee with respect to appropriations for the Corps of Engineers:

GENERAL APPROPRIATION BILL,

PROJECTS FOR WHICH THE COMMITTEE RECOMMENDS SUFFICIENT FUNDS IN THE FISCAL YEAR 1951 TO COMPLETE

The committee recommends sufficient funds in the fiscal year 1951 for the completion of 15 rivers and harbors projects. The amount recommended by the committee for these 15 projects is \$2,919,400.

The committee is recommending sufficient funds to complete 26 flood-control, general, projects, proposing a total appropriation of \$10,867,800 for these 26 projects.

For both rivers and harbors and flood control, general, the committee, therefore, is recommending sufficient funds for the completion of a total of 41 projects. The total appropriations recommended by the committee in the fiscal year 1951 for the completion of these 41 projects is \$13,787,200.

The following table sets forth the projects for which the Senate committee is recommending funds in the fiscal year 1951 to complete, showing the amounts allowed by the House for these projects, the amounts proposed by the Senate committee for each project, and the increase proposed by the Senate committee over the House:

Project and State	Amount allowed by House	Amount rec- ommended by Senate committee	Amount of increase over House bill

Flood control, general

For the fiscal year 1950, the Congress appropriated funds for the completion of 30 rivers and harbors projects and 61 flood-control, general, projects, making a total of 91 projects, for which the amount finally approved in conference was specified as being for completion.

Of the 30 rivers and harbors projects, 25 have or will be completed with funds made available, and of the 61 flood control projects 57 have or will be completed with funds made available.

In other words, of the 91 projects which the conferees specified last year should be completed with the funds provided, a total of 82 have or will be completed by the Corps of Engineers with funds available. Due to increased costs of land acquisition, necessary changes in plans, or contingencies that could not be foreseen last year, the Corps of Engineers has not found it possible to complete 9 of the 91 projects with the funds made available for completion.

220

RIVERS AND HARBORS

The 1951 budget estimate for the appropriation "Rivers and harbors" is \$240,714,000, including \$2,000,000 for planning. The House allowed an appropriation of \$185,878,000, including no amount for planning. The committee recommends an appropriation of \$221,-244,500, including \$1,800,000 for planning instead of the budget estimate of \$2,000,000. The total amount recommended by the Committee for "Rivers and harbors" is \$35,366,500 above the amount allowed by the House and \$19,469,500 below the 1951 budget estimates.

BREAKDOWN BY PROJECTS AND ITEMS

The amounts recommended by the committee for the various projects and items under this appropriation appear on pages 232–248 of this report.

COOS BAY HARBOR, INCLUDING CHARLESTON MOORING BASIN, OREG.

The House appropriated \$750,000 for the Coos Bay Harbor in Oregon. The Senate committee recommends that this amount be increased to \$998,000 and expects the added funds and any saving which may be effected to be applied to the construction of the connecting channel and mooring basin at Charleston, Oreg., which is a part of the authorized Coos Bay project. The committee received testimony indicating the emergency nature of conditions in the Charleston area and is of the opinion that this portion of the Coos Bay project should be undertaken and completed as rapidly as possible. The committee also received evidence that especially favorable contracts for all the foregoing work can be expected because adequate construction facilities are now in the bay and bids can be expected which will not include items for mobilization or demobilization of such facilities. In recommending an increase of \$248,000, the committee has reduced the Charleston part of the appropriation by \$100,000 from the engineers' estimated cost in expectation of substantial savings as indicated above.

CLEVELAND HARBOR, OHIO

The budget estimate for this project is \$3,000,000. The House approved an appropriation of \$2,500,000, and the committee recommends that this amount be increased to \$2,750,000. The committee also recommends inclusion in the bill of language to make \$75,000 of the total appropriation for this project available for dredging in the Old River, Cleveland, Ohio.

PLANNING FUNDS

In connection with the committee's recommendation that \$1,800,000 be included under the appropriation "Rivers and harbors" for planning, the committee recommends that the following language contained in the budget estimates be included in the bill:

for the execution of detailed investigations and the preparation of plans and specifications for projects heretofore authorized;

OLD HICKORY, CARTHAGE, AND CELINA DAMS

In view of the need for additional hydroelectric power in Tennessee and surrounding territory, particularly because of the activities of the Atomic Energy Commission and the Air Engineer Development Center, the committee believes it wise that planning work be initiated at once on the multiple-purpose projects on the Cumberland River above Nashville so that these projects can be placed under construction without delay when funds are appropriated for that purpose. The committee, therefore, directs that not to exceed \$150,000 be used from available funds for initiating planning on the Old Hickory, Carthage, and Celina Dams.

UPPER MONONGAHELA RIVER

The River and Harbor Act approved May 17, 1950 (Public Law 516, 81st Cong.), adopted a modification of the project for the Monongahela River, W. Va. and Pa., in accordance with the recommendations of the Chief of Engineers in Senate Document 100, Eighty-first Congress, providing for replacement of locks and dams 12 to 15, inclusive, by two locks and dams of higher lift with single lock chambers having usable dimensions of 84 feet by 600 feet; for construction of movable crest gates on dam 8 to increase the pool elevation; and for construction of a navigable channel 9 feet deep, 300 feet wide from dam 8 to the head of the river and thence of the same depth and 200 feet wide, where attainable, for a distance of about 2.1 miles up Tygart River. The total estimated cost of this modification is \$29,238,000.

The Corps of Engineers has advised the committee that it could initiate preparation of plans for the installation of the movable crest gates at dam 8 with available planning funds if the committee desired. In view of the importance of this project, the committee believes that if the Corps of Engineers deems it advisable such adjustments of available funds as may be necessary should be made to permit the preparation of plans for installation of the crest gates at dam 8.

ALTERATION OF BRIDGES OVER NAVIGABLE WATERS

The budget estimate for this appropriation is \$1,000,000, which amount was approved by the House. The committee recommends that this amount be reduced by \$100,000 to provide a total appropriation of \$900,000.

FLOOD CONTROL, GENERAL

The 1951 budget estimate for the appropriation "Flood control, general" is \$478,447,000, including \$4,000,000 for planning. The House approved an appropriation of \$341,055,000, eliminating the budget estimate for planning.

The committee recommends an appropriation of \$436,933,000, including \$3,565,000 for planning in lieu of the budget estimate of \$4,000,000. The total amount proposed by the committee for "Flood control, general" is \$95,878,000 above the amount allowed by the House and \$41,514,000 under the 1951 budget estimate.

PLANNING FUNDS

Although the committee recommends a total of \$3,565,000 for planning under the appropriation "Flood control, general," the committee has specifically eliminated planning funds for the following projects contained in the 1951 budget estimates: Falmouth Reservoir, Ky.; Greenup project, Kentucky; and Moores Ferry Reservoir, Va. and N. C.

BREAKDOWN BY PROJECTS AND ITEMS

The amounts recommended by the committee for the various projects and items under this appropriation appear on pages 249–264 of this report.

WILLIAMSPORT PROJECT, PENNSYLVANIA

The budget estimate for this project is \$1,200,000. The House approved an appropriation of \$800,000. The committee recommends that this amount be increased by \$300,000 to provide a total appropriation of \$1,100,000. The amount recommended by the committee for this project includes funds for initiating work on section 2 of the Williamsport project (Newberry area).

MANDAN PROJECT, NORTH DAKOTA

The Third Deficiency Appropriation Act, 1949 (Public Law 343, 81st Cong., 1st sess.), contained the following provision:

For the completion of interior drainage facilities at Mandan, North Dakota, as a part of the local flood protection project authorized by the Flood Control Act of 1946 (Public Law 526, Seventy-ninth Congress, second session), fiscal year 1950, \$76,000, to remain available until expended.

The committee has authorized the submission of the following amendment on the floor under a motion to suspend the rules for the purpose of amending the foregoing provision in the Third Deficiency Appropriation Act, 1949:

: Provided further, That the section entitled "National Military Establishment" in Public Law 343, 81st Congress, 1st session, providing appropriations for the project at Mandan, North Dakota, is hereby amended to authorize reimbursement to local interests for such work as they may have done in providing interior drainage facilities at Mandan, subsequent to appropriation of funds for construction, as a part of the local flood protection project, insofar as such drainage facilities shall be approved by the Chief of Engineers and found to have been done in accordance with the authorized project: Provided further, That such payment shall not exceed the sum of \$76,000

George C. Marshall Foundation, Lexington, Virginia

JAMES RIVER AND TRIBUTARIES, NORTH AND SOUTH DAKOTA

The committee recommends that the following provision be added to the bill:

: Provided, That \$25,000 of the funds appropriated herein shall be available, at a total cost of not to exceed \$100,000, to the Board of Engineers for Rivers and Harbors for the purpose of continuing the review of the report on the James River and tributaries, North and South Dakota, published as House Document Numbered 83, 73d Congress, and determining the advisability of improvements for flood control and related purposes on the James River and tributaries, including Pipestem Creek

Recent severe floods on the James River and tributaries have emphasized the need for flood-control improvements in this basin. Certain problems remain to be worked out in connection with the review report on the James River and tributaries, North and South Dakota, which was authorized by a resolution adopted November 10, 1943, by the Committee on Flood Control of the House of Representatives. Furthermore, the return of this report to the district office is now considered necessary in order to include the effect of recent floods on the proposed improvements and to determine the feasibility of additional improvements in view of the recent flood damage.

MISSOURI RIVER AGRICULTURAL LEVEES, KANSAS, MISSOURI, IOWA, AND NEBRASKA, INCLUDING ST. CHARLES TO PORTAGE DES SIOUX, MO.

The budget estimate for "Missouri River agricultural levees, Kansas, Missouri, Iowa, and Nebraska" is \$7,000,000. The House allowed an appropriation of \$5,000,000. The committee recommends that this amount be increased to \$6,500,000. Of the increase of \$1,500,000 recommended by the committee, \$1,000,000 has been specifically included for the initiation of work from St. Charles, Mo., downstream to Machens and Portage des Sioux, Mo., which is a portion of the authorized Missouri River agricultural levee system.

ROCKY FORK RESERVOIR, OHIO

In its report on the civil functions appropriation bill for the fiscal year 1950, the committee pointed out that it had been advised that work on the Big Walnut Reservoir, Ohio, had been discontinued because the project was no longer desired by the city of Columbus. In view of this situation, the committee recommended last year that the unobligated balance on the Big Walnut Reservoir project be used by the Corps of Engineers in prosecuting work on the Rocky Fork Reservoir, Ohio. The committee's recommendation was not approved in conference on the 1950 bill.

In view of the abandonment of the Big Walnut Reservoir project, and the need that work go forward on the Rocky Fork Reservoir project, the committee again recommends that the unobligated balance on the former project be used on the Rocky Fork Reservoir project. The unobligated balance on the Rocky Fork Reservoir is estimated to be \$519,600.

FLOOD CONTROL, GENERAL (EMERGENCY FUND)

The estimate on this appropriation is \$3,000,000, which amount was approved by the House. The committee recommends an appropriation of \$2,700,000, or \$300,000 less than the estimate and the amount approved by the House.

RESCUE WORK AND EMERGENCY REPAIR WORK

The Chief of Engineers has brought to the attention of the committee that approximately \$2,000,000 remain unobligated from the appropriation for "Operation Snowbound" contained in the Second Deficiency Appropriation Act, 1949, approved June 23, 1949. The committee has also become aware of the need for flood fighting and emergency repair work as a result of recent floods and of the need for preparatory work in fighting floods which may be anticipated in **a** number of areas throughout the country within the next few months. The committee is, therefore, desirous that an amount of \$1,000,000 from the unused balance available under "Flood control, general," for "Operation Snowbound" be used for flood fighting and rescue work and for emergency repair work throughout the country pursuant to the existing emergency repair authorities available to the Corps of Engineers.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

The House allowed \$65,000,000 for this appropriation, which is \$7,000,000 less than the 1951 budget estimate of \$72,000,000.

The committee has approved the \$65,000,000 allowed by the House, and the committee recommends an additional appropriation of \$1,778,000, to provide a total appropriation of \$66,778,000.

With reference to the additional sum of \$1,778,000 recommended for the lower Mississippi River, the committee desires that \$1,550,000 of this sum be allocated among the items of the Yazoo City cut-off, the Sunflower and other interior streams of the Yazoo Basin, Devil's Swamp, and the West Tennessee tributaries.

With respect to the remainder of the increase proposed, \$228,000, the committee has included this amount for the Des Arc, Ark., project in the White River. The amount recommended will complete this project. The project is to alleviate disastrous flood conditions and calls for construction of earth levees, drainage facilities, pumping plant, diversion ditches, and sewer modification.

The following table sets forth for this appropriation, by phase of work, the amounts of the 1951 budget estimate, the amounts under the House bill as allocated by the Corps of Engineers, and the amounts recommended by the Senate committee:

Flood control, Mississippi river and tributaries

¹ Total authorized cost is \$1,038,309,500.

EMERGENCY FUND FOR FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

The committee recommends \$450,000 for this appropriation in lieu of \$500,000 as proposed in the 1951 budget estimate and as approved by the House.

FLOOD CONTROL, SACRAMENTO RIVER, CALIF.

The 1951 budget estimate for this appropriation is \$2,805,000. The House allowed an appropriation of \$2,700,000. The committee recommends an appropriation of \$2,524,500, which is \$175,500 less than the amount allowed by the House and \$280,500 less than the budget estimate.

MISCELLANEOUS CIVIL WORKS

For the appropriation "Miscellaneous civil works," the committee recommends an appropriation of \$16,000, which is the amount of the 1951 budget estimate, in lieu of the amount of \$12,000 allowed by the House.

UNITED STATES SOLDIERS' HOME

For maintenance and operation of the United States Soldiers' Home, the budget estimate proposed \$2,395,000, to be paid from the Soldiers' Home permanent fund. This amount was approved by the House.

The committee recommends an amount of \$2,363,240, which is a reduction of \$31,760 below the 1951 budget estimate and the House allowance. The committee recommends no funds for "Farm activities," for which the budget estimate included \$141,760. The committee was advised that the value placed on produce obtained from the farming operation and used at the Soldiers' Home is \$110,000. In deleting the budget estimate of \$141,760 for "Farm activities," the committee recommends an additional amount of \$110,000 for member care in order to provide funds with which to purchase supplies now obtained from the farming operation.

Inasmuch as the farming operation is carried on at a loss, and in view of the fact that the farming operation will in all probability have to be discontinued of necessity due to the recent action of the Board of Commissioners and Secretary of the Army in declaring some 148 acres of the Soldiers' Home Reservation excess to the needs of the Home, and the transferral of this acreage together with improvements thereon to the General Services Administrator for disposition in accordance with the Property Act of 1949, the committee has included no amount for continuation of the farming operation in the fiscal year 1951.

THE PANAMA CANAL

MAINTENANCE AND OPERATION

For "Maintenance and operation," the 1951 budget estimate is \$15,260,000. The House recommended an appropriation of \$14,500,-000, which is the amount of the fiscal year 1950 appropriation.

The committee recommends an appropriation of \$13,251,700, which is \$1,248,300 less than the amount allowed by the House and \$2,008,-300 less than the 1951 budget estimate.

In recommending a reduction of \$2,008,300 under the 1951 budget estimate, the committee has made the following specific reductions:

Clinics-auditorium building, including equipment, \$1,853,000.—In view of the hospital and medical facilities now available in the Canal Zone and the lack of urgency connected with this project, the committee feels that further work on this building can be postponed. In the meantime, the committee feels that the Canal Zone authorities should make a careful survey of existing buildings in the Canal Zone with a view to ascertaining whether any surplus Army or Navy structures are available which might be obtained for conversion to clinical and auditorium use at less expense than the additional \$1,853,-000 requested for the clinics-auditorium building.

George C. Marshall Foundation, Lexington, Virginia

Designs for alterations to Administration Building, \$20,000.—Likewise, in connection with this item there is no urgency connected with it and it can be postponed. This item for designs would call for requested construction funds in the fiscal year 1952.

Gasoline service station, Diablo Heights, \$60,300.—The Governor of the Panama Canal at the Senate hearings advised that this item could be deleted from the 1951 estimates.

Miscellaneous minor improvements, \$75,000.—The 1951 estimates included \$100,000 for "Miscellaneous minor improvements." The committee has approved \$25,000 for this purpose, believing that improvements in excess of \$25,000 properly should be anticipated and Congress advised in the annual justifications as to their nature.

SANITATION

The 1951 budget estimate for "Sanitation" is \$3,491,000. The committee has approved an appropriation of \$3,400,000, which is the same amount as proposed by the House, and which is \$91,000 less than the 1951 budget estimate.

The appropriation for the current fiscal year is in the amount of \$3,300,000, or \$100,000 less than the amount recommended for the fiscal year 1951. In view of the importance of the activities carried on under this appropriation, the committee feels that this increase of \$100,000 for 1951 is justified.

CIVIL GOVERNMENT

The 1950 appropriation under this heading was in the amount of \$3,450,000, and there is a pending supplemental in the amount of \$399,000 for pay increases, including retroactive pay increases for the fiscal year 1949.

The 1951 budget estimate is \$3,970,500. The committee recommends an appropriation of \$3,849,000, which is \$121,500 less than the 1951 estimate and \$76,000 less than the amount of \$3,925,000 approved by the House.

In proposing a reduction of \$121,500 under the 1951 budget estimates, the committee has made no specific reductions but feels that this reduction under the estimate should be applied to those items in the 1951 justifications considered to be the least urgent.

THE PANAMA RAILROAD COMPANY

Administrative Expenses

The 1951 budget estimates propose a limitation of \$829,700 on funds of the company to be available for administrative expenses. The committee has approved the limitation of \$820,000 recommended by the House, which is \$9,700 under the estimate. The limitation for the current fiscal year is in the amount of \$815,000.

GENERAL PROVISIONS

SEC. 102. EMPLOYMENT IN CERTAIN POSITIONS IN THE CANAL ZONE

The committee recommends that section 102 of chapter IX, reading as follows be deleted from the bill:

SEC. 102. Notwithstanding the provision in the Act approved August 11 1939 (53 Stat. 1409), limiting employment in certain positions to citizens of the United States, citizens of Panama may be employed in such positions.

The committee further recommends that the following language be substituted for the foregoing House provision:

SEC. 102. No part of any appropriation contained in this chapter shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: Provided, however, (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States or on the Canal Zone; (3) that nothing in this chapter shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, administrative, clerical, supervisory service on the Canal Zone under the terms of this chapter (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United State

This section as recommended by the committee is in the same form as carried in the Civil Functions Appropriation Act, 1950, and has been contained in the Civil Functions Appropriations Act in substantially this form for a number of years.

The section as proposed by the committee likewise is identical with section 621, chapter X, title VI, of the bill, which section relates to defense funds appropriated for the fiscal year 1951 to the Army, Navy, and Air Corps.

INCREASES AND LIMITATIONS

The changes recommended by the committee in the amounts of chapter IX of the House bill are as follows:

Signal Corps:

Alaska Communication System: Construction_____

\$1, 877, 920

Corps of Engineers:

Limitation on personal services in the Office of the Chief of

Engineers: The committee recommends that the limitation of the Office of the \$1,450,000 on personal services in the Office of the Chief of Engineers be increased by \$150,000 to provide a limitation of \$1,600,000, which is the amount of the 1951 Budget estimate. The increase in this limitation provides for no increase in personnel but is required in order to comply with Public Law 429 pay

increases and mandatory step-increases. Purchase of passenger-carrying automobiles, motorboats, and airplanes:

The committee recommends that the following proviso in the House bill be amended as indicated:

: Provided further, That the various appropriations for rivers and harbors and flood control may be used for the purchase (for replacement only) in the current fiscal year of three hundred and fifty passenger motor vehicles in the current fiscal year of five hundred passenger motor vehicles (of which four hundred and fifty-three shall be for replacement only) and two motorboats (to be acquired from surplus stock where practicable) and the purchase (not to exceed one, to be acquired from surplus stock where practicable), maintenance, repair, and operation of aircraft

Payments to school districts:

The committee recommends that the following provision be added to the bill:

; Provided further, That the various appropriations for rivers and harbors and flood control shall be available for payments to school districts as authorized by law, including payments on account of de-pendents of employees in field offices in project areas engaged in construction and related activities

Rivers and harbors______ The committee recommends that the following language be added to the bill:

of which \$75,000 shall be available for dredging in the Old River, Cleveland, Ohio, out of amounts al-lotted to other purposes for Cleveland Harbor as authorized by law

Flood control, general	95, 878, 000
Flood control, Mississippi River and tributaries	1, 778, 000
Miscellaneous civil works	4, 000
Total increase, Corps of Engineers	133, 026, 500

Total increase, chapter IX_____ 134, 904, 420

George C. Marshall Foundation, Lexington, Virginia

35, 366, 500

DECREASES

Quartermaster Corps:	
Cemeterial expenses Entombment of an Unknown American Serviceman of World War II	\$500, 000 350, 000
Total decrease, Quartermaster Corps	850, 000
Corps of Engineers:	
Alteration of bridges over navigable waters Flood control, general (emergency fund) Emergency fund for flood control on tributaries of Mis- sissippi River Flood control, Sacramento River, Calif	100, 000 300, 000 50, 000 175, 500
Total decrease, Corps of Engineers	625, 500
United States Soldiers' Home:	
Maintenance and operation: The committee recommends that the amount to be made available for maintenance and operation from the Soldiers' Home permanent fund be decreased from \$2,395,000, as proposed by the House, to \$2,363,240, a net reduction of \$31,760. This net reduction is ob- tained by deleting \$141,760 for "Farm activities" contained in the 1951 budget estimates and increasing by \$110,000 the amount to be available for member care.	
The Panama Canal:	
Maintenance and operation Civil government	$1,248,300\\76,000$

GENERAL APPROPRIATION BILL, 195

-

GENERAL APPROPRIATION BILL, 1951

RÉSUMÉ OF CHAPTER X APPROPRIATIONS

The 1950 appropriation.—The total 1950 appropriation for the Department of Defense and the National Security Council and the National Security Resources Board was \$13,055,562,498 cash and \$2,752,913,470 in contract authorizations, or a total of \$15,808,475,968. Of this amount \$22,461,000 cash and \$850,948,000 in contract authority was impounded.

The 1951 budget estimates.—Including supplementals, the 1951 budget estimates amount to \$13,376,865,000 in cash and \$1,385,785,-000 in contract authorizations. The supplemental items include \$50,000,000 cash and \$300,000,000 in contract authority in House Document No. 575, items considered and passed on the House floor, and \$298,190,000 cash not considered by the House, found in Senate Document No. 162. The contract authority does not include \$850,-948,000 released from the 1950 reserve.

The House bill.—The bill, as it passed the House, allowed \$12,-910,702,300 cash, and \$1,385,785,000 in contract authorizations. This was a reduction of \$198,907,700 in budgeted items and an increase of \$30,935,000 for items not budgeted, or a net reduction of \$167,972,700 in the items considered by the House and an amount \$466,162,700 under the total budget estimate, including \$298,190,000 in supplementals not considered by the House.

The Senate bill.—The bill recommended by the Senate committee allows \$13,294,581,821 cash and \$1,385,785,000 in contract authorization. This is a reduction of \$82,283,179 from the budget estimate. The bill as recommended by the committee includes, in addition to the \$12,910,702,300 allowed by the House, \$298,190,000 in supplemental estimates found in Senate Document 162 and \$142,548,936 in restorations requested by the agencies involved. From this total of \$13,351,441,236 a reduction of \$56,859,415 comparable to amounts in chapter X-A was made, the total cash being reduced to \$13,-294,581,821.

In making reductions for the Department of Defense comparable to those in chapter X–A, the committee is in accord with the economy goals, as they relate to the Department of Defense, which motivated the passage in the House of chapter X–A. At the same time, the committee regarded as contrary to the national interest the arbitrary reduction in specific object classifications made by chapter X–A in the Military Establishment. This conviction was concurred in by the Secretary of Defense who stated that "it would not permit the maintenance of maximum military effectiveness within the total dollars available."

Accordingly, the committee has made application of reductions comparable to those in chapter X-A in those appropriation items where such reductions would, in the opinion of the Department of Defense, be least detrimental to the national security. In so doing, the committee recommends the exemption of the Department of Defense from reductions in chapter X-A.

The application to the Department of Defense's budget estimates of chapter X-A of the bill as passed by the House would result in reductions of approximately \$72,500,000 or \$18,536,624 in addition to specific House cuts. Recomputation was made of the effect of the amendment by applying the appropriate percentages to the budget estimate and deducting that portion of the amounts not requested to be restored by the Senate which were for objects affected by the amendment. This totals \$56,859,415. This reduction is in addition to other reductions of \$25,408,764, making a total Senate committee reduction of \$82,268,179 from the Defense Department's estimate. The \$25,408,764 reduction is the result of deducting additions by the House of nonbudgeted items totaling \$30,935,000 from \$56,343,764, the items for which no restoration is requested.

In addition to the \$82,268,179 reduction for the Department of Defense from the budget estimates, a House reduction of \$15,000 for the National Security Council was approved, making a total reduction of \$82,283,179.

Following is the method by which the Senate committee figures were arrived at:

Original budget estimate	\$13,028,675,000 + 50,000,000
Total considered by House	13, 078, 675, 000
House additions House reductions	$+30, 935, 000 \\ -198, 907, 700$
Total allowed by House Supplemental estimate added by Senate (S. Doc. 162) Restorations by Senate	$\begin{array}{r}12,910,702,300\\+298,190,000\\+142,548,936\end{array}$
Total, Senate bill before chapter X-A reductions Application of chapter X-A	$13, 351, 441, 236 \\ -56, 859, 415$
Total allowed by Senate committee	13, 294, 581, 821

GOAL OF NATIONAL SECURITY

In its consideration of the appropriations for the Defense Establishment for the fiscal year 1951, the Armed Services Subcommittee of the Senate Committee on Appropriations again this year has attempted to provide as strong a military arm as is possible within the limits of our national economy. In so doing it has followed closely the rerecommendations of the President's budget, the Secretary of Defense, and the Joint Chiefs of Staff. In addition, the committee invited General Eisenhower to express his views as to the adequacy of the defense budget and as a result of his recommendations and those later expressed by Secretary Johnson some revisions were made to strengthen certain aspects of the Military Establishment. The committee, in following closely the recommendations of the budget and the defense chiefs, attempted to achieve a balance between military preparedness and economic stability which will best serve the interests of the Nation.

THE NATIONAL SECURITY COUNCIL

The 1951 budget estimate for the National Security Council was \$175,000, of which \$160,000 was recommended by the House. The Senate committee has approved the House figure. Testimony revealed that there was a considerable unexpended balance last year and that there will also be one for the fiscal year 1950.

69452-50-18

George C. Marshall Foundation, Lexington, Virginia

NATIONAL SECURITY RESOURCES BOARD

The committee was impressed with the importance of the work which the National Security Resources Board is now doing and recommends an appropriation of \$3,500,000, the budget estimate. The need in this organization for highly qualified personnel is undisputed. For this reason it is hoped that should position vacancies occur throughout the executive branch the need for a strengthening of the number of highly qualified employees in the National Security Resources Board will not go unrecognized.

DEPARTMENT OF DEFENSE

Total budget estimates for the Department of Defense are \$13,-373,190,000, of which \$298,190,000 was in a supplemental not considered by the House. The House recommended \$12,907,542,300, an amount \$465,647,700 under the total revised estimates. The committee recommends an appropriation of \$13,290,921,821, a reduction of \$82,268,179 from the estimate, and an increase over the House of \$383,379,521. This increase is provided by adding restorations recommended of \$142,048,936 to the additional estimate of \$298,-190,000 for military construction and reducing from that cuts of \$56,859,415 in application of chapter X-A.

The \$298,190,000 for construction is contained in a supplemental budget request (S. Doc. 162). Of this, \$95,478,000 was for the Department of the Army, \$62,928,000 was for the Department of the Navy, and \$139,784,000 was for the Department of the Air Force. This item was not considered by the House. The committee recommends that the full amount be appropriated, with the exception that \$159,415 be deducted from the appropriation for military construction, Department of the Army, in application of chapter X-A reductions.

OFFICE OF THE SECRETARY OF DEFENSE

The Office of the Secretary of Defense requested \$373,300,000 in budget estimates. The House recommended an appropriation of \$358,000,000. The total restoration requested was \$400,000 from which \$100,000 was deducted in the application of chapter X-A reductions. The Senate committee has approved the amount of \$358,300,000.

The committee notes that a number of contingencies, such as an increase in the Weapons Systems Evaluation Group, Civilian Pay Act increases and North Atlantic Treaty planning, have been provided from savings in the operations of agencies in existence at the time of the previous hearings. The committee desires that the funds appropriated be used for all of the responsibilities of the Secretary and any savings be first applied to contingencies which may arise so as to obviate, to the extent practicable, the need for requesting additional appropriations.

The committee was impressed by the statements of the witnesses concerning the very worth-while work conducted by the President's Committee on Religion and Welfare in the Armed Forces. In view of the unprecedented size and composition of our peacetime military forces, the committee feels that it is important to preserve their civilian connections in the social and religious groups of the communi-

ties where they are located. The President's Committee was established by Executive order which recites the legal authority for the agencies concerned to defray the expenses of the committee and it is the feeling of the Appropriations Committee that this work should be continued.

PURCHASE OF PASSENGER MOTOR VEHICLES

Request was denied for the purchase of additional heavy passenger motor vehicles in the Office of the Secretary of Defense and the Department of the Air Force. It is the opinion of the committee that no additional heavy high-priced passenger motor vehicles should be provided for Government personnel other than officials of Cabinet rank.

DEPARTMENT OF THE ARMY

Total budget estimates for the Department of the Army are \$4,113,862,000, of which \$95,478,000 was in a supplemental estimate not considered by the House. The House recommended \$3,942,030,300, an amount \$171,831,700 under the estimate. The committee recommends an appropriation of \$4,088,377,521, a reduction of \$25,484,479 from the estimate, and an increase over the House of \$146,347,221. This increase is provided by adding restorations recommended of \$77,628,636 to the additional estimate of \$95,478,000 for military construction and reducing from that cuts of \$26,759,415 in application of chapter X-A.

PROCUREMENT OF FOOD AND CLOTHING

The committee has inserted the word "highly" in connection with the procurement of perishable foods in the appropriation "Subsistence of the Army, Quartermaster Corps." This language was in the law last year. The committee wishes to point out that under the wording of this section the purchase of fish and other products is to continue as called for by the act of 1950. The committee feels that every possible protection should be afforded American producers under this section.

NATIONAL GUARD

It is the intent of the committee that savings made from the funds appropriated for the National Guard may be utilized by the States for the maintenance, repair, and alteration of armories necessary to carry out the responsibility of the Federal Government in connection with the maintenance and operation of the National Guard.

DEPARTMENT OF THE NAVY

Total budget estimates for the Department of the Navy are \$4,121,-667,000, of which \$62,928,000 was in a supplemental estimate not considered by the House. The House recommended \$4,026,897,000, an amount \$94,770,000 under the estimate. The committee recommends an appropriation of \$4,103,258,300, a reduction of \$18,408,700 from the estimate, and an increase of \$76,361,300 over the House. This increase is provided by adding restorations recommended of \$29,433,300 to the additional estimate of \$62,928,000 for military construction and reducing from that cuts of \$16,000,000 in application of chapter X-A.

DEPARTMENT OF THE AIR FORCE

Total budget estimates for the Department of the Air Force are \$4,764,361,000 of which \$139,784,000 was in a supplemental estimate not considered by the House. The House recommended \$4,580,615,000, an amount \$183,746,000 under the estimates. The committee recommends an appropriation of \$4,740,986,000, a reduction of \$23,375,000 from the estimate, and an increase over the House of \$160,371,000. This increase is provided by adding restorations recommended of \$34,587,000 to the additional estimate of \$139,784,000 for military construction and reducing from that cuts of \$14,000,000 in application of chapter X-A.

AIRCRAFT PROCUREMENT

The committee directs the Secretary of Defense to review with care the policy, rules, and considerations used to determine the obsolescence of each type of aircraft used or to be used in the Department of Defense. The policy and considerations used to determine the procurement of spares and spare parts should also receive the most careful scrutiny.

MAINTENANCE AND OVERHAUL OF EQUIPMENT

The committee, in its consideration of the present operating policies of the Air Force pertaining to maintenance and overhaul of equipment by commercial contractors, noted with some concern the growing tendency on the part of the Air Force to decrease markedly the relative amount of such work allocated to commercial contractors. The committee believes that the Air Force, in formulating its policies, should be mindful of the continuing need for a broad mobilization base firmly embedded in the economy of the Nation. Such a policy is in accord with the recommendations of the President's Air Policy The committee understands that the Air Force must Commission. not jeopardize the support of combat units, the flexibility of the depot system, and the training of depot units required in emergency. After consideration of all factors involved, the committee believes that it is essential to an adequate mobilization base for the Air Force that commercial contractors be utilized to the greatest extent consistent with the national security.

GENERAL PROVISIONS

RETIRED OFFICERS DEALING WITH MILITARY AGENCIES

The committee is sympathetic to the pleas of those who have pointed out the inequities of section 626 of chapter X. At the same time, it recognizes the possibility of abuse of connection in the sale or negotiation for sale of war materials or supplies to agencies in the Department of Defense. Therefore the committee recommends the deletion of section 626 in its entirety and the insertion of a new section in chapter XI of the bill. This section, which is found on page 281 of this report, will broaden the scope of application to include all regular officers on the retired lists of any of the uniformed services but at the same time will limit such application to a period of 2 years after retirement. The committee feels that this matter should be the subject of investigation and determination by the Armed Services Committees.

GENERAL

APPROPRIATION

BILL,

Contraction and a second state of the second

CHAPTER X-A

GENERAL REDUCTIONS IN APPROPRIATIONS AND CON-TRACT AUTHORIZATIONS

The committee recommends that the following chapter, which was inserted in the bill on the floor of the House, be deleted from the bill:

CHAPTER X-A—GENERAL REDUCTIONS IN APPROPRIATIONS AND CONTRACT AUTHORIZATIONS

Reductions in appropriations and contract authorizations contained in this Act are hereby made in the sum of \$600,000,000.

Not more than the following sums may be obligated by any agency or department provided for in this Act, viz:

 (1) For civilian personnel, not more than an amount 10 per centum below the amount proposed in the President's budget estimates for fiscal year 1951, except that in the Department of Defense where no more than the amount of the President's budget estimate minus 2 per centum shall be obligated. This paragraph shall not apply to nurses, doctors, or other medical personnel, including orderlies, in the Public Health Service and the Veterans' Administration.
 (2) For travel, not more than a total for all departments and agencies of

(2) For travel, not more than a total for all departments and agencies of \$319,000,000, and not more than 5 per centum less than the estimates provided for military personnel travel and not more than 20 per centum less than the amount provided for civilian personnel travel, than the estimates therefor contained in the President's budget message for the fiscal year 1951.

(3) For transportation of things, for all departments and agencies, not more than \$720,000,000: *Provided further*, That in no case shall the amount obligated exceed a figure 10 per centum below the estimates submitted by the President in his budget message for 1951 for each item for all agencies except the Department of Defense, and for the Department of Defense not more than 5 per centum less than the estimates of the President, transmitted in said budget message.

(4) For communications services, not more than \$59,000,000, and not more for any department other than the Department of Defense than the amount of the President's budget estimates for 1951 minus 10 per centum, and for the Department of Defense not more than a figure 5 per centum below the President's budget estimates for 1951.

(5) For rents and utilities, not more than \$205,000,000, and for all establishments other than the Department of Defense not more than the President's budget estimates for fiscal year 1951 minus 10 per centum.

(6) For printing and reproduction, not more than \$52,000,000, and not more in any case than the President's budget estimates for 1951 minus 10 per centum.

(7) For other contractual services, not more than \$1,301,000,000, and for all departments other than the Department of Defense not more than the President's budget estimates for 1951 minus 10 per centum.

(8) For supplies and materials, not more than \$3,888,000,000, and for all departments of the Government except the Department of Defense and the Veterans' hospitals not more than the President's budget estimates for 1951 minus 10 per centum.

(9) For equipment, not more than \$3,577,000,000, and for all departments other than the Department of Defense, not more than the President's budget estimates for 1951 minus 10 per centum.

(10) For lands and structures, for all departments of the Government, except the Department of Defense not more than the President's budget estimates for 1951 minus 5 per centum.

Chapter X-B as reported to the Senate: Under the

appropriations for 1950_____ 991, 731, 271

The items of appropriation considered and included in this chapter by the Senate committee were not included in the bill by the House.

FUNDS APPROPRIATED TO THE PRESIDENT

ECONOMIC COOPERATION ADMINISTRATION

For the third year of the European recovery program, fiscal year 1951, the committee recommends an appropriation of \$2,391,930,000, together with 1950 carry-over funds of \$276,761,473, or a total of \$2,668,691,473. The new appropriation is a reduction of \$265,770,000 below the budget estimate of \$2,657,700,000. Funds available to ECA for the fiscal year 1950 consisted of \$3,628,380,000 in appropriations and \$150,000,000 in loan authority, or a total of \$3,778,380,000.

¹ Includes \$455,523,729 for liquidation of contract authority. ² In addition, contract authority and loan authority in the amount of \$650,000,000.

ECA estimates that it will have an unobligated balance available from the fiscal year 1950 of \$276,761,473.

The committee desires to remind the ECA that among the purposes of this appropriation is the promotion of economic cooperation throughout Europe which means all of the countries including Great Britain. The ECA is instructed to keep complete economic cooperation uppermost in its mind in allocating the funds provided in this chapter.

The committee also recommends language authorizing the administrator to utilize not more than \$25,000 for any further action he may consider advisable to carry out the provisions of section 115 (f) of the Economic Cooperation Act of 1948, as amended, which section refers to the dismantling of plants.

LIMITATION ON AID TO COUNTRIES FAILING TO COMPLY WITH TREATIES WITH UNITED STATES

The committee has included language in the bill prohibiting the use of any of the ECA funds in a manner that will permit any of the local currency equivalents to be placed at the disposal of any recipient country so long as any dependent area of such country fails to comply with any treaty to which such dependent area and the United States are parties. The committee was advised that Morocco is failing to comply with its treaties with the United States and is discriminating against United States citizens and trade. The language of the amendment recommended by the committee is as follows:

: Provided further, That no part of the funds herein appropriated shall be expended in a manner that will permit any of the local currency equivalents, derived therefrom in compliance with section 115 (b) (6) of the Economic Cooperation Act of 1948, as amended, to be placed at the disposal of any recipient country so long as any dependent area of such country fails to comply with any treaty to which such dependent area and the United States are parties.

ASSISTANCE TO THE REPUBLIC OF KOREA

The committee recommends an appropriation of \$90,000,000 for assistance to the Republic of Korea. The amount recommended is \$10,000,000 below the budget estimate and \$20,000,000 below the appropriation for the fiscal year 1950.

INTERNATIONAL CHILDREN'S WELFARE WORK

The committee recommends an appropriation of \$12,500,000 for contribution to the United Nations International Children's Emergency Fund. Title V of the Foreign Economic Assistance Act of 1950 (Public Law 535, approved June 5, 1950) authorizes \$15,000,000 to be appropriated in fiscal year 1951 for international children's welfare work. This contribution can be made to the United Nations or any subordinate body thereof. This language was placed in the act in case during the fiscal year the International Children's Emergency Fund was abolished and some other arrangements were made through the United Nations for international children's welfare work. The committee was advised that at the present time no such arrangements have been made and that the only program now existing for international children's Emergency Fund. Accordingly, the committee

recommends that the United States contribution be made to this fund, and language effecting this recommendation has been included in the bill.

INTERNATIONAL DEVELOPMENT (POINT IV)

The committee recommends an appropriation of \$10,000,000, together with the funds provided for this purpose in chapter III, for this program for the fiscal year 1951. The budget estimate for funds in this chapter is in the amount of \$26,900,000. In Public Law 535, signed June 5, 1950, the Congress authorized a total program of \$35,000,000 for international development. In the general appropriation bill for 1951, under the Department of State in chapter III, the House approved an appropriation of \$5,500,000 for the Institute of Inter-American Affairs and an appropriation of \$2,600,000 under the head "International Information and Educational Activities." These two programs total \$8,100,000 and constitute a part of the \$35,000,000 authorized by Congress in Public Law 535. The budget estimate of \$26,900,000 considered by the committee in this chapter is the balance of the authorization.

In recommending an appropriation of \$10,000,000, the committee has included language in the bill limiting the funds which may be expended for administrative expenses to 10 percent. It is the intent of the committee that the administrative expenses of 10 percent include that part of funds which will be transferred to other departments and agencies of the Government and in turn utilized by them for administrative expenses.

The committee is of the opinion that care should be taken that the funds authorized shall not be used for programs which are a duplication of programs carried on by other departments and agencies of the Government or by international organizations to which the United States makes a major contribution. In view of this, the committee recommends a limitation against expending any of the funds for the duplication of any program being carried on by any other agency of the Government or any international agency to which the United States is a major contributor.

The committee is deeply concerned that the recipients of funds or beneficiaries under the program may assume that the making of surveys and technical cooperation programs will obligate the United States to make loans and grants for the execution or construction of projects. Accordingly, the committee recommends language prohibiting the use of any of the funds for the construction of any project and limiting the funds to preliminary surveys and technical cooperation programs upon which reports shall be made to the Congress quarterly. The committee also recommends language in the bill stating that the making of any survey or the advancement of any technical cooperation program or the preparation of plans for projects does not constitute any obligation whatsoever on the part of the United States to make any loan or grant, and directs the Secretary of State to give to each recipient of funds or beneficiary, written notice to this effect and to report such action to Congress. The exact language recommended by the committee is as follows:

: Provided, however, That no part of this appropriation may be expended for the duplication of any program being carried on by any other agency of the United States Government or any international agency to which the United States is a major contributor,

nor for the construction of any project, nor for any purpose except administrative expenses (not to exceed ten percentum), and preliminary surveys and technical cooperation programs upon which reports shall be made to the Congress of the United States quarterly: Provided further, That the making of any survey or the advancement of any technical cooperation program or the preparation of plans for projects does not constitute any obligation whatsoever on the part of the Government of the United States to make any loan or grant for the execution or construction of any project or for the completion of any program devised under title IV of Public Law 535, approved June 5, 1950: Provided further, That it shall be the duty of the Secretary of State to give written notice to each recipient of funds or beneficiary under said title that such assistance shall not be construed as an obligation on the part of the United States to make funds available for the construction or execution of any project and to report such action to Congress

The committee believes that encouragement should be given to private enterprise to furnish such technical assistance, wherever feasible, and such assistance should be facilitated by the executive departments and agencies of the Government.

MUTUAL DEFENSE ASSISTANCE

For this program, the committee recommends a total appropriation of \$1,678,023,729, the full amount of the budget estimate. Included in the amount recommended is \$455,523,729 for the liquidation of prior year contract authority. The new funds recommended by the committee total \$1,222,500,000, which is the amount of the authorization recently approved by the Senate. The comparable figure for fiscal year 1950 is \$1,314,010,000, which consists of \$814,-010,000 in appropriations and \$500,000,000 in contract authority.

DEPARTMENT OF DEFENSE

GOVERNMENT AND RELIEF IN OCCUPIED AREAS

The budget estimate for government and relief in occupied areas is \$320,000,000. The committee recommends an appropriation of \$288,000,000 which is a reduction of \$32,000,000 below the budget estimate. The comparable appropriation for this purpose during the fiscal year 1950 is \$498,734,329.

DEPARTMENT OF STATE

GOVERNMENT IN OCCUPIED AREAS OF GERMANY

The committee recommends an appropriation of \$27,000,000 for government in occupied areas of Germany. The budget estimate is in the amount of \$30,000,000. The amount recommended by the committee will provide approximately the same amount of money that was available for this purpose during the fiscal year 1950. This activity during the fiscal year 1950 was financed from the appropriation "Government and relief in occupied areas" by transfer to the Department of State. The estimate furnished to the committee of the funds transferred to the Department of State for this purpose was \$26,575,000.

AID TO PALESTINE REFUGEES

Che committee recommends an appropriation of \$24,705,000 for this purpose, which is a reduction of \$2,745,000 in the budget estimate. The General Assembly of the United Nations approved an 18 months' program in the amount of \$54,900,000, of which \$20,200,000 is for relief and \$34,700,000 is for work projects. Public Law 535, signed June 5, 1950, authorized an appropriation of \$27,450,000 for contribution to the United Nations program. The committee's recommendation is 10 percent below the authorization.

WHERRY, Nebraska GUY CORDON, Oregon LEVERETT SALTONSTALL, Massachusetts MILTON R. YOUNG, North Dakota WILLIAM F. KNOWLAND, California

The last chapter of the appropriation bill is entitled "General Provisions" and carries those provisions which have been made applicable to all appropriations carried in this bill. There are other general provisions carried in the individual chapters of the bill which are applicable only to the chapter in which they appear. The changes recommended by the committee in this chapter of the House bill are as follows:

SECTION 1110-WORKING FUNDS

Section 1110 inserted in the bill by the House requires that all transfers from one appropriation to another be made by check, thus substituting one method for the several procedures currently in use. The section would also limit the availability for obligation of funds transferred from one agency to another for the furnishing of supplies or the rendering of services to the same limitations, conditions, and restrictions as provided by the act appropriating the funds. Under existing law, annual appropriations which are transferred are available to the performing agency for obligation for two full years after the year for which the appropriation is made. Under the House provision, the performing agency will be in the same position as the ordering agency. The committee was advised by several agencies that it was not clear whether the new provision applied to the appropriations heretofore made by Congress. Representatives of the General Accounting Office advised the committee that under their interpretation of the provision it would not apply retroactively to appropriations made by Congress. With this interpretation of the provision, the committee is in agreement and recommends that the provision be enacted into law.

SECTION 1111—ANTIDEFICIENCY PROVISION

The committee recommends that the following provision which was inserted in the bill by the House be amended as indicated:

SEC. 1111. Section 3679 of the Revised Statutes, as amended (31 U.S. C. 665),

is hereby further amended to read as follows: "SEC. 3679. (a) No officer or employee of the United States shall make or authorize an expenditure from or create or authorize an obligation under any appropriation or fund in excess of the amount available therein; nor shall any such officer or employee involve the Government in any contract or other obli-gation, for the payment of money for any purpose, in advance of appropriations made for such purpose, unless such contract or obligation is authorized by law.

"(b) No officer or employee of the United States shall accept voluntary service for the United States or employ personal service in excess of that authorized by law, except in cases of emergency involving the safety of human life or the protection of property.

"(c) (1) Except as otherwise provided in this section, all appropriations or funds available for obligation for a definite period of time shall be so apportioned as to prevent obligation or expenditure thereof in a manner which would indicate a necessity for deficiency or supplemental appropriations for such period; and all appropriations or funds not limited to a definite period of time, and all authorizations to create obligations by contract in advance of appropriations, shall be so apportioned as to achieve the most effective and economical use thereof. As used hereafter in this section, the term 'appropriation' means appropriations, funds, and authorizations to create obligations by contract in advance of appropriations.

"(2) In apportioning any appropriation, reserves may be established to provide for contingencies, or to effect savings whenever savings are made possible by or through changes in requirements, requirements or greater efficiency of operations, or other developments subsequent to the date on which such appropriation was made available. Whenever it is determined by an officer designated in subsection (d) of this section to make apportionments and reapportionments that any amount so reserved will not be required to carry out the purposes of the appropriation concerned, he shall recommend the rescission of such amount in the manner provided in the Budget and Accounting Act, 1921, for estimates of

appropriations. "(3) Any appropriation subject to apportionment shall be distributed by months, calendar quarters, operating seasons, or other time periods, or by activities, functions, projects, or objects, or by a combination thereof, as may be deemed appropriate by the officers designated in subsection (d) of this section to make apportionments and reapportionments. Except as otherwise specified by the officer making the apportionment, amounts so apportioned shall remain available for obligation, in accordance with the terms of the appropriation, on a cumulative basis unless reapportioned.

"(4) Apportionments shall be reviewed at least four times each year by the officers designated in subsection (d) of this section to make apportionments and reapportionments, and such reapportionments made or such reserves established, modified, or released as may be necessary to further the effective use of the appropriation concerned, in accordance with the purposes stated in paragraph (1)

of this subsection. "(d) (1) Any appropriation available to the legislative branch, the judiciary, or the District of Columbia, which is required to be apportioned under subsection (c) of this section, shall be apportioned or reapportioned in writing by the officer having administrative control of such appropriation. Each such appropriation shall be apportioned not later than thirty days before the beginning of the fiscal year for which the appropriation is available, or not more than thirty days after approval of the Act by which the appropriation is made available, whichever is later.

"(2) Any appropriation available to an agency, which is required to be apportioned under subsection (c) of this section, shall be apportioned or reapportioned in writing by the Director of the Bureau of the Budget. The head of each agency to which any such appropriation is available shall submit to the Bureau of the Budget information, in such form and manner and at such time or times as the Director may prescribe, as may be required for the apportionment of such appro-priation. Such information shall be submitted not later than forty days before the beginning of any fiscal year for which the appropriation is available, or not

more than fifteen days after approval of the Act by which such appropriation is made available, whichever is later. The Director of the Bureau of the Budget shall apportion each such appropriation and shall notify the agency concerned of his action not later than twenty days before the beginning of the fiscal year for which the appropriation is available, or not more than thirty days after the approval of the Act by which such appropriation is made available, whichever is later. When used in this section, the term 'agency' means any executive department, agency, commission, authority, administration, board, or other independent establishment in the executive branch of the Government, including any corporation wholly or partly owned by the United States which is an instrumentality of the United States. Nothing in this subsection shall be so construed as to interfere with the initiation, operation, and administration of agricultural price support programs. The provisions of this section shall not apply to any corporation which obtains funds for making loans, other than paid in capital funds, without legal liability on the part of the United States.

"(e) (1) No apportionment or reapportionment which, in the judgment of the officer making such apportionment or reapportionment, would indicate a necessity for a deficiency or supplemental estimate shall be made except upon a determina-tion by such officer that such action is required because of (A) any laws enacted subsequent to the transmission to the Congress of the estimates for an appropriation which require expenditures beyond administrative control; or (B) emergen-cies involving the safety of human life, the protection of property, or the immediate welfare of individuals in cases where an appropriation has been made to enable the United States to make payment of, or contributions toward, sums which are required to be paid to individuals either in specific amounts fixed by law or in accordance with formulae prescribed by law.

(2) In each case of an apportionment or a reapportionment which, in the judgment of the officer making such apportionment or reapportionment, would indicate a necessity for a deficiency or supplemental estimate, such officer shall immediately submit a detailed report of the facts of the case to the Congress. In transmitting any deficiency or supplemental estimates required on account of any such apportionment or reapportionment, reference shall be made to such report.

"(f) (1) The officers designated in subsection (d) of this section to make apportionments and reapportionments may exempt from apportionments trust funds and working funds expenditures from which have no significant effect on the financial operations of the Government, working capital and revolving funds established for intra-governmental operations, receipts from industrial and power operations available under law and any appropriation made specifically for-

"(1) interest on, or retirement of, the public debt;

"(2) payment of claims, judgments, refunds, and draw-backs; "(3) any item determined by the President to be of a confidential nature;

"(4) payment under private relief Acts or other laws requiring payments to designated payees in the total amount of such appropriation;

"(2) The provisions of subsection (c) of this section shall not apply to appropriations to the Senate or House of Representatives or to any Member, committee, Office (including the office of the Architect of the Capitol), officer, or employee thereof. "(g) Any appropriation which is apportioned or reapportioned pursuant to this

section may be divided and subdivided administratively within the limits of such apportionments or reapportionments. The officer having administrative control of any such appropriation available to the legislative branch, the judiciary, or the District of Columbia, and the head of each agency, subject to the approval of the Director of the Bureau of the Budget, shall prescribe, by regulation, a system of administrative control (not inconsistent with any other accounting procedures prescribed by or pursuant to law) which shall be designed to (A) restrict obligations or expenditures against each appropriation to the amount of apportionments or reapportionments made for each such appropriation, and (B) enable such officer or agency head to fix responsibility for the creation of any obligation or the making of any expenditure in excess of an apportionment or reapportionment. "(h) No officer or employee of the United States shall authorize or create any

obligation or make any expenditure (A) in excess of an apportionment or reapportionment, or (B) in excess of the amount permitted by regulations prescribed pursuant to subsection (g) of this section.

"(i) (1) In addition to any penalty or liability under other law, any officer or employee of the United States who shall violate subsection (a), (b), or (h) of this section shall be subjected to appropriate administrative discipline, including, when circumstances warrant, suspension from duty without pay or removal from office;

and any officer or employee of the United States who shall knowingly and willfully

violate subsection (a), (b), or (h) of this section shall, upon convinction, be fined not more than \$5,000 or imprisoned for not more than two years, or both. "(2) In the case of a violation of subsection (a), (b), or (h) of this section by an officer or employee of an agency, or of the District of Columbia, the head of the agency concerned or the Commissioners of the District of Columbia, shall im-mediately report to the President, through the Director of the Bureau of the Budget, and to the Congress all pertinent facts together with a statement of the action taken thereon.'

SECTION 1112-ANNUAL LEAVE

The committee recommends that the following provision inserted in the bill by the House be amended as indicated:

SEC. 1112. No part of the funds of, or available for expenditure by any corporation or agency included in this Act, including the government of the District of Columbia, shall be available to pay for annual leave accumulated by any officer or employee during the calendar year 1950 and unused at the close of business on December 31, 1950 June 30, 1951: Provided, That this section shall not apply to officers and employees whose post of duty is outside the continental United States.

SECTION 1114—FILLING OF VACANCIES

The committee recommends that the following section which was inserted in the bill on the floor of the House be deleted from the bill:

SEC. 1114. No part of any appropriation contained in this Act shall be used to pay the compensation of any incumbent appointed to any civil office or position under the United States Government which may become vacant during the fiscal year beginning on July 1, 1950: *Provided*, That this inhibition shall not apply—

(a) to not to exceed 10 per centum of all such vacancies in any agency caused by separation from such agency,

(b) to positions filled from within the agency,

(c) to offices or positions required by law to be filled by appointment of the President by and with the advice and consent of the Senate,

(d) to scientific and technical positions in the Atomic Energy Commission

and the Armed Services, (e) to nurses, doctors, or other medical personnel, including orderlies, in the Public Health Service and the Veterans' Administration,

(f) to law enforcement officers,

(g) to temporary, emergency, seasonal, or cooperative positions,

(h) to commissioned, commissioned warrant, warrant, and enlisted per-sonnel, and cadets of the Coast Guard, and the undergraduates of the United States Military and Naval Academies, or

(i) to any agency in the legislative or judicial branches of the Government, or the municipal government of the District of Columbia.

NEW SECTION 1114-PURCHASE OF TYPEWRITERS

The following provision was inserted by the House under the heading "General Services Administration" in chapter VIII of the bill. The committee recommends that the provision be deleted from chapter VIII of the bill and be inserted as section 1114 under "General provisions":

SEC. 1114. During the current fiscal year, no part of any money appropriated in this or any other Act shall be used during any quarter of such fiscal year to purchase typewriting machines (except bookkeeping and billing machines) at a price which exceeds 90 per centum of the lowest net cash price, plus applicable Federal excise taxes, accorded the most-favored customer (other than the Government, the American National Pad Crease and the number of the unities of the price of the second the most-favored customer (other than the Government, the American National Red Cross, and the purchasers of typewriting machines for educational purposes only) of the manufacturer of such machines during the six-month period immediately preceding such quarter.

SECTION 1115-EMPLOYMENT OF RETIRED OFFICERS

The following provision which was inserted in the bill by the House as section 626 under chapter X has been deleted from the bill:

SEC. 626. No payment shall be made from appropriations in this chapter to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, or Regular Air Force, who for himself, or for others, is engaged in the selling of, or contracting for the sale of, or negotiating for the sale of, to any agency of the Department of Defense, any war materials or supplies.

In lieu thereof, the committee recommends the following section as a new section 1115 under "General provisions":

SEC. 1115. No payment shall be made from appropriations in this Act to any officer on the retired lists of the Regular Army, Regular Navy, Regular Marine Corps, Regular Air Force, Regular Coast Guard, Coast and Geodetic Survey, and Public Health Service for a period of two years after retirement who for himself or for others is engaged in the selling of or contracting for the sale of or negotiating for the sale of to any agency of the Department of Defense, the Coast Guard, the Coast and Geodetic Survey, and the Public Health Service any supplies or war materials.
